On October 14-19, 1990, the 6th International Conference on the Conservation of Earthen Architecture was held in Las Cruces, New Mexico. Sponsored by the GCI, the Museum of New Mexico State Monuments, ICCROM, CRATERre-EAG, and the National Park Service, under the aegis of US/ICOMOS, the event was organized to promote the exchange of ideas, techniques, and research findings on the conservation of earthen architecture.

Presentations at the conference covered a diversity of subjects, including the historic traditions of earthen architecture, conservation and restoration, site preservation, studies in consolidation and seismic mitigation, and examinations of moisture problems, clay chemistry, and microstructures. In discussions that focused on the future, the application of modern technologies and materials to site conservation was urged, as was using scientific knowledge of existing structures in the creation of new, low-cost, earthen architecture housing.

Jacques Derrida's revolutionary theories about deconstruction, phenomenology, psychoanalysis, and structuralism, first voiced in the 1960s, forever changed the face of European and American criticism. The ideas in *De la grammatologie* sparked lively debates in intellectual circles that included students of literature, philosophy, and the humanities, inspiring these students to ask questions of their disciplines that had previously been considered improper. Thirty years later, the immense influence of Derrida's work is still igniting controversy, thanks in part to Gayatri Spivak's translation, which captures the richness and complexity of the original. This corrected edition adds a new index of the critics and philosophers cited in the text and makes one of contemporary criticism's most indispensable works even more accessible and usable.

Dictionnaire de la langue française Penguin UK

A central theme in the history of Old Regime authorship highlights the opportunities offered by a growing book trade to writers seeking to free themselves from patrons and live "by the pen." Accounts of this passage from patronage to market have explored in far greater detail the opportunities themselves—the rising sums paid by publishers and the progression of laws protecting literary property—than how and why writers would have seized on them, no doubt because the choice to do so has seemed an obvious or natural one for writers assumed to prefer economic self-sufficiency over elite protection. In *The Literary Market*, Geoffrey Turnovsky claims that there was nothing obvious or natural about the choice. Writers had been involved in commercial book publication since the earliest days of the printing press, yet had not necessarily linked these activities with their freedom to think and write. The association of autonomy and professionalism was forged, not given. Analyzing the literary market as a key articulation of the association, Turnovsky explores how in eighteenth-century polemics a rhetoric of commercial authorship came to signify independence for intellectuals. He finds the roots of the connection not in the claims of entrepreneurial writers to rights and income but in a world to which that of the modern author has been contrasted: the aristocratic culture of the seventeenth century. Aristocratic culture, he argues, generated a disparaging view of the professional author as one defined by activities tainting him or her as greedy and arrogant and therefore unworthy of protection and socially isolated. *The Literary Market* examines the story of the "birth of the author" in terms of the revalorization of this negative trope in Enlightenment-era debates about the radically changing role of writers in society.

In 1789 the West Indian colony of San Domingo supplied two-thirds of the overseas trade of France. The entire structure of what was arguably the most profitable colony in the world rested on the labour of half a million slaves. In 1791 the waves of unrest inspired by the French Revolution reached across the Atlantic dividing the loyalties of the white population of the island. The brutally treated slaves of Saint Domingo seized at this confusion and rose up in rebellion against masters. In this classic work, CLR James chronicles the only successful slave revolt in history and provides a critical portrait of their leader, Toussaint L'Ouverture, 'one of the most remarkable men of a period rich in remarkable men'.
