Early childhood care and education has become a subject of increasing public interest in a great number of countries and among several international organizations and foundations. This book focuses on key issues in early childhood care and education, adding pedagogical, historical, and sociological perspectives to a body of research in education that has neglected important questions to date. The studies presented focus on effects of early childhood care and education on children, on the importance of family background for child development, on the use of institutional services among different families, on

the history of such services in France and in the United States of America, and on the way in which children acquire competences both in early childhood care and education institutions and in a family context.

The discovered paradigmatic, historical characteristics of

scientific knowledge, and the role of rhetoric, interpretation and contextuality enabled us to use similar arguments in natural sciences too. In this way a new research field, the hermeneutics of science emerged based upon the works of Husserl, Merleau-Ponty, Heidegger and Gadamer. A dialogue between philosophers and scientists begins in this volume on hermeneutic approaches to physics, biology, ethology, mathematics and cognitive science. Scientific principles, methodologies, discourse, language, and metaphors are analyzed, as well as the role of the lay public and the legitimation of science. Different

hermeneutical-phenomenological approaches to perception, experiments, methods, discovery and justification and the genesis of science are presented.

Hermeneutics shed a new light on the incommensurability of paradigms, the possibility of translation and the historical understanding of science.

Representation in Western Music Getty Publications Water is a global resource for modern

societies - and water was a global resource for pre-modern societies. The many different water systems serving processes of urbanisation and urban life in ancient times and the Middle Ages have hardly been researched until now. The numerous contributions to this volume pose questions such as what the basic cultural significance of water was, the power of water, in the town and for the town, from different points of view. Symbolic, aesthetic, and cult aspects are taken up, as is the role of water in politics, society, and economy, in daily life, but also in processes of urban planning or in urban neighbourhoods. Not least, the dangers of polluted water or of

flooding presented a challenge to urban society. The contributions in this volume draw attention to the complex, manifold relations between water and human beings. This collection presents the results of an international conference in Kiel in 2018. It is directed towards both scholars in ancient and mediaeval studies and all those interested in the diversity of water systems in urban space in ancient and mediaeval times.

The authors trace the development of one of the most well-known directors of the New German Cinema that flourished in the 1970s and early 1980s.

Examining Wim Wenders' career from his early film school productions through his mature works of the 1970s, this book also analyses the most recent works, as well as the themes and preoccupations that unite his oeuvre. As the authors note, Wenders' works have been profoundly influenced by American films, especially the 'road movie' genre. His own work often features characters who are always on the move, in an attempt to capture a glimpse of their identity and place in the world. They also represent a generation of postwar Germans seeking to redeem themselves and the history of their country by turning to American popular culture, particularly its music

and movies.

Fresh out of college in the summer of 1961, Happy lands his first job as a graphic designer (okay, art assistant) at a small Connecticut advertising agency populated by a cast of endearing eccentrics. Life for Happy seems to be -- well, happy. But when he's assigned to design a newspaper ad recruiting participants for an experiment in the Yale Psychology Department, Happy can't resist responding to the ad himself. Little does he know that the experience will devastate him, forcing a reexamination of his past, his soul, and the nature of human

cruelty -- chiefly, his own. Written in sharp, witty prose and peppered with absorbing ruminations on graphic design, *The Learners* again shows that Chip Kidd's writing is every bit as original, stunning, and memorable as his celebrated book jackets.

The volume collects papers presented at the International Conference "Greek Medical Papyri - Text, Context, Hypertext" held at the University of Parma on November 2-4, 2016, as the final event of the ERC project DIGMEDTEXT, aimed primarily at creating an online textual database of the Greek papyri dealing with medicine. The

contributions, authored by outstanding papyrologists and historians of the ancient medicine, deal with a variety of topics focused on the papyrological evidence of ancient medical texts and contexts. The first part, devoted to "medical texts", contains some new reflections on important sources such as the Anonymus Londinensis and the Hippocratic corpus, as well as on specific themes like the pharmacological vocabulary, the official medical reports, the medical care in the Roman army. The second part collects papers about the "doctors' context", providing highlights from broader viewpoints like the analysis of the writing

supports, the study of the ostraka from the Eastern Desert, the evidence of inscriptions and philosophical texts. The third part is entirely focused on the

DIGMEDTEXT project itself: the team members present some relevant key issues raised by the digitisation of the medical papyri.
