SONNY JOHNS

Lamprophyres Routledge

Shortlisted for the 2008 Katharine Briggs Award. For centuries the witch has been a powerful figure in the European imagination; but the creation of this figure has been hidden from our view. Charles Zika's groundbreaking study investigates how the visual image of the witch was created in late fifteenth- and sixteenth-century Europe. He charts the development of the witch as a new visual subject, showing how the traditional imagery of magic and sorcery of medieval Europe was transformed into the sensationalist depictions of witches in the pamphlets and prints of the sixteenth century. This book shows how artists and printers across the period developed key visual codes for witchcraft, such as the cauldron and the riding of animals. It demonstrates how influential these were in creating a new iconography for representing witchcraft incorporating themes such as the power of female sexuality, male fantasy, moral reform, divine providence and punishment, the superstitions of non-Christian peoples and the cannibalism of the new world. Lavishly illustrated and encompassing in its approach, *The Appearance of Witchcraft* is the first systematic study of the visual representation of witchcraft in the later fifteenth and sixteenth centuries. It will give the reader a unique insight into how the image of the witch evolved in the early modern world.

Nanomaterials in Chromatography CIMA Publishing

Let somebody else save the world. Christian Black is just trying to stay out of jail. Garbage man, exterminator, murderer? Yeah, maybe, but hey, everybody's got to pay the rent, right? It's been 20 years since the Brisbane strain left most of the world too debilitated to tie their own shoes. It wasn't exactly the apocalypse everybody hoped for. Most of the unpleasant responsibilities of being an adult kind of got worse. But with every change comes opportunity, and Christian Black found his opportunity in exterminating debilitated people who just couldn't manage to keep themselves from doing violent things. He got to work outdoors. He got to be his own boss. The government paid a bounty on each head. It was a good gig. At least it was until he accidentally killed a few dozen of the wrong people. Oops. Societies, even when they change, take a dim view of murder. And now Christian Black might have to kill a few more if he wants to stay out of jail. Download today and start an adventure you won't be able to put down.

Export Concessions Routledge

Chikungunya and Zika Viruses: Global Emerging Health Threats is the go-to resource for both historical and current information on this important virus that is rapidly increasing its global range. Epidemics since 2005 have spread from Africa and Asia, and through Europe, and an ongoing epidemic has caused nearly two million cases in the Americas. It causes severe crippling arthritis, with symptoms lasting for months or years. As no vaccine or treatment is available, there is international interest in the virus, thus funding opportunities for research have dramatically increased. This book presents our understanding of the virus, bringing comprehensive knowledge in a single source.

Health and Environment in Aquaculture Harper Collins

This comprehensive, well-received and thoroughly updated text, now in its Third Edition, continues to provide an in-depth analysis of the basic concepts of Auditing emphasising the practical aspects of the course. The book discusses in detail, classification and preparation of an audit, internal control system, internal audit, vouching of cash, trading and impersonal ledgers in addition to other topics. Besides, it deals with verification and valuation of assets and liabilities, company audit, cost audit, management audit, tax audit, bank audit as well as depreciation. The final chapters of the book give detailed description of business investigations, audit of special entities and auditing in EDP environment. Contemporary topics have been covered in the book to enlighten readers with the latest developments in the field of auditing, such as cost audit, tax audit, environmental audit and energy audit. The book is intended to serve as an indispensable text for undergraduate students of commerce as well as for CA and ICWA aspirants. New to this Edition • The Companies Act, 2013 (based on new company law). • Internal Audit chapter especially updated in the light of Section 138 of the Companies Act, 2013 and Rule 13 of the Companies (Accounts) Rules, 2014 notified by MCA. • Cost Audit chapter based on the latest Companies (Cost Records and Audit) Rules, 2014, issued by MCA.

The King, McQueen and the Love Machine John Wiley & Sons
This book presents recent research on ancient Silk Road wall

paintings, providing an up-to-date analysis of their coloring materials and techniques, and of developments in efforts to preserve them. The destruction of the Bamiyan Buddhas in 2001 encouraged international collaboration between conservation research institutes to study and protect the Silk Road's painted heritage. The collaborations led to exciting new discoveries of the rich materials used in wall painting, including diverse pigments and colorants, and various types of organic binding media. In addition, comparative research across the region revealed shared painting practices that indicate the sophisticated exchange of technologies and ideas. In parallel with these advances in technical understanding, greater awareness and sensitivity has been fostered in endeavors to preserve this fragile heritage. The book offers insights obtained from conservation projects and ongoing research, that encompass the geographical regions and periods related to the Silk Road, including from Japan, China, Korea, India and Afghanistan, and countries of the Eastern Mediterranean region. It also discusses the current issues and future challenges in the field. Featuring concise chapters, the book is a valuable resource for students and professionals in the field of cultural heritage preservation, as well as those who are not familiar with the fascinating topic of Silk Road wall painting research.

