GAIGE HORTON

Transformative Healthcare Practice through Patient Engagement Simon and Schuster
Hospital intensive care units have changed when and how we die--and not always for the better. The ICU is a new world, one in which once-fatal diseases can be cured and medical treatments greatly enhance our chances of full recovery. But, paradoxically, these places of physical healing can exact a terrible toll, and by focusing on technology rather than humanity, they too often rob the dying of their dignity. By some accounts, the expensive medical treatments provided in ICUs also threaten to bankrupt the nation. In an attempt to give patients a voice in the ICU when they might not otherwise have one, the living will was introduced in 1969, in response to several notorious cases. These documents were meant to keep physicians from ignoring patients' and families' wishes in stressful situations. Unfortunately, despite their aspirations, living wills contain static statements about hypothetical preferences that rarely apply in practice. And they created a process that isn't faithful to who we are as human beings. Further confusing difficult and painful situations, living wills leave patients with the impression that actual communication with their physicians has taken place, when in fact their deepest desires and values remain unaddressed. In this provocative and empathetic book, medical researcher and ICU physician Samuel Morris Brown uses stories from his clinical practice to outline a new way of thinking about life-threatening illness. Brown's approach acknowledges the conflicting emotions we have when talking about the possibility of death and proposes strategies by which patients, their families, and medical practitioners can better address human needs before, during, and after serious illness. Arguing that any solution to the problems of the inhumanity of intensive care must take advantage of new research on the ways human beings process information and make choices, Brown imagines a truly humane ICU. His manifesto for reform advocates wholeness and healing for people facing life-threatening illness.

Through the Valley of Shadows Simon and Schuster

Two leading experts on "strategic conversation design" present creative methods for enabling teams to address issues while minimizing resource-depleting workshops and meetings, providing diagnostic questions, best practices, and advice.

Catholic Witness in Health Care Springer

"There is an unspoken dark side of American medicine--keeping patients alive at all costs. Two thirds of Americans die in healthcare institutions tethered to machines and tubes, even though research indicates that most prefer to die at home in comfort, surrounded by loved ones. The question How do you want to live? must be posed to the seriously ill because they deserve to choose. If doctors explain options--including the choice to forego countless medical interventions that are often of little benefit--then patients can tell doctors how they wish to spend the remainder of their lives. A doctor's heroic efforts to prolong a life can instead prolong that patient's death, and these traumatic measures also bankrupt the healthcare system. One third of the Medicare budget is spent on the last six months of life, often on technological interventions that are not helpful and inflict more suffering. Through the stories of six patients and six very different end-of-life experiences, Volandes explores the trajectory of events and treatments that occur with and without this essential conversation. He argues for a radical re-envisioning of the patient-doctor relationship--including videos to spark discussions--and offers ways for patients and their families to talk about this difficult issue to ensure that patients will be at the center and in charge of their medical care"--Provided by publisher.

Cell Wars Archway Publishing

This casebook provides a set of cases that reveal the current complexity of medical decision-making, ethical reasoning, and communication at the end of life for hospitalized patients and those who care for and about them. End-of-life issues are a controversial part of medical practice and of everyday life. Working through these cases illuminates both the practical and philosophical challenges presented by the moral problems that surface in contemporary end-of-life care. Each case involved real people, with varying goals and constraints, who tried to make the best decisions possible under demanding conditions. Though there were no easy solutions, nor ones that satisfied all stakeholders, there are important lessons to be learned about the ways end-of-life care can continue to improve. This advanced casebook is a must-read for medical and nursing students, students in the allied health professions, health communication scholars, bioethicists, those studying hospital and public administration, as well as for practicing physicians and educators.

Sun Yat-Sen and the Origins of the Chinese Revolution Yale University Press

A modern, all-encompassing exploration of what happens after death combines spirituality with philosophy, history, and science, all of which guide readers toward the timeless truth that human consciousness lives on after death.

The Eagle and the Serpent Balboa Press

The Medicalization of Birth and Death is required reading for academics, patients, providers, policymakers, and anyone else interested in how policy shapes healthcare options and limits patients and providers during life's most profound moments.

Life After Death? Oxford University Press

The Bolsheviks sought legitimacy and inspiration in historic revolutionary traditions, and Jay Bergman argues that they saw the revolutions in France in 1789, 1830, 1848, and 1871 as supplying practically everything Marxism lacked, including guidance in constructing socialism and communism, and useful fodder for political and personal polemics.

Moments of Impact Univ of California Press

The 1917 October Revolution and the revolutionary Mexican Constitution shook the foundations of international law. This collection revisits their legacies.

The Iraqi Revolution of 1958 University Press of America

The enigmatic personal qualities that marked Sun Yat-sen during his lifetime have encouraged controversy concerning him ever since his death more than a generation ago. Mr. Schiffrin's book deals with the first forty years of Sun's life, and attempts to find the key to this controversial personality. His study is at once biography and history, for it goes beyond Sun to the whole texture of Chinese history of Sun's time. Drawing on diplomatic archives, police reports, personal interviews, contemporary newspapers, and other hitherto unused sources in Chinese, Japanese, and Western languages, the author reveals unsuspected facets of Sun's versatile plotting on three continents, and traces the convolutions of his pragmatic style in unprecedented detail.

