Nothing bad ever happens in Raymonds River, Nova Scotia. Its a safe, small town, where everybody knowsand trustseverybody else. When a pillar of the community is found dead in his own barnyard, people get a little concerned. When they find a bullet in his head, people get scared; who would shoot an old farmer on

his own land? Understandably, even quiet, small town folk are prone to hysteria now and again. Homicide Detective Sergeant Jim McDonald and Corporal Scott Bowen are called to the scene of the crime. Although they don't always work together, they make a great team when homicides the name of the game. The local law enforcement comes up with a likely suspect: a religious fanatic who claims he has God on his side. But there's no motive, which causes McDonald and Bowen to start asking questions. Their questions rile up the God-fearing suspect, and soon, he wants a deal. In exchange for what he knows regarding a so-called accidental hunting death in the area, a year prior, the suspect wants to go free. He claims there was nothing accidental about it. Is their religious fool playing the crazy card, or could he really know something that might just tear the safe, small town of Raymonds River apart?

This monograph examines the considerations involved in maintaining a peacekeeping force in the Golan Heights. The examination is based on the assumption that Israel and Syria have reached an agreement concerning the Golan Heights and that the United States is going to establish a peacekeeping force in the Golan Heights. The monograph first examines the historical background of the area since the 1967 War. Based on this examination and on lessons learned from previous UN and other multinational peacekeeping operations, the monograph addresses national composition of the force, command of the peacekeeping force, and force structure. Next, based on the military and political aspects of the region, the monograph addresses the future peacekeeping force commander's concerns

with military credibility, freedom of movement, and force protection. The study concludes with a summary evaluation of the necessary size and type of force for future peacekeeping in the Golan Heights. Based on the assumption and an analysis of the political and military considerations, future peacekeeping operations in the Golan Heights would require a MFO type force under the command and control of the United States. Due to the essential requirement for force protection due to the potential of pre-emption by either Israel or Syria and of terrorist attacks, a heavy brigade would be the most effective force in maintaining the peace while protecting the force.

Complementarity in the Line of Fire Text Publishing

It is almost unprecedented for a head of state to publish a memoir while still in office. But Pervez Musharraf is no ordinary head of state. As President of Pakistan since 1999, his is one of the most dangerous jobs in the world, and he continues to play a crucial role in the global war on terror. A one-time supporter of the Taliban, a general who fought in several wars, President Musharraf took a decisive turn against militant Islam in 2001. Since then he has survived two assassination attempts; rooted out militants in his own government; helped direct countless raids against al-Qaeda both in his cities and in the mountains; and tracked Osama bin Laden with technical and human intelligence.

IN THE LINE OF FIRE is astonishingly revealing and honest about dozens of topics of intense interest to the world. Among its many revelations: exactly how Pakistani authorities tracked down and smashed three major al-Qaeda control centres in the mountains; how al-Qaeda's many-layered structure was revealed after the assassination attempts; Bin Laden's current position within the al-Qaeda hierarchy; what it has been like to deal with Bush and Blair; how Pakistan and India have avoided nuclear confrontation; and much more. The terrible earthquake of 2005, killing nearly 40,000 Pakistanis, is just one chapter in a life and career that has been filled with danger and drama. The worldwide launch of President Musharraf's memoir promises to be a sensation.

According to Time magazine, Pakistan's President Pervez Musharraf holds "the world's most dangerous job." He has twice come within inches of assassination. His forces have caught more than 670 members of al Qaeda in the mountains and cities, yet many others remain at large and active, including Osama bin Laden and Ayman Al Zawahiri. Long locked in a deadly embrace with its nuclear neighbor India, Pakistan has come close to full-scale war on two occasions since it first exploded a nuclear bomb in 1998. As President Musharraf struggles for the security and political future of his nation, the stakes could not be higher for the world at large. It is unprecedented for a sitting head of state to write a memoir as revelatory, detailed, and gripping as In the Line of Fire. Here, for the first time, readers can get a firsthand view of the war on terror in its central theater. President Musharraf details the manhunts for Osama and Zawahiri and their