Advances in Marine and Brackishwater Aquaculture Springer Science & Business Media

Contains 55 pictures! From 1970 to 1972, Barbara Leigh and Elvis Presley embarked on a torrid love affair from the moment they locked eyes. At the time, Leigh was a world-class model and actress whose looks and beauty embodied the naturalistic seventies and captured the Kings heart at the same time. Add to this mix an affair with the worlds number one box-office attraction, Steve McQueen, and president of MGM studios and the inspiration for Jacqueline Susans *The Love Machine*, Jim The Smiling Cobra Aubrey, and you have the decades steamiest love triangle. Leigh herself has a legion of fans in Hollywood and abroad. She is legendary among Presley fans and, over the years, has developed a cult following as she was the original Vampirella, a comic book character created by Forrest J. Ackerman. One of six children, Leigh was born Barbara Ann Kish on November 16, 1946, in Ringgold, Georgia. She was raised in a Miami orphanage since her mother could not afford to raise all six children alone. Married at 14 to her sisters ex-boyfriend, and a mother at 17, she moved to Los Angeles and found work as a doctors assistant. Divorced soon after, Leigh was encouraged by a boyfriend to pose for photos, which led to a successful and glamorous modeling career. That soon led to more than 50 national TV commercials and a burgeoning movie career that boasted 10 films, including the cult classic *The Student Nurses*, Sam Peckinpahs gentle *Junior Bonner* and Roger Vadims *Pretty Maids All In a Row*. By the time she turned 21, Barbara Leigh had already lived several lifetimes worth of experiences. Barbara Leigh resides in Los Angeles, California, but spends a good amount of her time traveling around the country, where she frequently appears as a guest at collectors conventions. Leigh currently is working with Marilyn Grabowski, the west coast editor for *Playboy* for the last 40 years. In her private time, Ms. Leigh is actively involved with Animal Rescue, a passion she takes very seriously. To reach Barbara Leigh, go to www.barbaraleigh.com. Writer Marshall Terrill resides in Mesa, Arizona, and is the author of five books, including the best-selling biography, *Steve McQueen: Portrait Of An American Rebel* (Donald I. Fine, 1993) Terrill is currently a reporter for *Tribune Newspapers* as well as a writing teacher at Mesa and Glendale Community Colleges in Phoenix, Arizona.

AUDITING Springer

In late medieval and early modern Europe, textual and visual records of disaster and mass death allow us to encounter the intense emotions generated through the religious, providential and apocalyptic frameworks that provided these events with meaning. This collection brings together historians, art historians, and literary specialists in a cross-disciplinary collection shaped by new developments in the history of emotions. It offers a rich range of analytical frameworks and case studies, from the emotional language of divine providence to individual and communal experiences of disaster. Geographically wide-ranging, the collection also analyses many different sorts of media: from letters and diaries to broadsheets and paintings. Through these and other historical records, the contributors examine how communities and individuals experienced, responded to, recorded and managed the emotional dynamics and trauma created by dramatic events like massacres, floods, fires, earthquakes and plagues.

Alienated in a world where he doesn't fit in, Christian Black

survives because he's different. Then the virus came, and made the world turn different, too. Now people are dying by the million. Food supplies are short. Riots are blazing through the streets, and Christian's only goal is to keep his family alive. But safety lies far from the city, and just getting out will be more difficult than anyone knows.