Giving Hope Vintage

Despite decades of attention on building a global HIV research and programming agenda, HIV in older populations has generally been neglected until recently. This new book focuses on HIV and aging in the context of ageism with regard to prevention, treatment guidelines, funding, and the engagement of communities and health and social service organizations. The lack of perceived HIV risk in late adulthood among older people themselves, as well on the part of providers and society in general, has led to a lack of investment in education, testing, and programmatic responses. Ageism perpetuates the invisibility of older adults and, in turn, renders current medical and social service systems unprepared to respond to patients' needs. While ageism may lead to some advantages - discounts for services, for example - it is the negative aspects that must be addressed when determining the appropriate community-level response to the epidemic.

Hold Me Tight Routledge

How American colonists reinterpreted their British and colonial histories to help establish political and cultural independence from Britain In Past and Prologue, Michael Hattem shows how colonists' changing understandings of their British and colonial histories shaped the politics of the American Revolution and the origins of American national identity. Between the 1760s and 1800s, Americans stopped thinking of the British past as their own history and created a new historical tradition that would form the foundation for what subsequent generations would think of as "American history." This change was a crucial part of the cultural transformation at the heart of the Revolution by which colonists went from thinking of themselves as British subjects to thinking of themselves as American citizens. Rather than liberating Americans from the past--as many historians have argued--the Revolution actually made the past matter more than ever. Past and Prologue shows how the process of reinterpreting the past played a critical role in the founding of the nation.

The Time-Saver's Workout Page Publishing Inc

"An insightful, unflinching portrayal of the remarkable siblings who came closer to altering the course of American history than any other Indian leaders." --H.W. Brands, author of *The Zealot* and *the Emancipator* The first biography of the great Shawnee leader to make clear that his misunderstood younger brother, Tenskwatawa, was an equal partner in the last great pan-Indian alliance against the United States. Until the Americans killed Tecumseh in 1813, he and his brother Tenskwatawa were the co-architects of the broadest pan-Indian confederation in United States history. In previous accounts of Tecumseh's life, Tenskwatawa has been dismissed as a talentless charlatan and a drunk. But award-winning historian Peter Cozzens now shows us that while Tecumseh was a brilliant diplomat and war leader--admired by the same white Americans he opposed--it was Tenskwatawa, called the "Shawnee Prophet," who created a vital doctrine of religious and cultural revitalization that unified the disparate tribes of the Old Northwest. Detailed research of Native American society and customs provides a window into a world often erased from history books and reveals how both men came to power in different but no less important ways. Cozzens brings us to the forefront of the chaos and violence that characterized the young American Republic, when settlers spilled across the Appalachians to bloody effect in their haste to exploit lands won from the British in the War of Independence, disregarding their rightful Indian owners. Tecumseh and the Prophet presents the untold story of the Shawnee brothers who retaliated against this threat--the two most significant siblings in Native American history, who, Cozzens helps us understand, should be writ large in the annals of America.

The Sociology of Health, Healing, and Illness Fieldstone Alliance

In the early decades of the twenty-first century, Congress unexpectedly passes a law stating that citizens over the age of seventy who can no longer care of themselves are subject to euthanasia by the government. When it is signed by the president, the so-called death law hidden as a rider on legislation related to defense spending and designed to end a government shutdown the public is appalled. Julia Sanchez, a veteran congressional staffer in her late fifties, is determined to fight the new law; her parents, Henry and Beatriz, are in their seventies and are in its crosshairs. Along the way, she joins forces with journalist Jake Jordan, who is vigorous and active in his career despite being in his midsixties. As the two work to counteract the law, they find themselves drawn more and more to each other, and Jake gradually becomes involved with Julia's parents and their caregiver, Hattie. Can their combined efforts overcome the cruelty of the death law? In this novel, a congressional aide and an investigative journalist struggle against the terrible threat of a law ordering the death of senior citizens no longer able to care for themselves. While readers will be charmed by the beautiful story of love and devotion, both familial and romantic, they will also be challenged by the horrifying idea of a society willing to throw out its elderly. Ann Bernardi, Licensed Clinical Social Worker

Food Over Medicine Greenhaven Publishing LLC

This book advances the argument that the events of July 14, 1958, when Iraqi military officers overthrew the British-installed Iraqi monarchy, constituted simultaneously as a coup and a revolution for a number of reasons, including military involvement, popular participation, and policies that radically departed from those of the previous regime.

Revolutionary Power Lippincott Williams & Wilkins

In addition to Valerie Warrior's crisp, fluent translation of the first five books of Livy's *Ab Urbe Condita*, this edition features a general introduction to Livy and his work, extensive foot-of-the-page notes offering essential contextual information, and a chronology of events. Three appendices--on the genealogies of the most prominent political figures in the early Republic, Livy's relationship with Augustus, and Livy's treatment of religion--offer additional insight into the author and the early history of Rome.

