We gratefully acknowledge the financial support of COST (European Cooperation in Science and Technology), funded by the Horizon 2020 Framework Programme of the European Union. Current grammatical knowledge about particular sign languages is fragmentary and of varying reliability, and it appears scattered in scientific publications where the description is often intertwined with the analysis. In general, comprehensive grammars are a rarity. The SignGram Blueprint is an innovative tool for the grammar writer: a full-fledged guide to describing all components of the grammars of sign languages in a thorough and systematic way, and with the highest scientific standards. The work builds on the existing knowledge in Descriptive Linguistics, but also on the insights from Theoretical Linguistics. It consists of two main parts running in parallel: the Checklist with all the grammatical features and phenomena the grammar writer can address, and the accompanying Manual with the relevant background information (definitions, methodological caveats, representative examples, tests, pointers to elicitation materials and bibliographical references). The areas covered are Phonology, Morphology, Lexicon, Syntax and Meaning. The Manual is endowed with hyperlinks that connect information across the work and with a pop-up glossary. The SignGram Blueprint will be a landmark for the description of sign language grammars in terms of quality and quantity.

Philosophers have warned of the perils of a life spent without reflection, but what constitutes reflective inquiry - and why it's necessary in our lives - can be an elusive concept. Synthesizing ideas from minds as diverse as John Dewey and Paulo Freire, the Handbook of Reflection and Reflective Inquiry presents reflective thought in its most vital aspects, not as a fanciful or nostalgic exercise, but as a powerful means of seeing familiar events anew, encouraging critical thinking and crucial insight, teaching and learning. In its opening pages, two seasoned educators, Maxine Greene and Lee Shulman, discuss reflective inquiry as a form of active attention (Thoreau's "wide-awakeness"), an act of consciousness, and a process by which people can understand themselves, their work (particularly in the form of life projects), and others. Building on this foundation, the Handbook analyzes through the work of 40 internationally oriented authors: - Definitional issues concerning reflection, what it is and is not; - Worldwide social and moral conditions contributing to the growing interest in reflective inquiry in professional education; - Reflection as promoted across professional educational domains, including K-12 education, teacher education, occupational therapy, and the law; - Methods of facilitating and scaffolding reflective engagement; - Current pedagogical and research practices in reflection; - Approaches to assessing reflective inquiry. Educators across the professions as well as adult educators, counselors and psychologists, and curriculum developers concerned with adult learning will find the Handbook of Reflection and Reflective Inquiry an invaluable teaching tool for challenging times.

Gegenstand dieses Buches ist die Übersetzung "aus zweiter Hand", also die Übersetzung eines Originals über die Vermittlung einer bereits vorliegenden Übersetzung in eine andere Zielsprache. Dabei gilt das Hauptinteresse der Vermittlerrolle Frankreichs bei der Übertragung bedeutender Werke der deutschsprachigen Geistesgeschichte ins Italienische. Die Autorin stellt zunächst die kulturellen und geistigen Rahmenbedingungen für das Phänomen vor und entwirft dann ein Panorama der Übersetzertätigkeit "aus zweiter Hand", das den Zeitraum vom 18. bis 20. Jahrhundert umfasst. Zugrunde gelegt werden dabei verschiedene Abstufungen des Phänomens, von der eingestandenem Reinform bis hin zu schwer nachweisbaren uneingestandenem Mischformen. Anschließend werden dem Leser mit ausgewählten Werken von Schiller, E.T.A. Hoffmann, Kant und

Nietzsche vier besonders charakteristische Fälle vorgestellt. Die Autorin zeigt anhand der kontrastiven Analyse von Original und Übersetzungen, in welcher Form die Beschaffenheit der französischen "Mittlerfassung" einerseits und Art und Beweggründe ihrer Konsultation durch den Übersetzer andererseits den Charakter der italienischen Version beeinflussen und deren Rezeption im Zielland steuern.

Non-Native Prosody: Phonetic Description and Teaching Practice is a response to the increasing interest in the field of prosody in second language acquisition and teaching. The volume presents an overview of the state of the art in second language prosody learning and teaching and brings together linguistic research on the description and modelling of non-native prosodic structures with L2 teaching methods and practices. The first part comprises descriptions of non-native prosodic structures (including intonation, stress and speech rhythm) as well as methodological considerations of research in second language acquisition written by experts in the field. These overviews of current theoretical models and results from empirical studies are presented in a format accessible to language teachers. In the second part, some of the leading teaching practitioners and developers of phonological learning materials present a variety of methods and exercises in the area of prosody. The accompanying audio examples on a CD-ROM make a useful addition illustrating the descriptions and exercises for various target and source languages.

This is the first book to address formulaic language directly and provide a foundation of knowledge for graduates and researchers in early stages of study of this important language phenomenon. It is also suitable for students of linguistics, applied linguistics, and language teacher education. The information that currently exists is scattered throughout articles and book chapters across a range of subfields of linguistics and applied linguistics. Over the past few decades there has been a steadily increasing interest and research focus on the phenomenon of formulaic language in the fields of linguistics and applied linguistics. Slowly, a consistent definition has emerged, centring around the idea that formulaic sequences are multi-word units with specific meanings or functions, and some evidence points to their being processed mentally as wholes. Researchers from diverse backgrounds have identified the nature and roles of formulaic sequences in language acquisition and production, in the construction of text and discourse, in spoken and written language, and in language teaching. The increasing volume, diversity, and complexity of the state of knowledge about this emerging area of study is marshalled by this intelligent and well-written book.

