Published in 1837, Hans Christian Andersen's *The Emperor's New Clothes* tells the tale of two weavers who present a non-existent suit of clothes to the Emperor with the caution that the suit is invisible to those who are unfit for their positions, stupid, or incompetent. As the Emperor parades in his underwear no one dares to say that they see no clothes—with the exception for one small child who exclaims; "he isn't wearing anything at all." Fast forward to the present day and business owners and managers around the world are told that anyone who cannot see the benefits of social media marketing are unfit for their positions, stupid, or incompetent. As organizations, brands and products fill

the social media landscape with meaningless, objectiveless driven that has interest to no one and serves only to waste resources and alienate customers, a small voice can be heard exclaiming; "who told you that was a good idea?" The caveat to this contemporary tale is that for a very few organizations, brands and products, social media has provided a kind-of marketing panacea. Correction: make that a very, very few organizations. For the rest, they are metaphorically parading in their digital underwear. All is not lost however. Although many have been duped in a new clothes-esque sting, and that their social media marketing efforts are indeed, invisible—but marketing on social media might just be riding to the rescue.

Develop children's brains and bonds with this collection of no-tech, physical games, strategies and activities. Ideal for children who have experienced neglect, abuse and trauma, these "real-world" experiences draw on therapeutic, trauma-focused-care play principles and promote positive attachment between child and caregivers. Explanations for how and why specific play themes and caregiver attitudes can help children's brain development enhance the text. The book also shows how children learn to problem-solve real life situations by playing them out, finding workable solutions to their own problems, and increasing their resiliency. Further benefits include better cause-effect thinking, impulse control, and increased cognitive and emotional functioning by practicing physical movements that exercise specific areas of the brain.

Please note that the content of this book primarily consists of articles available from Wikipedia or other free sources online. Pages: 51. Chapters: Global Positioning System, Letterboxing, Degree Confluence Project, Encounter, Hash House Harriers, Benchmarking, Location-based game, Geocoin, Geograph Britain and Ireland, Travel Bug, StreetWars, Highpointing, Waymarking, Alleycat races, Gbanga Famiglia, Peak bagging, Miglia Quadrato, Treasure hunt, Poker run, Paper Chase, Scavenger hunt, County collecting, City Chase, Wherigo, Questing, Londinium Pedo, Geotoken, UK Detector Finds Database, Uncle Roy All Around You, Geodashing, Falls bagging. Excerpt: The Global Positioning System (GPS) is a space-based global navigation satellite system (GNSS) that provides location and time information in all weather, anywhere on or near the Earth, where there is an unobstructed

line of sight to four or more GPS satellites. It is maintained by the United States government and is freely accessible by anyone with a GPS receiver with some technical limitations which are only removed for military users. The GPS project was developed in 1973 to overcome the limitations of previous navigation systems, integrating ideas from several predecessors, including a number of classified engineering design studies from the 1960s. GPS was created and realized by the U.S. Department of Defense (USDOD) and was originally run with 24 satellites. It became fully operational in 1994. In addition to GPS, other systems are in use or under development. The Russian GLObal NAVigation Satellite System (GLONASS) was in use by only the Russian military, until it was made fully available to civilians in 2007. There are also the planned Chinese Compass navigation system and the European Union's Galileo positioning system. The design of GPS is based partly on similar ground-based radio-navigation systems, such as LORAN and the Decca Navigator developed in the early 1940s, and used during World War II. In...

The companion to the Newbery Honor winner Where the

Mountain Meets the Moon and the National Book Award finalist When the Sea Turned to Silver The moon is missing from the remote Village of Clear Sky, but only a young boy named Rendi seems to notice! Rendi has run away from home and is now working as a chore boy at the village inn. He can't help but notice the village's peculiar inhabitants and their problems-where has the innkeeper's son gone? Why are Master Chao and Widow Yan always arguing? What is the crying sound Rendi keeps hearing? And how can crazy, old Mr. Shan not know if his pet is a toad or a rabbit? But one day, a mysterious lady arrives at the Inn with the gift of storytelling, and slowly transforms the villagers and Rendi himself. As she tells more stories and the days pass in the Village of Clear Sky, Rendi begins to realize that perhaps it is his own story that holds the answers to all those questions. Newbery Honor author Grace Lin brings readers another enthralling fantasy featuring her marvelous full-color illustrations. Starry River of the Sky is filled with Chinese folklore, fascinating characters, and exciting new adventures.

"It is no secret that America is the No Vacation Nation. Our vacations nowadays consist of nothing more than a few long weekends a year...when we're not on staycations. Workplace stress and burnout in America are at all-time highs. That Americans are over-caff einated and sleep deprived is not surprising given that our work-leisure balance is so severely lopsided. Depression is epidemic. Chalmers' estimates that these seemingly isolated, yet wholly interconnected cultural data points cost the U.S. economy a trillion dollars a year in lost productivity...and may be shortening the life spans of Americans too! But it wasn't always like this in America...and it surely doesn't have to be either. A stunningly well-researched book, offering readers an explanation of why Americans are suffering from an acute case of Vacation Deficit Disorder...and what the unintended consequences mean to every American couple, parents, families, workers, bosses, and our nations economy. It explains clearly why Americans dont travel...and why they really should! What really makes humans happy; and offers profound insight into how the lucky few Americans who do take vacations can enjoy them better and reap their life-enhancing benefits. And it passionately explains how all Americans would benefit from his 4% Solution prescription. This book offers a compelling American centric cultural narrative that explains in great detail and with erudite analysis just who stole our vacation.