The Conversation Jove Books

Catholic health care is about ethics but also "ethos" - not only what we shouldn't do but a vision for what we should do with love. The issues it faces don't just concern academic bioethicists - they concern every faithful Catholic doctor, nurse, practitioner, and even patient. Modern medical practitioners on the ground, day-in, day-out, wrestling with medical moral matters, witnessing what is happening in American medicine today, while also striving to witness to their Catholic faith in living out their medical vocation - these are the primary authors of this unique book, and these are the readers it hopes to serve. *Catholic Witness in Health Care* integrates the theoretical presentation of Catholic medical ethics with real life practice. It begins with fundamental elements of Catholic care, touching upon Scripture, moral philosophy, theology, Christian anthropology, and pastoral care. The second part features Catholic clinicians illuminating authentic Catholic medical care in their various medical disciplines: gynecology and reproductive medicine, fertility, pediatrics, geriatrics, critical care, surgery, rehabilitation, psychology, and pharmacy. Part three offers unique

perspectives concerning medical education, research, and practice, with an eye toward creating a cultural shift to an authentically Catholic medical ethos. Readers of this book will learn essential elements upon which the ethics of Catholic medical practice is founded and gain insights into practicing medicine and caring for others in an authentically Catholic way.

How to Do It All Penguin

Comprehensive, evidence-based, and expertly written, *Critical Care Nursing: A Holistic Approach*, 12th Edition, helps you confidently prepare today's students for the highly specialized and complex challenges of critical care nursing practice. This trusted, must-have text integrates clear, concise writing, engaging resources, and a proven holistic approach to instill the clinical competence students need to care for patients who are critically ill and their families. More efficiently organized and easier to use than ever, the 12th Edition presents theory and principles within the context of practical application to streamline students' transition to successful critical care practice.

Communication and Bioethics at the End of Life Island Press

With thorough coverage of inequality in health care access and practice, this leading textbook has been widely acclaimed by teachers as the most accessible of any available. It introduces and integrates recent research in medical sociology and emphasizes the importance of race, class, gender, and sexuality throughout. This new edition leads students through the complexities of the evolving Affordable Care Act. It significantly expands coverage of medical technology, end-of-life issues, and alternative and complementary health care—topics that students typically debate in the classroom. While the COVID-19 pandemic emerged after this edition of the text was originally submitted, material has been added in Chapters 3, 10, and 13 about it. Many new text boxes and enhancements in pedagogy grace this new edition, which is essential in the fast-changing area of health care. New to this edition: More text boxes relating the social aspects of medicine to students' lives. Expanded coverage leading students through the complex impacts of the ACA and health care reform. Greater emphasis on sexual minority health and LGBTQ+ persons' experiences in the health care system. Expanded coverage of medical technology, end-of-life issues, and alternative and complementary health care. "Health and the Internet" sections are updated and renovated to create more interactive student assignments. New end-of-chapter lists of terms, with key terms as flash cards on the companion website. An updated instructor's guide with test bank.

Understanding Medical Cannabis Cambridge University Press

Do Less, Live More, Get Accepted What if getting into your reach schools didn't require four years of excessive A.P. classes, overwhelming activity schedules, and constant stress? In *How to Be a High School Superstar*, Cal Newport explores the world of relaxed superstars—students who scored spots at the nation's top colleges by leading uncluttered, low stress, and authentic lives. Drawing from extensive interviews and cutting-edge science, Newport explains the surprising truths behind these superstars' mixture of happiness and admissions success, including: · Why doing less is the foundation for becoming more impressive. · Why demonstrating passion is meaningless, but being interesting is crucial. · Why accomplishments that are hard to explain are better than accomplishments that are hard to do. These insights are accompanied by step-by-step instructions to help any student adopt the relaxed superstar lifestyle—proving that getting into college doesn't have to be a chore to survive, but instead can be the reward for living a genuinely interesting life.

Past and Prologue CUA Press

Unlike the author's first book, *It's Hard to Die! "Do I Hold On or Do I Let Go?"* which focuses on the practical and clinical aspects of the dying process—this book presents the subject from a metaphysical and transcendental approach. It addresses issues that impact the mental, emotional, and spiritual dimensions of the dying person, their family, and friends. It is difficult to step outside our comfort zone—our place of refuge, that little corner in our minds that offers solitude and protection from the unfamiliar. Our comfort zone is our reality, and we protect it from intrusion—especially when it comes to thoughts of death and dying. If you or a loved one are facing end-of-life issues, this book may help to alleviate the uncertainties and anguish felt during this most heart-rending time. As distressing questions and situations arise you may be forced to make difficult decisions regarding some various issues: Am I playing God? | Letting go or hanging on | What happens during the dying process? | Fear of dying | Grief and bereavement | Funeral? Burial? Cremation? | Being at peace with your religious and spiritual beliefs | What happens after death? Perhaps embracing new ideas will open our minds and hearts to myriad possibilities. A deeper understanding of the viewpoints of other religions, cultures, and ethnicities will help us become more understanding, compassionate, and respectful of the needs and wishes of the dying person. Are you ready to journey beyond your comfort zone?