In an example of how the literary can become a privileged medium for philosophy, his chief philosophical invention is to begin with what gives an observer pause.

How can students be empowered to communicate professionally - as translators, journalists and CCOs? How can professionals engaged in crucial language interactions do the same - pilots, nurses, lawyers and many others? This volume gives answers to these questions, providing insights into critical situations and good practices from many years of research and teaching in a practice-oriented, research driven School of Applied Linguistics. *Transformative Learning Meets Bildung* Walter de Gruyter I am. We are. That is enough. Now we have to start. These are the opening words of Ernst Bloch's first major work, *The Spirit of Utopia*, written mostly in 1915-16, published in its first version just after the First World War, republished five years later, 1923, in the version here presented for the first time in English translation. *The Spirit of Utopia* is one of the great historic books from the beginning of the century, but it is not an obsolete one. In its style of thinking, a peculiar amalgam of biblical, Marxist, and Expressionist turns, in its analytical skills deeply informed by Simmel, taking its information from both Hegel and Schopenhauer for the groundwork of its metaphysics of music but consistently interpreting the cultural legacy in the light of a certain Marxism, Bloch's *Spirit of Utopia* is a unique attempt to rethink the history of Western civilizations as a process of revolutionary disruptions

and to reread the artworks, religions, and philosophies of this tradition as incentives to continue disrupting. The alliance between messianism and Marxism, which was proclaimed in this book for the first time with epic breadth, has met with more critique than acclaim. The expressive and baroque diction of the book was considered as offensive as its stubborn disregard for the limits of "disciplines." Yet there is hardly a "discipline" that didn't adopt, however unknowingly, some of Bloch's insights, and his provocative associations often proved more productive than the statistical account of social shifts. The first part of this philosophical meditation--which is also a narrative, an analysis, a rhapsody, and a manifesto--concerns a mode of "self-encounter" that presents itself in the history of music from Mozart through Mahler as an encounter with the problem of a community to come. This "we-problem" is worked out by Bloch in terms of a philosophy of the history of music. The "self-encounter," however, has to be conceived as "self-invention," as the active, affirmative fight for freedom and social justice, under the sign of Marx. The second part of the book is entitled "Karl Marx, Death and the Apocalypse." I am. We are. That's hardly anything. But enough to start.

This edited volume sets the groundwork for a dialogue between transformative learning and continental theories of Bildung in adulthood. Both theoretical frameworks bring meaning to the complex learning process of individuals as they develop a more critical worldview. In this volume, a variety of authors from different countries and theoretical backgrounds offer new understandings about Bildung and transformative learning through discussion of theoretical analyses, educational practices, and empirical research. As a result, readers gain greater insight into these theories and related implications for teaching for change. From the various chapters an exciting relationship between both theories begins to emerge and provides impetus for

greater discussion and further research about two important theories of change in the field of adult education. /div

 When it comes to obesity, diabetes, heart disease, cancer, and depression, everything you believe is a lie. With research gleaned from the National Institutes of Health, T.S. Wiley and Bent Formby deliver staggering findings: Americans really are sick from being tired. Diabetes, heart disease, cancer, and depression are rising in our population. We're literally dying for a good night's sleep. Our lifestyle wasn't always this way. It began with the invention of the lightbulb. When we don't get enough sleep in sync with seasonal light exposure, we fundamentally alter a balance of nature that has been programmed into our physiology since day one. This delicate biological rhythm rules the hormones and neurotransmitters that determine appetite, fertility, and mental and physical health. When we rely on artificial light to extend our day until 11 p.m., midnight, and beyond, we fool our bodies into living in a perpetual state of summer. Anticipating the scarce food supply and forced inactivity of winter, our bodies begin storing fat and slowing metabolism to sustain us through the months of hibernation and hunger that never arrive. Our own survival instinct, honed over millennia, is now killing us. Wiley and Formby also reveal: -That studies from our own government research prove the role of sleeplessness in diabetes, heart disease, cancer, infertility, mental illness, and premature aging -Why the carbohydrate-rich diets recommended by many health professionals are not only ridiculously ineffective but deadly -Why the lifesaving information that can turn things around is one of the best-kept secrets of our day. Lights Out is one wake-up call

none of us can afford to miss.

 Serious illness and mortality, those most universal, unavoidable, and frightening of human experiences, are the focus of this pioneering study which has been hailed as a telling and provocative commentary on our times. As modern medicine has become more scientific and dispassionate, a new literary genre has emerged: pathography, the personal narrative concerning illness, treatment, and sometimes death. Hawkins's sensitive reading of numerous pathographies highlights the assumptions, attitudes, and myths that people bring to the medical encounter. One factor emerges again and again in these case studies: the tendency in contemporary medical practice to focus primarily not on the needs of the individual who is sick but on the condition that we call disease. Pathography allows the individual person a voice-one that asserts the importance of the experiential side of illness, and thus restores the feeling, thinking, experiencing human being to the center of the medical enterprise. Recommended for medical practitioners, the clergy, caregivers, students of popular culture, and the general reader, *Reconstructing Illness* demonstrates that only when we hear both the doctor's and the patient's voice will we have a medicine that is truly human.