Teaching languages to adolescents can be a challenge. . . but one that is most rewarding! What works? What doesn't work? This book provides a reader friendly overview on teaching modern languages to adolescents (Years 7-13). Each chapter takes an aspect of language teaching and learning, and explains the underlying theory of instructed language acquisition and its application through examples from real language classrooms. The book explores teachers' practices and the reasoning behind their pedagogic choices through the voices of both the teachers themselves and their students. At the same time, it highlights the needs of the adolescent language learner and makes the case that adolescence is a prime time for language learning. Written in an accessible, engaging way, yet comprehensive in its scope, this will be essential reading for language teachers wishing to integrate cutting-edge research into their teaching. Western business leaders make two key assumptions about

China: that China is always copying the West, and that the West is the seat of innovation. The truth is surprising: China is both copying and innovating, and while Western businesses are busy looking for the next new thing, China is rapidly iterating on what's already been done and pushing ahead. While businesses in the West are getting disrupted and left behind, the savvy leaders among them can learn, innovate, and excel – by copying China's playbook! Chinafy distils the key lessons from China to unlock business potential anywhere in the world. These lessons serve as catalysts for how to "Chinafy" innovation for growth. Taking a deep dive into the workings of China's most successful brands – from Haier to ByteDance – author Joanna Hutchins reveals what it takes to get ahead in the world of business and innovation.

History on the Internet HMH Books For Young Readers

"The most interesting book ever written about Google" (The Washington Post) delivers the inside story behind the most successful and admired technology company of our time, now updated with a new Afterword. Google is arguably the most important company in the world today, with such pervasive influence that its name is a verb. The company founded by two Stanford graduate students—Larry Page and Sergey Brin—has become a tech giant known the world over. Since starting with its search engine, Google has moved into mobile phones, computer operating systems, power utilities, self-driving cars, all while remaining the most powerful company in the advertising business. Granted unprecedented access to the company, Levy disclosed that the key to Google's success in all these businesses lay in its engineering mindset and adoption of certain internet values such as speed, openness, experimentation, and risk-

taking. Levy discloses details behind Google's relationship with China, including how Brin disagreed with his colleagues on the China strategy—and why its social networking initiative failed; the first time Google tried chasing a successful competitor. He examines Google's rocky relationship with government regulators, particularly in the EU, and how it has responded when employees left the company for smaller, nimbler start-ups. In the Plex is the "most authoritative...and in many ways the most entertaining" (James Gleick, The New York Book Review) account of Google to date and offers "an instructive primer on how the minds behind the world's most influential internet company function" (Richard Waters, The Wall Street Journal).

Diamond. One name for a woman with one purpose. Or she was, until she finished her to-do list. Now she's just a woman ready to be over with it all. Hanna Lang is the kind of woman men write bad checks for. She has a problem. Her man, Dr. Damon Marten, disappeared in the middle of an ordinary day. The police aren't concerned but Hanna knows better. A clandestine meeting leaves her with an address, a sealed envelope, and one last hope. An hour later, she rings a doorbell. Before Diamond was a widow, she was CIA agent with skills illegal in a dozen countries. When her marker is called in, she has no choice but to listen. It's just like fate throw her a curve ball, sending her the one problem she can't walk away from. Hanna's situation is virtually identical to her own with one exception: Hanna's man might still be alive. Diamond reluctantly takes the case. She dives into the mystery, surfacing in the middle of a scavenger hunt for a secret known as

Poe's Raven. It takes Diamond's flair for the impossible to capture this bird, only to discover what's in her hand has the potential to take terrorism to a chilling new level. And fate isn't done with Diamond, forcing her to put it all on the line or risk setting the caged bird free. Praise for the books by TG Wolff: "TG Wolff's Detective De La Cruz is caught in the crosshairs of solving heinous crimes, defending himself against a wrongful lawsuit, helping an abusive drug dealer's family, thwarting his mother's matchmaking, and falling in love. Pit against those who subvert justice and twist the law to suit their own ends, Cruz stands true while suffering his own demons—everything a hero should be. Wolff's unsentimental and precise writing draws readers. Add *Exacting Justice* to your 'to be read' pile." —E. B. Davis, mystery author "Working with an incarcerated population, I deal regularly with people who have made poor life decisions but who can be inherently funny, surprisingly talented, or overly concerned. I know that simple labels of 'good' and 'bad' don't work in the real world. In *Exacting Justice*, TG Wolff created characters just as messy, complicated, and dynamic as real life that keep you wanting to read page after page." —Vincent Giammarco, Director

of Behavioral Health Care "TG Wolff's novel is for crime-fiction fans who like it action-packed and hard-edged. Written with feisty panache, it introduces Diamond, one of the most aggressive, ill-tempered, and wholly irresistible heroines to ever swagger across the page." —David Housewright, Edgar Award-winning author of *Dead Man's Mistress*, for *Widow's Run*