Brain and Art Independently Published

This book compiles the latest findings in the field of marine and brackishwater aquaculture. It covers significant topics such as techniques of culture of live feeds (microalgae, rotifer, Artemia, marine copepod & polychaetes), while also highlighting vital themes like the culture and applications of free and marine sponge associated microbial probiotics, controlled breeding, seed production and culture of commercially important fin and shell fishes. Moreover, the book focuses on the breeding and culture of marine ornamental fishes, sea cucumber and sea urchin and discusses seaweeds culture, aqua feed formulation and nutrition, water quality management in hatchery and grow-out culture systems, fish disease diagnosis and health management and cryopreservation of fish gametes for sustainable aquaculture practices, all from a multidimensional perspective. The global fish production was 154 million tonnes in 2011 which more or less consisted of capture and culture fisheries (FAO, 2012). Roughly 80% of this is from inland-freshwater aquaculture and the remainder from capture fisheries in the marine and brackishwater sector. However, marine and brackishwater catches have recently begun to diminish due to overexploitation, climate change and pollution. The UNEP report affirmed that if the world remains on its current course of overfishing, by 2050, the ocean fish stock could become extinct or no longer commercially viable to exploit. In these circumstances, aquaculture is considered to be a promising sector to fulfill our future protein requirement. However, brackishwater and marine fish production now face serious challenges due to e.g. lack of quality fish seeds, feeds, poor water quality management and diseases. Fisheries and aquaculture sectors play a vital role as potential sources of nutritional security and food safety around the globe. Fish food is rich in protein, vitamins, phosphorous, calcium, zinc, selenium etc. In addition, fish contains omega-3 fatty acids, which help to prevent cardiovascular diseases. Fish food can also provide several health benefits to consumers. The omega 3 fatty acids found in fish can reduce the levels of LDL cholesterol (the "bad" cholesterol) and increase the HDL levels (the "good" cholesterol). Research conducted in Australia has proved that fish consumption can be used to cure hypertension and obesity. It is also reported that people who ate more fish were less prone to asthma and were able to breathe more easily. Omega 3 fish oil or fish consumption can help to prevent three of the most common forms of cancer: breast cancer, colon and prostate cancer. The omega 3 fatty acids present in fish or fish oil induce faster hair growth and prevent hair loss. Since most varieties of fish are rich in protein, eating fish helps to keep hair healthy. Furthermore, fish or fish oil helps in improving the condition of dry skin, giving it a healthy glow. It is useful in treating various skin problems such as eczema, psoriasis, itching, redness of skin, skin lesions and rashes. It is well known that eating fish improves vision and prevents Alzheimer's and type-2 diabetes, and can combat arthritis. Further, fish oil or fish is good for pregnant women, as the DHA present in it helps in the development of the baby's eyes and brain. It helps to avoid premature births, low birth weights and miscarriages. In addition, it is widely known that fish can be a good substitute for pulses in cereal-based diets for the poor. The global fish production was roughly 154 million tonnes in 2011 (FAO, 2012). It is estimated that by 2020 global fish requirements will be over 200 million tonnes; as such, innovative technological improvements are called for in order to improve the production and productivity in fisheries. In this context, this book provides valuable information for academics, scientists, researchers, government officials and farmers on innovative technological advances for sustainable fish production using aquaculture methods. The book identifies the main issues and trends in marine and brackishwater aquaculture from a global perspective in general and in the Indian context in particular. It includes 23 chapters written by prominent researchers from various institutes and universities across India, who address the latest aquaculture technologies with distinctive approaches to support academics, researchers and graduates in the fields of Fisheries, Aquaculture, Marine Science, Marine Biology, Marine Biotechnology, Zoology and Agricultural Sciences. Our thanks go to our contributors; we are confident that all readers will immensely benefit from their valued expertise in the field of marine and brackishwater aquaculture.

Essential Neonatal Medicine Baker Books

Aquaculture has been expanding in a fast rate, and further development should rely on the assimilation of scientific knowledge of diverse areas such as molecular and cellular biology, and ecology. Understanding the relation between farmed species and their pathogens and parasites, and this relation to environment is a great challenge. Scientific community is involved in building a model for aquaculture that does not harm ecosystems and provides a reliable source of healthy seafood. This book features contributions from renowned international authors, presenting high quality scientific chapters addressing key issues for effective health management of cultured aquatic animals. Available for open internet access, this book is an effort to reach the broadest diffusion of knowledge useful for both academic and productive sector.

