From the #1 bestselling author of the beloved Calendar Girl books comes the first in a witty, wise and emotionally compelling new series, where coming home is just the beginning... "Fly free." For ten years those words, written on pink parchment paper in her mother's beautiful handwriting, have been Suda Kaye Ross's guiding star. Every year on her birthday, Suda Kaye opens another of the letters her mother penned before she passed, heeding the advice inside as she fills her life with experiences. From Italy to Australia, from Rio to Russia, she's slaked her wanderlust. And then, on her twenty-eighth birthday, she opens the letter that sends her home. Returning to Colorado means confronting everything—and everyone—she left behind, including her cherished sister, Evie, and her first love, Camden Bryant. Suda Kaye and Cam spent four years and one unforgettable night together. Given the way she ran out on him, it's no surprise that he's wary, resentful...and engaged to someone else. Evie, hardworking and überresponsible, just wants her sister to put down roots at last. For Evie's sake, and her own, Suda Kaye is trying to build a new life, all the while wondering whether it's too late to come back home—or if the most important part of her never really left. Don't miss *On the Sweet Side*, the next book in Audrey Carlan's *The Wish* series! With the emotional pull of Susan Wiggs' and Robyn Carr's engaging family dramas, *On the Sweet Side* is a sassy and emotional strangers-to-sisters story about the

enduring power of family—both the one you're born with and the one you choose.

The first novel in this darkly sexy contemporary series from bestselling author Monica Murphy kicks off an emotionally powerful two-part tale of forbidden love. Crazy how eight years can disappear in an instant. One look at Katie Watts, and I'm a fifteen-year-old again—the one who risked everything to save a terrified girl from her twisted kidnapper. She's grown-up now—beautiful, quiet, composed—and telling her story to the world. A story that involves me in more ways than you can imagine. She used to call me her guardian angel. Sure, I risked my life, but she was worth dying for. I need to make contact with her. Just to ensure that she's safe. Somehow we reconnect. We become friends . . . but I want more. I want to make her mine. And she wants me too. Does she know who I am? Has she figured me out? Not yet. But she will. In the meantime, I need to make sure that whatever hold that animal had on her is gone. So, yeah, I'm stealing these moments with her. Savoring them. Knowing, dreading, that she'll soon find out who I really am. And everything will fall apart. All because of that twisted, perverted monster sitting on death row. Her kidnapper. A convicted serial killer. My father. Praise for *Never Tear Us Apart* "All the best parts of romance and betrayal . . . I couldn't turn the pages fast enough."—New York Times bestselling author Jay Crownover "A powerful story that left me raw yet hopeful."—USA Today bestselling author K. A. Tucker "A powerful story of friendship, trauma, coping and betrayal. The characters jump off the page into real life and will have readers gasping and feeling every emotion that they go through. Another amazing book to add to Murphy's already stellar library!"—RT Book Reviews (4 1/2 stars)

Today we are blessed with two extraordinarily successful theories of physics. The first is Albert Einstein's general theory of relativity, which describes the large-scale behaviour of matter in a curved

spacetime. This theory is the basis for the standard model of big bang cosmology. The discovery of gravitational waves at the LIGO observatory in the US (and then Virgo, in Italy) is only the most recent of this theory's many triumphs. The second is quantum mechanics. This theory describes the properties and behaviour of matter and radiation at their smallest scales. It is the basis for the standard model of particle physics, which builds up all the visible constituents of the universe out of collections of quarks, electrons and force-carrying particles such as photons. The discovery of the Higgs boson at CERN in Geneva is only the most recent of this theory's many triumphs. But, while they are both highly successful, these two structures leave a lot of important questions unanswered. They are also based on two different interpretations of space and time, and are therefore fundamentally incompatible. We have two descriptions but, as far as we know, we've only ever had one universe. What we need is a quantum theory of gravity. Approaches to formulating such a theory have primarily followed two paths. One leads to String Theory, which has for long been fashionable, and about which much has been written. But String Theory has become mired in problems. In this book, Jim Baggott describes "": an approach which takes relativity as its starting point, and leads to a structure called Loop Quantum Gravity. Baggott tells the story through the careers and pioneering work of two of the theory's most prominent contributors, Lee Smolin and Carlo Rovelli. Combining clear discussions of both quantum theory and general relativity, this book offers one of the first efforts to explain the new quantum theory of space and time.

Grandpa, how big is the universe? How far are the stars? How can we tell the sun's age? Are we stardust? What is thunder? Is the universe expanding? Do black holes exist? What is the future of the universe? "The book was born from conversations I had with one of my granddaughters, on certain summer evenings. All during its writing, I was able to relive those August evenings when the children showered me with questions while we awaited the shooting stars. The contemplation of the heavenly vault and the sense of our presence among the stars inspired a shared wish to know more about this mysterious cosmos in which we live. Here we will be talking about science, but that in no way rules out poetry." Hubert Reeves In this book, master astrophysicist Hubert Reeves unlocks the secrets of the universe. This is his spiritual testament to younger generations and a perfect occasion for us all to revise our conceptions about the cosmos.

A Bird in the House is a series of eight interconnected short stories narrated by Vanessa MacLeod as she matures from a child at age ten into a young woman at age twenty. Wise for her years, Vanessa reveals much about the adult world in which she lives. "Vanessa rebels against the dominance of age; she watches [her grandfather] imitate her aunt Edna; and her rage at times is such that she would gladly kick him. It takes great skill to keep this story within the expanding horizon of this young girl and yet make it so revealing of the adult world."—Atlantic "A Bird in the House achieves the breadth of scope which we usually associate with the novel (and thereby is as psychologically valid as a good novel), and at the same time uses the techniques of the short story form to reveal the different aspects of the young Vanessa." —Kent Thompson, *The Fiddlehead* "I am haunted by the women in Laurence's novels as if they really were alive—and not as women I've known, but as women I've been."—Joan Larkin, *Ms. Magazine* "Not since . . . *To Kill a Mockingbird* has there been a novel like this. It should not be missed by anyone who has a child or was a child."—Pittsburgh Post-Gazette One of Canada's most accomplished writers, Margaret Laurence (1926-87) was the recipient of many awards including Canada's prestigious Governor General's Literary Award on two separate occasions, once for *The Diviners*.

