Increased agricultural productivity is a major stepping stone on the path out of poverty in sub-Saharan Africa and South Asia, but farmers there face tremendous challenges improving production. Poor soil, inefficient water use, and a lack of access to plant breeding resources, nutritious animal feed, high quality seed, and fuel and electricity-combined with some of the most extreme environmental conditions on Earth-have made yields in crop and animal production far lower in these regions than world averages. Emerging Technologies to Benefit Farmers in Sub-Saharan Africa and South Asia identifies sixty emerging technologies with the potential to significantly improve agricultural productivity in sub-Saharan Africa and South Asia. Eighteen technologies are recommended for immediate development or further exploration. Scientists from all backgrounds have an opportunity to become involved in bringing these and other technologies to fruition. The opportunities suggested in this book offer new approaches that can synergize with each other and with many other activities to transform agriculture in sub-Saharan Africa and South Asia. Internationales Handbuch Der Spezialbibliotheken National Academies Press

A comprehensive, multidisciplinary volume on biofuels in developing countries for academics, practitioners and policy makers.

Proceedings of a Seminar on Socially Relevant Research at the University of Natal, Held on 1 November 1988 in Durban Stockton Press

The increasing deployment of bioenergy frequently raises issues regarding the use of land and raw materials, infrastructure and logistics. In light of these sometimes conflicting interests Advances in Bioenergy provides an objective and wide-ranging overview of the technology, economics and policy of bioenergy. Offering an authoritative multidisciplinary summary of the opportunities and challenges associated with bioenergy utilization, with international researchers give up-to-date and detailed information on key issues for biomass production and conversion to energy. Key features: *Discusses different bioenergy uses such as transportation fuels, electricity and heat production. *Assesses emerging fields such as bio-based chemicals and bio-refineries. *Debates conditions for the mobilization of sustainable bioenergy supply chains and outlines governance systems to support this mobilization. * Dedicated chapters to sustainability governance and emerging tools such as certification systems and standards supporting growth of a sustainable bioenergy industry. *Considers the political, environmental, social and cultural context related to the demand for energy resources, the impact of this demand on the world around us, and the choices and behaviours of consumers. This book will be a vital reference to engineers, researchers and students that need an accessible overview of the bioenergy area. It will also be of high value for politicians, policymakers and

industry leaders that need to stay up to date with the state-of-the-art science and technology in this area.

Report to the Secretary for Agriculture and Forestry, KwaZulu Government Service on a Soil Survey of the Owen Sithole College of Agriculture, Empangeni John Wiley & Sons

Miombo woodlands and their use: overview and key issues. The ecology of miombo woodlands. Population biology of miombo tree. Miombo woodlands in the wider context: macro-economic and inter-sectoral influences. Rural households and miombo woodlands: use, value and management. Trade in woodland products from the miombo region. Managing miombo woodland. Institutional arrangements governing the use and the management of miombo woodlands. Miombo woodlands and rural livelihoods: options and opportunities.

Congressional Record Cambridge University Press

The World Guide to Special Libraries lists about 35,000 libraries world wide categorized by more than 800 key words - including libraries of departments, institutes, hospitals, schools, companies, administrative bodies, foundations, associations and religious communities. It provides complete details of the libraries and their holdings, and alphabetical indexes of subjects and institutions.

Gaffney's Local Government in South Africa Nottingham Trent University

This volume considers every aspect of calf rearing, from physiological principles to practical systems. Topics include physiology of growth and digestion, nutrient requirements, health and welfare, and lifetime performance. More than half the authors are from outside the UK and all are acknowledged as international experts in their field. This book is aimed at technical advisers, researchers, extension workers, veterinary practitioners, progressive farmers, academics and students.

Durban Museum Novitates CIFOR

This book provides comprehensive information on South Africa, how it operates, how the systems work and where to find further information if required. A useful tool for those living within South Africa as well as for tourists needing information.

Agricultural Education & Training in South Africa with Specific Reference to the College of Agriculture Jonathan Ball Publishers

World List of Universities is the twenty-first edition of a biennial publication providing key information on higher educational institutions worldwide. Produced in conjunction with the International Association of Universities, this ensures that all 12,000 institutions are recognised by major national educational bodies. This directory gives critical contact information for higher education institutions (not just universities), as well as giving basic structures for each.

World Agricultural Economics and Rural Sociology Abstracts Walter de Gruyter

Two remarkable tales woven together - the story of the Kaokoveld, an arid eden in the remote north-west of Namibia, so nearly lost, but regained to become one of Africa's iconic wildlife tourism destinations, and also the story of a young man's search

for an African way to do conservation in Africa. Garth Owen-Smith first visited the Kaokoveld in 1967. It was a life-changing experience. His unconventional ideas challenged both the conservation establishment and the former South African regime. Despite this, community-based conservation was pioneered in the Kaokoveld and today Namibia is a world leader in this field. But the early years - when the foundation for this ground-breaking approach to conservation was laid - are largely forgotten and untold. *An Arid Eden: A Personal Account of Conservation in the Kaokoveld* brings those years alive through the eyes of Owen-Smith, spanning four-and-a-half decades of extraordinary dedication, passion and achievement. The author and his partner Dr Margaret Jacobsohn have won some of the world's most prestigious conservation awards for their work in Namibia, which has always challenged conventional wisdom. The NGO they founded continues to break conservation, agricultural

and rural development paradigms.