[Hemp Diseases and Pests](#) Springer

This work is written during his resting periods at Lake Ochrid (1921) in poetic-prose style, similar in spirituality to the Psalms of David. Can those who are themselves homeless really build the temple for the Teacher of all builders? (...) When you build the best for Him, you are setting an example for your soul, showing her what she should be building within herself (...) You build Him expensive edifices, in order to remind your soul that she was intended for, a royal palace, and not for hovels of clay (...) But what will become of your temples (...) If the domes of your temples are forever higher than your souls? (...) If the width of your temples is forever wider than the narrowness of your souls? (...) If your altars are forever shining more brightly than the shrines of your souls? (...) They will become the dead monuments of dead souls. Meet one of the greatest Orthodox bishops of the 20th century, an theological writer and a highly gifted orator, known as "The New Chrysostom." Saint Nikolai Velimirovich of Ohrid and Zhicha (1880 - 1956) was bishop in the Serbian Orthodox Church and the author of many Orthodox books.

Weaving: Structure and Substance looks at weave design from several different perspectives, showing how resources, ideas and practical experience can come together in a creative process of designing through making. Emphasizing the potential of woven textiles throughout, Ann Richards follows the success of her sister title Weaving Textiles that Shape Themselves and explores the tactile properties that emerge from the interaction of material and structure. The book is organized into four parts that look at the natural world as inspiration, the design resources of material and weave structure, the fabric qualities as starting points for design, and the practical issues of designing through making. With over 280 lavish photos, this book will be an invaluable resource for textile designers and enthusiasts looking for inspiration and practical advice.

[Dysphagia Management in Head and Neck Cancers](#) Springer Nature

What is the difference between a wink and a blink? The answer is important not only to philosophers of mind, for significant moral and legal consequences rest on the distinction between voluntary and involuntary behavior. However, "action theory"—the branch of philosophy that has traditionally articulated the boundaries between action and non-action, and between voluntary and involuntary behavior—has been unable to account for the difference. Alicia Juarrero argues that a mistaken, 350-year-old model of cause and explanation—one that takes all causes to be of the push-pull, efficient cause sort, and all explanation to be prooflike—underlies contemporary theories of action. Juarrero then proposes a new framework for conceptualizing causes based on complex adaptive systems. Thinking of causes as dynamical constraints makes bottom-up and top-down causal relations, including those involving intentional causes, suddenly tractable. A different logic for explaining actions—as historical narrative, not inference—follows if one adopts this novel approach to long-standing questions of action and responsibility.

Nanomaterials in Chromatography: Current Trends in Chromatographic Research Technology and Techniques provides

recent advancements in the wide variety of chromatographic techniques applied to nanotechnology. As nanomaterials' unique properties can improve detection sensitivity and miniaturize the devices used in analytical procedures, they can substantially affect the evaluation and analysis ability of scientists and researchers and foster exciting developments in separation science. The book includes chapters on such crucial topics as the use of nanomaterials in sample preparation and the legalization of nanomaterials, along with a section on reducing the cost of the analysis process, both in terms of chemicals and time consumption. Presents several techniques for nanomaterials in chromatography, including well-known materials like carbon nanomaterials and functionalized nanomaterials Includes suggested readings at the end of each chapter for those who need further information or specific details, from standard handbooks, to journal articles Covers not only applications of nanomaterials in chromatography, but also their environmental impact in terms of toxicity and economic effects

[Characterization of Metals and Alloys](#) MIT Press

Dysphagia and problems related to swallowing are common following treatment for head and neck cancers. Though there are books available on dysphagia management and associated neurological conditions, this is the only atlas that comprehensively discusses dysphagia related to the head and neck cancers. It comprises of 33 chapters divided into five sections. The initial chapters present the anatomy and physiology of swallowing and the pathophysiology of the dysphagia-related structures. It discusses assessment of dysphagia in detail, highlighting clinical and instrumental evaluations. Swallowing dysfunction related to common sub-site cancers and chemo-radiotherapy related dysphagia are explored individually. The book addresses direct and indirect swallowing therapy methods involving postures and exercises in a detailed yet simple manner to enable them to be incorporated in routine practice. It also covers topics like nutritional management, alternative feeding methods and unique problems associated with tracheostomy that have a great bearing on the day-to-day management of patients with dysphagia. The current status of the research and evidence-based management updates are also included. Additionally, where appropriate videos are included for a better understanding of the subject. Written and edited by experts in the field, the book is intended for clinicians treating head and neck cancer, head and neck surgeons, radiation oncologists, speech and swallowing therapy specialists and trainees in these fields

[Disaster, Death and the Emotions in the Shadow of the](#)

