Believed to be the first banjo book of its kind, consisting entirely of Renaissance music, Renaissance and Early Music for Banjo provides the banjo player with growing material - the opportunity to play in a number of different keys besides G major, thus expanding their horizon by using unusual chords. the player will utilize different tempos that banjoists are not usually familiar with. Provides material for Classical Banjo enthusiasts who want to expand their playing, it also allows the player to deal with what was perhaps the earliest type of music theory known - that of the modal scales. It will teach the student the different types of form structures, and to get away from relying on the 5th string too much. This type of music would be extremely difficult to learn by ear, and so a book of tablatures would prove to be invaluable. Every piece is presented first in a vertical chordal arrangement, which was the way it was originally intended, and then arranged in a more linear horizontal style, using perpetual motion which is much more familiar with toda's player. Thus they are great for finger limbering exercises. Every tune is provided with analytical

commentaries and the book has a glossary of terms. In tablature only.

(Electric guitars were not invented until a decade later.) The chord voicings in these expertly crafted arrangements were selected so that the melody notes were always within reach to enable the user to play chord/melody style if desired. The lead sheets consist of lyrics and two sets of chord diagrams tenor and plectrum positioned throughout the arrangements. This collection of 45 songs