top lieutenants, complete with harrowing cat-and-mouse games, informants, interceptions, and bloody firefights. He tells the stories of the near-miss assassination attempts, not only against himself but against Shaukat Aziz (later elected prime minister) and one of his top army officers (later the vice chief of army staff), and of the abduction and beheading of Daniel Pearl -- as well as the forensic and shoe-leather investigations that uncovered the perpetrators. He details the army's mountain operations that have swept several valleys clean, and he talks about the areas of North Waziristan where al Qaeda is still operating. Yet the war on terror is just one of the many headline-making subjects in In the Line of Fire. The full story of the events that brought President Musharraf to power in 1999 is told for the first time. He reveals new details of the 1999 confrontation with India in Kashmir (the Kargil conflict) and offers a proposal for resolving the Kashmir dispute. He offers a portrait of Mullah Omar, with stories of Pakistan's attempts to negotiate with him. Concerning A. Q. Khan and his proliferation network, he explains what the government knew and when it knew it, and he reveals fascinating details of Khan's operations and the investigations into them. In addition, President Musharraf takes many stances that will make news. He calls for the Muslim world to recognize Israel once a viable Palestinian state is created. He urges the repeal of Pakistan's 1979 Hudood law. He calls for the emancipation of women and for their full political equality with men. He tells the sad story of Pakistan's experience with democracy and what he has done to make it workable.

Human Shields Harlequin

From Syrian civilians locked in iron cages to veterans joining peaceful indigenous water protectors at the Standing Rock Sioux Reservation, from Sri Lanka to Iraq and from Yemen to the United States, human beings have been used as shields for protection, coercion, or deterrence. Over the past decade, human shields have also appeared with increasing frequency in antinuclear struggles, civil and environmental protests, and even computer games. The phenomenon, however, is by no means a new one. Describing the use of human shields in key historical and contemporary moments across the globe, Neve Gordon and Nicola Perugini demonstrate how the increasing weaponization of human beings has made the position of civilians trapped in theaters of violence more precarious and their lives more expendable. They show how the law facilitates the use of lethal violence against vulnerable people while portraying it as humane, but they also reveal how people can and do use their own vulnerability to resist violence and denounce forms of dehumanization. Ultimately, *Human Shields* unsettles our common ethical assumptions about violence and the law and urges us to imagine entirely new forms of humane politics.

From Syrian civilians locked in iron cages to veterans joining peaceful indigenous water protectors at the Standing Rock Sioux Reservation, from Sri Lanka to Iraq and from Yemen to the United

States, human beings have been used as shields for protection, coercion, or deterrence. Over the past decade, human shields have also appeared with increasing frequency in noncombat contexts such as antinuclear struggles, civil and environmental protests, and even computer games. The phenomenon, however, is by no means a new one. In *Human Shields*, Neve Gordon and Nicola Perugini describe how human shields have been used in key historical and contemporary moments and across geographical sites. The practice of human shielding corresponds with the history of shifting understandings of what is valued as "human": in the American Civil War and the Franco-German War, only the elite were used as shields, while in later conflicts, hundreds of thousands of women and children and people of color were placed in the crossfire as deterrents. *Human Shields* demonstrates how this increasing weaponization of human beings has made the position of civilians trapped in theaters of violence more precarious and their lives more expendable.

On the Border and in the Line of Fire Simon and Schuster Winner, 1988 Barbara Ramsden Award Winner, 1989 NBC Qantas New Writers Award Winner, 1994 ACT Literary Award When Wolfi, a brilliant young philosophy student, begins recounting his life - from his inquisitorial father and passionate mother, to his eccentric grandmother who paid for his sexual initiation with the beautiful Andrea - we are lured into a mysterious and erotic maze. But what in fact is fact, and what in fiction is fiction? Brilliantly seductive, *Out of the Line of Fire* was the literary sensation of the year when it was first published, in 1988. Mark Henshaw has lived in France, Germany, Yugoslavia and the USA. He currently lives in Canberra. His first novel, *Out of the Line of*

