Post Bop Contemporary Jazz Extensions Chicago Review Press  
Curtis Mayfield was one of the seminal vocalists and most talented guitarists of his era, and his music played a vital role in the civil rights movement: "People Get Ready" was the black anthem of the time. In *Traveling Soul*, Todd Mayfield tells his famously private father's story in riveting detail. Born into dire poverty, raised in the slums of Chicago, Curtis became a musical prodigy, not only singing like a dream but growing into a brilliant songwriter. In the 1960s he opened his own label and production company and worked with many other top artists, including the Staple Singers. Curtis's life was famously cut short by an accident that left him paralyzed, but in his declining health he received the long-awaited recognition of the music industry. Passionate, illuminating, vivid, and absorbing, *Traveling Soul* will doubtlessly take its place among the classics of music biography.

The long-awaited, definitive biography of The King of Soul, timed to coincide with the 50th anniversary of Redding's iconic performance at the 1967 Monterey Pop Festival. Otis Redding remains an immortal presence in the canon of American music on the strength of such classic hits as "(Sittin' on) The Dock of the Bay," "I've Been Loving You Too Long," "Try a Little Tenderness," and "Respect," a song he wrote and recorded before Aretha Franklin made it her own. As the architect of the distinctly southern, gospel-inflected style of rhythm & blues associated with Stax Records in Memphis, Redding made music that has long served as the gold standard of 1960s soul. Yet an aura of myth and mystery has always surrounded his life, which was tragically cut short at the height of his career by a plane crash in December 1967. In *Otis Redding: An Unfinished Life*, Jonathan Gould finally does justice to Redding's incomparable musical artistry, drawing on exhaustive research, the cooperation of the Redding family, and previously unavailable sources of information to present the first comprehensive portrait of the singer's background, his upbringing, and his professional career. In chronicling the story of Redding's life and music, Gould also presents a social history of the time and place from which they emerged. His book never lets us forget that the boundaries between black and white in popular music were becoming porous during the years when racial tensions were reaching a height throughout the United States. His indelible portrait of Redding and the mass acceptance of soul music in the 1960s is both a revealing look at a brilliant artist and a provocative exploration of the tangled history of race and music in America that resonates strongly with the present day.

"Outside Music, Inside Voices", supported by a Faculty Fellowship grant from the Berklee College of Music, was edited by the jazz writer Ed Hazell and by Evelyn Rosenthal, former director of Harvard University Museum Publications. The 330-page book includes a foreword written by Ed Hazell; extensive notations in the footnotes of the author's introduction; individual biographies of each artist and the author; 30 brilliant black-and-white photographs of each artist, taken by Luciano Rossetti. As Herbie Hancock noted in his endorsement, "Garrison Fewell has written a brilliant reflection on creativity and spirituality, delving into the deep relationship between these two subjects that spark the explorations of many pioneers in avant-garde jazz music. The level of detail here is so compelling that it encourages much more than just a single reading of this book."

For several centuries Cape Town has accommodated a great variety of musical genres which have usually been associated with specific population groups living in and around the city. Musical styles and genres produced in Cape Town have therefore been assigned an "identity" which is first and foremost social. This volume tries to question the relationship established between musical styles and genres, and social - in this case pseudo-racial - identities. In *Sounding the Cape*, Denis-Constant Martin recomposes and examines through the theoretical prism of creolisation the history of music in Cape Town, deploying analytical tools borrowed from the most recent studies of identity configurations. He demonstrates that musical creation in the Mother City, and in South Africa, has always been nurtured by contacts, exchanges and innovations whatever the efforts made by racist powers to separate and divide people according to their origin. Musicians interviewed at the dawn of the 21st century confirm that mixture and blending characterise all Cape Town's musics. They also emphasise the importance of a rhythmic pattern particular to Cape Town, the goema beat, whose origins are obviously mixed. The study of music demonstrates that the

history of Cape Town, and of South Africa as a whole, undeniably fostered creole societies. Yet, twenty years after the collapse of apartheid, these societies are still divided along lines that combine economic factors and "racial" categorisations. Martin concludes that, were music given a greater importance in educational and cultural policies, it could contribute to fighting these divisions and promote the notion of a nation that, in spite of the violence of racism and apartheid, has managed to invent a unique common culture.

In the first fully comprehensive study of one of the world's most iconic musical instruments, Stephen Cottrell examines the saxophone's various social, historical, and cultural trajectories, and illustrates how and why this instrument, with its idiosyncratic shape and sound, became important for so many different music-makers around the world. After considering what led inventor Adolphe Sax to develop this new musical wind instrument, Cottrell explores changes in saxophone design since the 1840s before examining the instrument's role in a variety of contexts: in the military bands that contributed so much to the saxophone's global dissemination during the nineteenth century; as part of the rapid

expansion of American popular music around the turn of the twentieth century; in classical and contemporary art music; in world and popular music; and, of course, in jazz, a musical style with which the saxophone has become closely identified.
