The first scientific volume to compile the modern analytical techniques for glass analysis, *Modern Methods for Analysing Archaeological and Historical Glass* presents an up-to-date description of the physico-chemical methods suitable for determining the composition of glass and for speciation of specific components. This unique resource presents members of Association Internationale pour l'Histoire du Verre, as well as university scholars, with a number of case studies where the effective use of one or more of these methods for elucidating a particular culturo-historical or historo-technical aspect of glass manufacturing technology is documented.

Céleste Boursier-Mougenot produces systems from everyday situations and objects, as well as devices, of which he then extracts their musical and sound potential. In this way, the artist reconfigures both the rhythmic and melodic possibilities of his materials, which he uses to generate sonic forms that he describes as being "living." Based on a close relationship with the architectural and spatial nature of the exhibition space, each system creates a framework favoring a multi-sensorial experience for the visitor. In 2015, Céleste Boursier-Mougenot is representing France at the 56th Contemporary Art Biennial in Venice. For the Palais de Tokyo, he has conceived a lakeside landscape, leading visitors into a tactile, visual and sonic experience, thus

changing their perception of the space. Visitors are drawn into a flow of images, creating doors leading into a hallucinatory journey. Book contents - "Zombie Choreography": Céleste Boursier-Mougenot in conversation with Daria de Beauvais, curator of Céleste Boursier-Mougenot's exhibition at the Palais de Tokyo - "Prepared universe": an essay by Frédérique Aït-Touati - Notes on a selection of the artist's works About the authors - Frédérique Aït-Touati is a stage director and researcher. She stages performances and plays that combine sciences, arts, and politics. She has published several studies on the relations between the arts and the sciences. - Daria de Beauvais is a curator at the Palais de Tokyo. Published on the occasion of Céleste Boursier-Mougenot's solo exhibition at the Palais de Tokyo, "acquaalta," 24.06 2015 - 13.09 2015

Julien Creuzet is an artist, videographer, performer and poet. He links forgotten, minority histories and imaginary representations of distant places with the social realities of the here and now. His exhibition at the Palais de Tokyo, which visit is rhythmized by a soundtrack composed specifically for it, takes the form of an immersive environment akin to a large public space suffused with the permanent state of tension that characterizes our era. It presents a multiplicity of different works and offers an array of disjointed narratives. Preferring anachronism to the linearity of established stories, Creuzet thus invokes poetry and politics to unfold a mobile imaginary that brings together different temporalities and geographies. Book contents - "An Interview or Not," interview between Julien Creuzet and Yoann Gourmel - "Flashing Light-Elegy," by Eva Barois De Caebel and Dorothee Dupuis. About the authors - Eva Barois De Caebel is an independent curator. She is in charge of publications at RAW Material Company—Center for Art Knowledge and Society (Dakar). - Dorothee Dupuis is an independent curator, art critic and publisher. She is the

founder and editor in chief of the magazine *Terremoto.mx*. - Yoann Gourmel is a curator at the Palais de Tokyo. He curated Julien Creuzet's solo show. A book published on the occasion of Julien Creuzet's solo show at the Palais de Tokyo, 20.02 - 12.05.2019

In recent years, funding for the conservation of cultural heritage has become increasingly difficult to obtain, and this trend shows no sign of changing significantly in the foreseeable future. The twelfth triennial meeting of the

International Committee for the Conservation of Mosaics, held in Sardinia in October 2014, focused on the theme of cost, broadly considered, relating specifically to the preservation and presentation of the world's mosaic heritage. This handsome, abundantly illustrated volume provides a comprehensive record of the conference. The volume's sixty-seven papers and posters, comprising contributions from more than one hundred leading experts in the field, reflect the conference's principal themes: cost, methods of survey and documentation, conservation and management, education and training, backing materials and techniques, presentation and display, and case studies. Papers are presented either in English, French, or Italian; there are abstracts in English and either French or Italian for all entries. The volume will be of interest to conservators, site managers, and others responsible for conserving the mosaic heritage, especially in these challenging times.