Fire (1988), won the FAW Barbara Ramsden Award and the NBC New Writers Award. It was one of the biggest selling Australian literary novels of the decade and has been re-released as a Text Classic. *The Snow Kimono* won the 2014 NSW Premier's Award for Fiction and Mark Henshaw was the 2015 winner of the Copyright Agency's Author Fellowship. 'A dazzling debut. A tour de force. This book is imaginative, virtuosic, and awesomely assured. It is compulsive reading.' Don Anderson 'Experimental, extraordinary...*Out of the Line of Fire*, published in 1988, remains one of my favourite Australian novels.' Stephen Romei, Australian 'An Australian writer heads to Germany, where he gets strong doses of philosophy, violence, taboo sex, and unreliable narration...The novel feels like an id laid bare, and Henshaw keeps the story in line while constantly pointing out the limitations of words to capture reality. A remarkable and brainy work of metafiction.' STARRED Review, Kirkus 'A clever and playful text, offering both a decent story that includes quite a few sordid episodes and behaviour as well as lofty (but accessible) literary and philosophical speculation, and more than a few mysteries...It's an interesting take on the literary-philosophical novel, with a deceptively light writing touch that differentiates it from most continental novels playing with similar tricks. The scenes, the asides, and the speculation are, both separately and together, good (if sometimes somewhat creepy) fun, and *Out of the Line of Fire* is a smart and smartly twisted novel.' "As usual, the medic, Wiatr, hid himself, the doctor had a panic attack and I decided do go by myself to the next trench in spite of the hellish artillery and canon fire. In the trench was Corporal Gorgel, who helped the officer. The scene on the front line was terrible. Blood, pieces of flesh, heads, arms, legs and intestines all around -an awful sight." Almost 100 years have passed since the end of World War I, also known as "the Great War". At the time, it was the largest war to date. Over 16.5 million people were killed in the war; more than 6 million among them were civilians. During the Great War, a soldier in the Austro-Hungarian Army fought at the frontline trenches and wrote daily in his diary, documenting his experiences there. This man, Teofil Reiss, was an Austro-Hungarian patriot, a professional soldier, a charming ladies' man, and a proud Jew. His practical perspective, trustworthy innocence and open heartedness, merge the details of this diary into a fascinating human document - a rare testimony of a frontline soldier and a picture of an honest man in a senseless war (though, not senseless to him). Almost 100 years after the war, his grandson Tuvia (who was named after him) made the decision to translate and publish his handwritten German diary, adding photos and letters, as well as an epilogue that tells the remarkable story of Teofil Reiss's life during the

Nazis' rise to power, and until his death in 1942.

In 2004, Erin Solaro went to Iraq to study American servicewomen — what they were doing, how well they were doing it, how they were faring in combat. In 2005, she went to Afghanistan on the same mission. Having spent time embedded with combat troops and conducting stateside interviews with numerous analysts and veterans, Solaro is convinced that the time to drop all remaining restrictions on women's full equality under arms is now. The Army, the country, the women of America — and of the world — need it. *Women in the Line of Fire* details why this will not be an easy task. Although 15 percent of the military is female, the Army and Marines still resist

acknowledging what is, in fact, already happening — women are fighting, and fighting well. For the Religious Right and the cultural conservatives, women in combat is a hot-button issue in their campaign to “take back the culture.” But for the young men and women on the lines, brought up in an America where equality between the sexes was never second guessed and where making up the rules as you go along comes with the territory, it's the new reality.

This study investigates issues relative to assessing and addressing risks to officer safety. The study was conducted over a 3-year period and addressed 40 distinct cases of serious assaults on law enforcement officers. The cases involved 52

victim officers and 42 offenders. Routine, repetitive tasks emerged as a continuing threat to officer safety. Traffic stops, searches, and use of handcuffs are examples of tasks that should be second nature to officers but presented problems to the victims in the cases studied. Officers cited training as critical to the actions they took to protect themselves. Post-assault trauma and recovery proved to be areas that perhaps have not received appropriate attention from the law enforcement community. Many of the victim officers in the study displayed an uncommon "will to survive," an attitude many officers attributed to their survival training. This article reports extensive information on the victims, offenders, and incidents studied, and identifies specific areas where law enforcement training and procedures may be improved. Figures, tables, appendixes, references.
