Lifestyle in Siberia and
the Russian North breaks*

new ground by exploring the concept of lifestyle from a distinctly anthropological perspective. Showcasing the collective work of ten experienced scholars in the field, the book goes beyond concepts of tradition that have often been the focus of previous research, to explain how political, economic and technological changes in Russia have created a wide range of new possibilities and constraints in the pursuit of different ways of life. Each contribution is drawn

from meticulous first-hand field research, and the authors engage with theoretical questions such as whether and how the concept of lifestyle can be extended beyond its conventionally urban, Euro-American context and employed in a markedly different setting. Lifestyle in Siberia and the Russian North builds on the contributors' clear commitment to diversifying the field and providing a novel and intimate insight into this vast and dynamic region. This book provides

inspiring reading for students and teachers of Anthropology, Sociology and Cultural Studies and for anyone interested in Russia and its regions. By providing ethnographic case studies, it is also a useful basis for teaching anthropological methods and concepts, both at graduate and undergraduate level. Rigorous and innovative, it marks an important contribution to the study of Siberia and the Russian North. *Pleasure and Work*

Tunnels and Underground Cities: Engineering and Innovation meet Archaeology, Architecture and Art. Volume 10: Strategic use of underground space for resilient cities contains the contributions presented in the eponymous Technical Session during the World Tunnel Congress 2019 (Naples, Italy, 3-9 May 2019). The use of underground space is continuing to grow, due to global urbanization, public

demand for efficient transportation, and energy saving, production and distribution. The growing need for space at ground level, along with its continuous value increase and the challenges of energy saving and achieving sustainable development objectives, demand greater and better use of the underground space to ensure that it supports sustainable, resilient and more liveable cities. The contributions cover a wide range of topics, from investing in urban

underground space, via effective use of underground space for sustainable cities, and the use of new energy carriers to the compound use of underground space for integrated campus-urban development. The book is a valuable reference text for tunnelling specialists, owners, engineers, archaeologists, architects, artists and others involved in underground planning, design and building around the world, and for academics who are interested in

underground constructions and geotechnics.

 This edited volume proposes that an understanding of ASEAN – its development and institutionalization – is invaluable to our conception of international relations theory in the Asian context. Southeast Asia and ASEAN host peoples, ideas, institutions, and relations that contribute

to a critical reassessment of theories in social sciences. In the field of IR, studies on transnational networks, diasporas, small states, middle powers, the role of history, and identity learn from Southeast Asian practices. ASEAN has long been established as an authoritative example of alternative ways of regional institutionalization. Besides empirical analysis, these fields can also benefit from their interactions with regional scholarly communities.

This edited book offers an opportunity for a dialogue among scholarly communities on a variety of issues of which Southeast Asia and ASEAN provide ample opportunities for a critical analysis. This book will be of great interest to scholars of ASEAN, the broader Asian region, and for scholars of regionalism in general.

Making Sense of World History is a comprehensive and accessible textbook that helps students understand the key themes of world history within a chronological framework stretching from ancient times to the present day. To lend coherence to its narrative,

the book employs a set of organizing devices that connect times, places, and/or themes. This narrative is supported by: Flowcharts that show how phenomena within diverse broad themes interact in generating key processes and events in world history. A discussion of the common challenges faced by different types of agent, including rulers, merchants, farmers, and parents, and a comparison of how these challenges were addressed in different times and places. An

exhaustive and balanced treatment of themes such as culture, politics, and economy, with an emphasis on interaction. Explicit attention to skill acquisition in organizing information, cultural sensitivity, comparison, visual literacy, integration, interrogating primary sources, and critical thinking. A focus on historical “episodes” that are carefully related to each other. Through the use of such devices, the book shows the cumulative effect of thematic interactions

through time, communicates the many ways in which societies have influenced each other through history, and allows us to compare and contrast how they have reacted to similar challenges. They also allow the reader to transcend historical controversies and can be used to stimulate class discussions and guide student assignments. With a unified authorial voice and offering a narrative from the ancient to the present, this is the go-to textbook for World

History courses and students. America, Incorporated This practical and helpful volume details how clinicians can work through various common

challenges in individual, couple, or group psychotherapy. Chapters draw upon clinical wisdom gleaned from the author's 48 years as a practicing psychiatrist to address topics such as using countertransference for therapeutic purposes; resistance, especially when it needs to be the focus of the therapy; and a prioritization of exploration over explanation. Along with theory and clinical observations, Dr. Gans offers a series of "Clinical Pearls," pithy comments

that highlight different interventions to a wide range of clinical challenges. These include patient hostility, the abrupt and unilateral termination of therapy, the therapist's loss of compassionate neutrality when treating a couple, and many more. Many of the "Clinical Pearls" prioritize working in the here-and-now. In addition to offering advice and strategies for therapists, the book also addresses concerns like the matter of fees in private practice and the virtue of moral

courage on the part of the therapist. Written with clarity, heart, and an abundance of clinical wisdom, *Addressing Challenging Moments in Psychotherapy* is essential reading for all clinicians, teachers, and supervisors of psychotherapy. This second edition of "The Tinder Box," published in September 2014 by Seneca Books, provides readers with greater detail concerning events that occurred within the U.S. Forest Service from 1982 through 2008, and has a far more extensive Index. Since 1990 over 113,000,000 acres of

America's timber lands have been consumed by wildfire, one of many disasters the U.S. Forest Service must be held accountable for. Over that same period the timber industry, companies engaged in making wood products, owners of properties adjacent forest lands, and the public at large have become incensed by the agency's ineptitude. To learn more read Christopher Burchfield's "The Tinder Box: How Politically Correct Ideology Destroyed the U.S. Forest

Service." The book goes back to the very beginning--33 years ago--when the agency set about destroying itself from within. Readers will finally grasp those terrible events inside the agency, all of which took place entirely outside of public purview. Indeed, this is the first inside look at how--step-by-step, political correctness destroyed an American institution.

