Evidence-based bullying-prevention principles, policies, and practices to reduce peer cruelty and create safe, caring learning climates. Based on a practical, six-part framework for reducing peer cruelty and increasing positive behavior support, *End Peer Cruelty, Build Empathy* utilizes the strongest pieces of best practices and current research for ways to stop bullying. This is not a program, but a comprehensive process for reducing bullying from the inside out, involving the entire school community. Bullying-prevention and character education expert Michele Borba, who’s worked with over 1 million parents and

educators worldwide, offers realistic, research-based strategies and advice. Use the book on its own or to supplement an existing program. Digital content includes customizable forms from the book and a PDF presentation for use in professional development.

be prepared to develop solutions to a host of entrenched and complex issues, including systemic racism, massive environmental problems, deep political divisions, and future pandemics that will severely test the effectiveness and equity of our health policies. What better place to start that preparation than with a social studies curriculum that enables elementary students to envision and build a better world? educators unpack the oppressions that so often characterize the elementary curriculum—normalization, idealization, heroification, and dramatization—and show how common pitfalls can be replaced with creative solutions. The Basics of Special Needs Lulu.com

According to the most recent SEND Code of Practice, every teacher is a teacher of children with special educational needs and disabilities, and yet teachers often receive little or no training in this area. Despite their best intentions they are

therefore often ill-equipped to rise to the challenge of helping their students achieve the best possible educational outcomes. This comprehensive resource will equip primary and secondary teachers and SENDCos with the training and skills they need to fully support children with SEND in mainstream classrooms. Cheryl Drabble draws on her vast experience as a CPD leader, NQT mentor and her many years of working with SEND to share guidance, practical

activities and strategies for evaluating and strengthening your practice and that of your colleagues. The book provides a set of ready-to-use training plans, accompanied by PowerPoint slides available to download online for free, so you can train your colleagues in this essential area and ensure the best support possible for students with SEND across your school. In total, the book offers over 50 hours of CPD, equating to a cost of less than 50p per hour of

training!

This book serves as a guide for readers interested in improving school climate. Using 15 years of consultation and research in a variety of United States and foreign schools, the authors strip down the elements needed to create a healthy and productive school climate. The book challenges many commonly held notions about violence prevention

and outlines a simple and inexpensive formula for creating sustained change in any school. The book stresses understanding of the underlying processes involved in the bully-victim-bystander power dynamics, the value of altruism, and the use of natural leaders to begin and sustain change in a school climate. A note on the book's cover: Positive vibrations is taken from a Bob Marley song: 'Rastaman vibration positive, you can't live that negative way.' The song rallies people to be

positive and strong, and to speak honestly and stand up for their rights, while taking care of themselves. Although jamaican in origin, it has universal application to be a gentle warrior in one's personal life for the good of self and others.

End Peer Cruelty, Build Empathy Redleaf Press
Let's face it—teaching can be stressful. In this

generation of Common Core Standards and high-stakes testing, educators are often left without the time to plan positive behavioral supports or the sanity to cultivate compassionate relationships with their students. Even though they understand the critical relationship between behavior and instruction, they're often left with the same hair-pulling question: How can I empower—rather than overpower—my students, while still keeping a controlled classroom so

that I can teach and students can learn? The “Empower Program” delivers user-friendly strategies that are realistic for educators to implement and practical for their students to use. Included are: Classroom Scenarios “When this happens...” Research and Relevancy “Why did that happen...” Concrete Strategies “What can I do?” Ready-to-go Resources “How can I do this tomorrow?” This book is not going to antagonize teachers with theoretical concepts in ideal

contexts; it is instead going to respect teachers and their classroom frustrations and provide them with practical steps that make buzzwords like “behavior management”...well...manageable.

The movement away from teacher-centered toward student-centered learning and teaching (SCLT) in higher education has intensified in recent decades. Yet in spite of its widespread use in

literature and policy documents, SCLT remains somewhat poorly defined, under-researched and often misinterpreted. Against this backdrop, The Routledge International Handbook of Student-Centered Learning and Teaching in Higher Education offers an original, comprehensive and up-to-date overview of the fundamentals of SCLT and its discussion and applications in policy and practice. Bringing together 71 scholars from around the world, the volume offers a most

comprehensive and up-to-date overview of the fundamentals of SCLT and its applications in policy and practice; provides beacons of good practice that display how instructional expertise manifests itself in the quality of classroom learning and teaching and in the institutional environment; and critically discusses challenges, new directions and developments in pedagogy, course and study program design, classroom practice, assessment and

institutional policy. An essential resource, this book uniquely offers researchers, educators and students in higher education new insights into the roots, latest thinking, practices and evidence surrounding SCLT in higher education.

This book is designed to help teachers develop three strands of reinforcement in classroom management. Support, Interventions, and Reinforcement will be addressed in ways that help classroom teachers braid behavioral

techniques into their strategies. The book will focus on environmental changes, replacement behavior teaching, and impacting our reactions as educators so that we feed the replacement behavior and extinguish the target behavior.
