Brisbane, 1984. It all started with a simple plan to secretly swap a mediocre horse with a faster one, and rake in the cash with a few well-placed bets. What could possibly go wrong? In *The Fine Cotton Fiasco*, Peter Hoysted and Pat Sheil brilliantly tell the scarcely believable tale of how - through a combination of horrendous mismanagement, terrible judgement and comically bad luck - the scheme gradually unravelled. How did a horse with white painted socks dripping onto the turf come to hold the hopes of

punters across Australia and beyond? How was a supposedly secret plan so widely advertised that even the Queensland Commissioner of Police placed a bet? And how much of a cover-up ensued in the aftermath of this absolute debacle? The story of *Fine Cotton* is the stuff of Australian legend. It features hardcore crims, likeable rogues and a supporting cast that ranged from the hapless to the hopeless - with some entirely innocent bystanders thrown in for good measure. Not every crazy scheme cooked up by a couple of inmates in Boggo Road Gaol would culminate in a story that will be told across the nation for the next hundred years. But this one did.

Property law is concerned with a wider variety of rights, obligations and interests than most other areas of law, and can prove daunting to those studying the subject for the first time. *Commonwealth Caribbean Property Law* sets out in a clear and concise manner the central principles of the law of real property in the region, in order to guide students through this often complex core subject area. In this new edition, the book has been fully revised and updated to include important new case law from the various Caribbean jurisdictions and an expanded appendix of working documents. With comprehensive coverage of the main topics studied by undergraduates, such as Leases, Co-Ownership, Restrictive Covenants, Easements, Mortgages, and Land Sale, this textbook is essential reading for LLB students in Caribbean universities and students on CAPE Law courses. The extensive coverage of land law from a Caribbean perspective and analysis of the substantive laws of several jurisdictions will also make this text an invaluable reference tool for practitioners.

Auditing and assurance service education has undergone dramatic change in at least three ways: (1) An awakening that practitioners have a comparative advantage in offering professional services that transcend the boundaries of financial statements; (2) An understanding that client strategies affect engagement risk; and (3) A transition away from first-person delivery by classroom instructors only and toward third-person discovery by students both within and outside of the classroom. Each has influenced the seventh edition.

To transcend the boundaries of financial statements, *Auditing and Assurance Services* exposes students both to the demand for and the supply of the profession's flagship service, financial statement audits, and to the nature of the value-added assurance services decision makers demand in the information age.

The purpose of this research paper is to try to clarify and evaluate the major issues and arguments in the debate on Import

Substitution Industrialization Strategy (ISI) between the neoclassical economists and the development economists. In particular, it will focus on some basic underlying models employed by the two schools of thought, rather than on specific policy recommendations given by either school. It will conclude that the critiques against ISI from the neoclassical economists are based on a static equilibrium model, which can not fully comprehend the dynamic relationship between growth and ISI at a macroeconomic level. This paper starts by examining the historical background and formative influences of ISI, then goes on to compare and contrast the structuralist rationales for ISI and neoclassical rationales against it. The conclusion I reached is that the fundamental rationales behind ISI-- the infant industry argument, external economies and linkages effects-- remain intellectually valid. The issue of terms of trade has important relevance to development economics but should be studied in a different context. The general conclusion of this paper is that import substitution as an industrialization strategy remains viable and may be of great importance or less developed countries that want to catch up economically with industrialized countries.

In this report the Law Commission sets out conclusions from its review of administrative redress in public and private law following consultation (Law Commission consultation paper 187, 2008, ISBN 9780118404532). The aim of the Commission's review was to consider when and how individuals should be able to obtain redress against public bodies that have acted in a substandard way. The report discusses individuals' access to remedies through the courts, as well as through avenues outside the court system, such as the public sector ombudsmen. In examining court-based remedies, the Commission concludes that there are good arguments for reform but, given the level of opposition to its earlier proposals and

the absence of available data on the costs of compensation paid by public bodies, work will not be taken forward on reviewing this area of the law. The report does, however, recommend that government should establish a process for collecting and publishing information on the cost of public compensation. The Commission is taking forward its review of the public sector ombudsmen, following a favourable response to its proposals. The scope of the review will be extended and include suggestions for improving citizens' access to the public sector ombudsmen, and increasing the powers of ombudsmen to refer points of law to the courts. The Commission will consult on its proposals for reform of public sector ombudsmen later in 2010 and expects to make final recommendations to government the following year.

What type of right is a property right? How are items of property classified for legal purposes? In this revised edition of *Personal Property Law*, Michael Bridge provides answers to these fundamental questions of property law. His critical analysis includes new material on insolvency, in particular the anti-deprivation principle and the *pari passu* rule, as well as comprehensive accounts of

recent case law (*OBG v Allan*, *Yearworth*, and *Datastream*,) and statutory developments. Widely considered to be the best short introduction to English personal property law, Bridge constructs an authoritative and systematic summary of this complex field for readers approaching the subject for the first time. It focuses on the acquisition, loss, transfer, and protection of interests in personal property law, and specific topics include:

ownership and possession; treatment of the separate contributions of the common law and equity to modern personal property law; discussion of modes of transfer; the means of protecting property interests; the resolution of disputes concerning title to personal property; the grant of security interests, and the issues arising out of the transformation and mixing of tangible personal property.