Introducing a new publication for the South Bend Lathe enthusiast from ILION Industrial Services: A Guide to Renovating the South Bend Lathe for Models 10L and 10R (known as the Heavy 10), 13" 14.5" and 16". The manual is a bound 8.5" x 11" soft cover, 156 pages in

length and is fully illustrated with over 450 B&W photographs plus step-by-step instructions for refurbishing your lathe. As you will notice, this is NOT a fuzzy Xerox reprint of an existing manual. Our book was painstakingly produced over the last two years specifically with the South Bend Lathe owner in mind and it addresses the most commonly asked questions and methods for how to renovate a used lathe. Even though South Bend ceased production of these fine

quality lathes years ago, there are still thousands of servicable lathes sitting out there in home shops, small businesses, schools and machinery dealers. Our book takes the guess work out of what to do if you find one and decide to purchase. The details include the sequence for disassembling, cleaning, reassembling and adjusting the critical components of the heavy 10, 13", 14 1/2" and 16" industrial lathes. The basic design of the industrial series of lathes was essentially the same

except for the scale so the 10L and 13" lathes are primarily used for demonstration purposes in the manual but all steps will apply directly to the 14.5" and 16" lathes as well. The manual has specific chapters dedicated to both the single tumbler and double tumbler style of gearbox. Additional information is included for evaluating and purchasing a used SBL if you are not lucky enough to already own one. There is a section on refinishing industrial machinery plus a guide on

how to handle special fasteners like taper pins. The typeface of the manual is printed two points larger than normal for those of us who prefer to work at the bench without reading glasses. The instructions are very straight forward and no prior machinery renovation experience is required. The manual also includes a list of resources for vintage SBL owners as well as parts references, tool requirements, lubrication guides and material specifications. If you have a Southbend

lathe, don't miss your chance to pick up this complete guide for your machine at a very reasonable price. *Addressing Challenging Moments in Psychotherapy* Clark Boardman Callaghan Tens of thousands of mechanical engineers are engaged in the design, building, upgrading, and optimization of various material handling facilities. The peculiarity of material handling is that there are numerous technical solutions to any problem. The engineer's

personal selection of the optimal solution is as critical as the technical component. Michael Rivkin, Ph.D., draws on his decades of experience in design, construction, upgrading, optimization, troubleshooting, and maintenance throughout the world, to highlight topics such as: • physical principles of various material handling systems; • considerations in selecting technically efficient and environmentally friendly equipment; • best practices in upgrading

and optimizing existing bulk material handling facilities; • strategies to select proper equipment in the early phases of a new project. Filled with graphs, charts, and case studies, the book also includes bulleted summaries to help mechanical engineers without a special background in material handling find optimal solutions to everyday problems.

Learning Chinese can be
frustrating and difficult,

partly because it's very
different from European

languages. Following a
teacher, textbook or

language course is not
enough. They show you

the characters, words and
grammar you need to

become proficient in
Chinese, but they don't
teach you how to learn
them! Regardless of what
program you're in (if any),
you need to take
responsibility for your own
learning. If you don't, you
will miss many important
things that aren't included
in the course you're
taking. If you study on
your own, you need to be
even more aware of what
you need to do, what
you're doing at the
moment and the
difference between them.
Here are some of the
questions I have asked

and have since been asked many times by students: How do I learn characters efficiently? How do I get the most out of my course or teacher? Which are the best learning tools and resources? How can I become fluent in Mandarin? How can I improve my pronunciation? How do I learn successfully on my own? How can I motivate myself to study more? How can I fit learning Chinese into a busy schedule? The answers I've found to these

questions and many others form the core of this book. It took eight years of learning, researching, teaching and writing to figure these things out. Not everybody has the time to do that! I can't go back in time and help myself learn in a better way, but I can help you! This book is meant for normal students and independent language learners alike. While it covers all major areas of learning, you won't learn Chinese just by reading this book. It's like when someone on TV teaches

you how to cook: you won't get to eat the delicious dish just by watching the program; you have to do the cooking yourself. That's true for this book as well. When you apply what you learn, it will boost your learning, making every hour you spend count for more, but you still have to do the learning yourself. This is what a few readers have said about the book: "The book had me nodding at a heap of things I'd learnt the hard way, wishing I knew them when I started, as well as

highlighting areas that I'm currently missing in my study." - Geoff van der Meer, VP engineering

"This publication is like a bible for anyone serious about Chinese proficiency. It's easy for anyone to read and written with scientific precision." - Zachary Danz, foreign teacher, children's theatre artist

About me I started learning Chinese when I

was 23 (that's more than eight years ago now) and have since studied in many different situations, including serious immersion programs abroad, high-intensity programs in Sweden, online courses, as well as on the side while working or studying other things. I have also successfully used my Chinese in a graduate program for

teaching Chinese as a second language, taught entirely in Chinese mostly for native speakers (the Graduate Institute for Teaching Chinese as a Second Language at National Taiwan Normal University). All these parts have contributed to my website, Hacking Chinese, where I write regularly about how to learn Mandarin.