Alexander the Great of Macedon was no stranger to controversy in his own time. Conqueror of the Greek states, of Egypt and of the Persian Empire as well as many of the principalities of the Indus Valley, he nevertheless became revered as well as vilified. Was he a simply a destroyer of the ancient civilizations and religions of these regions, or was he a hero of the Persian dynasties and of Islam? The conflicting views that were taken of him in the Middle East in his own time and the centuries that followed are still reflected in the tensions that exist between east and west today. The story of Alexander became the subject of legend in the medieval west, but was perhaps even more pervasive in the east. The Alexander Romance was translated into Syriac in the sixth century and may have become current in Persia as early as the third century AD. From these beginnings it reached into the Persian national epic, the Shahnameh, into Jewish traditions, and into the Quran and subsequent Arab romance. The papers in this volume all have the aim of deepening our understanding of this complex development. If we can understand better why Alexander is such an important figure in both east and west, we shall be a little closer to understanding what unites two often antipathetic worlds. This volume collects the papers delivered at the conference of the same title held at the University of Exeter from July 26-29 2010. More than half the papers were by invited speakers and were designed to provide a systematic view of the subject; the remainder were selected for their ability to carry research forward in an integrated way.

For most, the Black Death is the end. For a brave few, it heralds a new beginning. Widowed by her husband's death from the pestilence, Lady Anne assumes control of his people's future—200 bonded serfs without rights of ownership to land. Strong, compassionate and resourceful—qualities she kept hidden from the husband she loathed and despised—Lady Anne chooses a bastard slave, Thaddeus Thurkell, to act as her steward. Together, they decide to quarantine Develish by bringing the serfs inside a defensible moat and sharing the available food amongst all. With this sudden overturning of the accepted social order, where serfs exist only to serve their lords, conflict arises when they're given a voice. Ignorant of what is happening in the world outside, they wrestle with themselves, with God and the terrible uncertainty of their futures. They fear starvation when their food runs out but they fear the pestilence more. Who amongst them has the courage to leave the safety of the demesne in search of supplies and news? And how safe is anyone in Develish when an unexplained murder threatens the uneasy status quo? In *The Last Hours* Minette Walters brings all her trademark intelligence to a

totally new timeframe—creating a vivid and powerful drama through compelling characters whose journey readers will be drawn to. *The Last Hours* is an exciting new direction from an established best-selling author and Minette is currently writing the sequel.

A visceral space thriller—perfect for fans of *Arrival* and *The Martian*—following the sole survivor of a catastrophic accident in space that leaves her drifting in the void with only the voice of her estranged husband, a NASA scientist, to guide her back to Earth. Commander Maryam “May” Knox awakes from a medically induced coma alone, adrift in space on a rapidly failing ship, with little to no memory of who she is or why she’s there. Slowly, she pieces together that she’s the captain of the ship, *Hawking II*; that she was bound for Europa—one of Jupiter’s moons—on a research mission; and that she’s the only survivor of either an accident—or worse, a deliberate massacre—that has decimated her entire crew. With resources running low, and her physical strength severely compromised, May must rely on someone back home to help her. The problem is: everyone thinks she’s dead. Back on Earth, it’s been weeks since *Hawking II* has communicated with

NASA, and Dr. Stephen Knox is on bereavement leave to deal with the apparent death of his estranged wife, whose decision to participate in the Europa mission strained their marriage past the point of no return. But when he gets word that NASA has received a transmission from May, Stephen comes rushing to her aid. What he doesn’t know is that not everyone wants May to make it back alive. Even more terrifying: she might not be alone on that ship. Featuring a twisting and suspenseful plot and compelling characters, *Across the Void* is a moving and evocative thriller that you won’t be able to put down.

L'Amiral, Fernando, Toby, votre serviteur et un petit nouveau, "La Bévotte" accompagné de ses trois coqs. Les voici embarqués – au sens propre – dans une histoire de mer et de glace tout aussi barrée. Mal barrée – toujours au sens propre – serait d'ailleurs plus juste... Extrait : " La corne de brume de la Marie-Rose avait émis un cri étranglé, un peu comme un klaxon de vieux tacot, puis s'était prostrée dans le plus grand silence. – Avec ce brouillard, faudrait pas qu'on aille se faire couper en deux par un chalutier, avait dit l'Amiral. Faites du bruit ! La Bévotte alla se poster à l'avant du bateau avec ses tam-tams, Fernando à l'arrière avec deux couvercles de faitout en guise de cymbales. Toby s'empressa de se joindre au concert, coursant les coqs sur le pont en aboyant, lesquels protestèrent par des claquements d'ailes et des cris ulcérés. De son côté, Gérard, dès qu'il sentait un peu de mou dans l'orchestre, entamait *La Paimpolaise* à pleins poumons... La nuit était tombée depuis longtemps quand le brouillard commença à se dissiper. Gérard prit le premier quart : – Tu me remplaces à quatre heures, dit-il au Portos. Au petit matin, La Bévotte et moi buvions tranquillement le café, quand Fernando passa sa tête dans le carré en nous demandant : – C'est normal que le soleil se lève à l'ouest ? "
