The past two decades have witnessed a resurgence of ecological ideas and ecological thinking in discussions of urbanism, society, culture, and design. The field of ecology has moved from classical determinism and a reductionist Newtonian concern with stability, certainty, and order in favor of more contemporary understandings of dynamic systemic change and the related phenomena of adaptability, resilience, and flexibility. But ecology is not simply a project of the natural sciences. Researchers, theorists, social commentators, and designers have all used ecology as a broader

idea or metaphor for a set of conditions and relationships with political, economic, and social implications. Projective Ecologies takes stock of the diversity of contemporary ecological research and theory--embracing Felix Guattari's broader definition of ecology as at once environmental, social, and existential--and speculates on potential paths forward for design practices. Where are ecological thinking and theory now? What do current trajectories of research suggest for future practice? How can advances in ecological research and modeling, in social theory, and in digital visualization inform, with greater rigor, more robust design thinking and practice? How does all of this point to potential paths forward in an age of climate change and the need for adaptation and mitigation? With Contributions of: Jesse M. Ruth Rogers and Rose Gray have an unswervingly clear vision of how food should be cooked: they take immense care over the ingredients and cook them as simply as possible. But one vitally important element in the art of preparing good food is one which we have increasingly lost sight of: seasonality. If you cook food in its right season it will inevitably taste better. And that's what River Cafe Cookbook Green is all about. Divided into months, the twelve chapters look at which vegetables, herbs, leaves, fungi and fruits are at their best at any given time, with information on how they are grown, which varieties to select and how to prepare them. The focus is also on organic produce, something in which Ruth and Rose have come to believe passionately. Meat and fish recipes are certainly included in the book, but the emphasis here is much more on vegetables, pasta recipes etc, in line with the way we are increasingly eating today. Fully illustrated throughout, and even larger than before, this cookbook is an education as well as a culinary treasure-trove.

Germany's master of wit and irony now for the first time in English. Hinrich takes his existence at face value. His wife, on the other hand, has always been more interested in the after-life. Or so it seemed. When she dies of a stroke, Hinrich goes through her papers, only to discover a totally different perspective on their marriage. Thus commences a dazzling intellectual game of shifting realities. Why Peirene chose to publish this book: 'This novella deals with the weighty subjects of marriage and death in an impressively light manner. Shifting realities evolve with a beautiful sense of irony and wit. It is a tone that allows us to reflect - without judgment - on misunderstandings, contradictory perceptions and the transience of life.' Meike Ziervogel 'Inventive and deeply affecting, this remarkable fiction lingers in the mind long after the last page has been turned.' CJ Schuler, Independent 'A heartbreaking tale of loss.' Nicholas Lezard, Guardian 'This is a tale of a marriage gone awry and the potential loneliness of cohabitation ... but Matthias Politycki leavens his grim tale with playful teasing of his reader's expectations.' Rebecca K. Morrison, Times Literary Supplement 'A teasing, testing story that makes you want to revisit and seek out those fascinating fragments you might just have missed.' Pam Norfolk, Lancashire Evening Post 'Elegantly realised.' Lucy Popescu, Independent on Sunday 'A page-turning pleasure . . . this novella has a supreme lightness of touch . . . It never feels weighed down by its own significance.' Rosie Goldsmith, BBC
