(Workbook coming soon...) "I hate grammar! Why are English prepositions so difficult?" "I don't know why we say it that way. That's just how we speak." "There's no logic to prepositions. You just have to memorize them." Here's a secret for you: English prepositions are logical. Why your English Teacher was Wrong! Imagine a farm that grows a lot of different plants. On the surface, you see all the leaves and branches. These leaves and branches are the different dictionary definitions that seem to be disconnected and random. These "surface meanings" are what native speakers are aware of. However, underground we find the root of each plant. The root is the logic that all the dictionary definitions are based on. This underground level is part of the subconscious mind, so native speakers aren't consciously aware of it. This book teaches you the hidden, logical relationships that give prepositions their meaning. What's in this Book? This book contains seventeen of the most common and confusing prepositions in the English language. Each preposition has its own chapter that's divided into sections that guide you through the process and help you learn more easily and more effectively. The sections are: A) Example Sentences (there are over 450

examples); B) The Logic, which includes the key idea(s), an explanation, and etymology notes; C) Detailed explanations of how the logic works in the example sentences from section A; D) Verbs that often use each preposition; E) Phrasal verbs; and F) Idioms. At the end of the book are a few maps of the logical relationships.

Now in its fifth edition, *Doing History* offers a unique perspective on teaching and learning history in the elementary and middle grades. Through case studies of teachers and students in diverse classrooms and from diverse backgrounds, it shows children engaging in authentic historical investigations, often in the context of an integrated social studies curriculum. The premise is that children can engage in valid forms of historical inquiry—collecting and analyzing data, examining the perspectives of people in the past, considering multiple interpretations, and creating evidence-based historical accounts. Grounded in contemporary sociocultural theory and research, the text features vignettes in each chapter showing communities of teachers and students doing history in environments rich in literature, art, writing, discussion, and debate. The authors explain how the teaching demonstrated in the vignettes reflects basic principles of contemporary learning theory. *Doing History* emphasizes diversity of perspectives in two ways: readers encounter students from a variety of backgrounds, and students themselves look at history from multiple perspectives. It provides clear guidance in using multiple forms of assessment to evaluate the specifically historical aspects of children's learning.

The preposition is of particular interest to syntacticians, historians and sociolinguists of English, as its placement within a sentence is influenced by syntactic and sociolinguistic constraints, and by how the 'rules' regarding prepositions have changed over time, as a result of language change, of change in attitudes towards language, and of processes such as standardization. This book investigates preposition placement in the early and late Modern English periods (1500-1900), with a special focus on preposition stranding (The house which I live in) in opposition to pied piping (The house in which I live). Based on a large-scale analysis of precept and usage data, this study reassesses the alleged influence of late eighteenth-century normative works on language usage. It also sheds new light on the origins of the stigmatisation of preposition stranding. This study will be of interest to scholars working on syntax and grammar, corpus linguistics, historical linguistics and sociolinguistics.