[Apocalypse, 1400-1700](#) CABI

This book tells the intriguing and often colorful stories of the medical words we use. The origins of clinical and scientific terms can be found in Greek and Latin myths, in places such as jungles of Uganda and the islands of the Aegean Sea, in the names of medicine's giants such as Hippocrates and Osler, and in some truly unlikely sources. In this book you will learn the answers to questions such as: • What disease was named for an American space flight? • Do you know the echoic word for elephantine rumbling of the bowels? • What drug name was determined by drawing chemists' notes out of a hat? • What are surfer's eye, clam digger's itch, and hide porter's disease? This book can give you new insights into the terms we use every day in the clinic, hospital, and laboratory. Knowing a word's history assists in understanding not only what it means, but also some of the connotative subtleties of terms used in diagnosis and treatment. The Amazing Language of Medicine is intended for the enrichment of physicians, other health professionals, students, and anyone involved in clinical care and medical science.

[Prayers by the Lake](#) Irwin Professional Publishing

This book emphasizes past and current research efforts about principles of natural control of major parasites affecting humans, animals, and crops. Each chapter is a complete and integrated subject that presents a problem and confers on the safe alternatives to chemicals. This book discusses and updates

information about three major topics of natural remedies. The first topic is represented in a chapter outlining important information on biological control of parasites, the second topic is represented in three chapters dealing with botanicals as promising antiparasitic agents, and the last four chapters deal with miscellaneous control strategies against parasites. This easily readable book is designed precisely for students as well as professors linked with the field of parasitic control. We enhanced words with breathing areas in the form of graphical abstracts, figures, photographs, and tables.

[Natural Remedies in the Fight Against Parasites](#) Springer

The role of women in positions of worship and church leadership is one of the most divisive and inconclusive biblical debates. Two Views on Women in Ministry furnishes you with a clear and thorough presentation of the two primary exegetical arguments so you can better understand each one's strengths, weaknesses, and complexities. Egalitarian - equal ministry opportunity for both genders (represented by Linda L. Belleville and Craig S. Keener) Complementarian - men and women fill distinctive ministry roles (represented by Craig L. Blomberg and Thomas R. Schreiner) This revised edition brings the exchange of ideas and perspectives into the traditional Counterpoints format. Each author states his or her case and is then critiqued by the other contributors. The fair-minded, interactive Counterpoints forum allows you to compare and contrast the two different positions and form your own opinion concerning the practical and often deeply personal subject of women in ministry. The Counterpoints series presents a comparison and critique of scholarly views on topics important to Christians that are both fair-minded and respectful of the biblical text. Each volume is a one-stop reference that allows readers to evaluate the different positions on a specific issue and form their own, educated opinion.

[Weaving](#) Springer Nature

...the rest shall follow Deep, an awkward young man obsessed with libraries and books, has his dream come true when he is sent to Hong Kong on an internship programme. Leaving behind jealous but encouraging friends, a supportive father and a hysterical, overprotective mother, Deep makes his first flight to a foreign land. And then he sees her, Ahana, a stunningly beautiful girl. But Deep also has to come to terms with another reality: Ahana is blind. Together they explore Hong Kong, Ahana guiding them with the smells and sounds of the wondrous city and Deep bringing to life for her the delightful sights he sees. They're living a dream, till Aweek, her gorgeeus ex-boyfriend, comes back into her life. Hold My Hand is a delightful young romance with a surprise ending.

Multi Linguis offers you a frequency-thematic learner's dictionary of the Croatian language. It includes up to 3000 essential words and phrases belonging to the levels from Beginner to Elementary (A1 - A2 CEFR). The entries are divided into 150 vocabulary themes as well as 2 learning steps. They are arranged by themes, not by the alphabet. The book is intended to help you try out and learn this language but can also be applied for translating or entertaining. You may use it separately or as an additional tool for any suited educational course. The Multi Linguis Project is based on the Wiktionary corpus and created by one person. The database of the Learner's Dictionaries includes 9 000 lemmas (words and phrases), their translations in many languages as well as transcriptions, transliterations and grammar information. All these lemmas are divided into 6 learning steps of 1500 entries each and also 150 vocabulary themes grouped in 30 super themes. They can be arranged by themes, steps, parts of speech or keywords, but never by the alphabet. Different types of dictionaries are offered for the same language. They are designed in an original way to be convenient and efficient. All of them are available in epub format. Multi Linguis is presently able to publish such books for more than 70 languages. It's planned to improve them and increase their number. You can find more dictionaries in this store.
