SHILOH MAGDALENA

The Oxford Book of Caribbean Short Stories Oxford University Press, USA
 In *Monks in Motion*, Jack Meng-Tat Chia explores why Buddhist monks migrated from China to Southeast Asia, and how they participated in transregional Buddhist networks across the South China Sea. This book tells the story of three prominent monks--Chuk Mor (1913-2002), Yen Pei (1917-1996), and Ashin Jinarakkhita (1923-2002)--and examines the connected history of Buddhist communities in China and maritime Southeast Asia in the

twentieth century.

Eurekas and Euphorias Oxford University Press

Azenha do Mar is a fishing community on the southwest coast of Portugal. It came into existence around forty years ago, as an outcome of the abandonment of work in the fields and of propitious ecological conditions. This book looks at the migration processes since the founding of the community and how they relate to the social inequalities for property and labour which prevail today. The book also reflects upon the personal experience of the ethnographer in the field balancing the importance of methodology on the one hand and fieldwork as a research process

on the other.

Human activities have taken place in the world's oceans and seas for most of human history. With such a vast number of ways in which the oceans can be used for trade, exploited for natural resources and fishing, as well as concerns over maritime security, the legal systems regulating the rights and responsibilities of nations in their use of the world's oceans have long been a crucial part of international law. The United Nations Convention on the Law of the Sea comprehensively defined the parameters of the law of the sea in 1982, and since

the Convention was concluded it has seen considerable development. This Oxford Handbook provides a comprehensive and original analysis of its current debates and controversies, both theoretical and practical. Written by over forty expert and interdisciplinary contributors, the Handbook sets out how the law of the sea has developed, and the challenges it is currently facing. The Handbook consists of forty chapters divided into six parts. First, it explains the origins and evolution of the law of the sea, with a particular focus upon the role of key publicists such as Hugo Grotius and John Selden, the gradual development of state practice, and the creation of the 1982 UN Convention. It then reviews the components which comprise the maritime domain, assessing their definition, assertion, and recognition. It also analyses the ways in which coastal states or the international community can assert control over areas of the sea, and the management and regulation of each of the maritime zones. This includes investigating the development of the mechanisms for maritime boundary delimitation, and the decisions of the International Tribunal for the Law of the

Sea. The Handbook also discusses the actors and intuitions that impact on the law of the sea, considering their particular rights and interests, in particular those of state actors and the principle law of the sea institutions. Then it focuses on operational issues, investigating longstanding matters of resource management and the integrated oceans framework. This includes a discussion and assessment of the broad and increasingly influential integrated oceans management governance framework that interacts with the traditional law of the sea. It considers six distinctive regions that have been pivotal to the development of the law of the sea, before finally providing a detailed analysis of the critical contemporary issues facing the law of the sea. These include threatened species, climate change, bioprospecting, and piracy. The Handbook will be an invaluable and thought-provoking resource for scholars, students, and practitioners of the law of the sea.

The Sea DigiCat

Malevolent, mysterious, vast, the ocean has always sparked our fascination and sense of adventure, giving rise to a

remarkable vein of narrative deftly mined here by editor Tony Tanner. In the twenty-seven tales of *The Oxford Book of the Sea*, masters of the art tell of men on ships, grappling with themselves, their fellow sailors, and the trials of the sea: from hurricane winds to the frustrating calm, from swirling currents to rampaging whales. Here is the work of Jack London, Rudyard Kipling, Stephen Crane, C.S. Forester, Ernest Hemingway, and of course Conrad. Along with the essential stories come unexpected gems by writers not known for their seafaring bent such as William Faulkner, F. Scott Fitzgerald, E.M. Forster, and Edgar Allan Poe. Some of the finest writers in the English language have been drawn to the subject of life at sea, with its dangers, loneliness, and triumphs. *The Oxford Book of the Sea* gathers together some of the best examples of the form, offering moving prose, fascinating insight into the human condition, and the simple pleasure of tales of high adventure.

Oxford University Press, USA

The field of detective fiction is vast, and *The Oxford Book of Detective Stories* brings together the best short fiction from

around the world to show how different nationalities have imposed their own stamp on the genre. As well as English and American stories from acknowledged masters such as Ellery Queen, Dashiell Hammett, and Agatha Christie, the anthology includes stories by Simenon, Conan Doyle, Sarah Paretsky, and Ian Rankin, and roams across Europe and further afield to embrace Japan, Denmark, Holland, Italy, Argentina, Czechoslovakia, and other countries. Women detectives, police procedurals, the amateur sleuth, locked-room mysteries are all here, and in her introduction Patricia Craig examines the figure of the detective in international literature.

The Oxford Book of London OUP Oxford
An anthology of writings illustrating humans' changing vision of the sea features passages from the work of Melville, Conrad, Darwin, Dickens, E.B. White, Dickinson, and Woolf.

The Oxford Book of Sea Stories Oxford University Press, USA
Contemporary public discourses about the ocean are routinely characterized by scientific and environmentalist narratives that imagine and idealize marine spaces in

which humans are absent. In contrast, this collection explores the variety of ways in which people have long made themselves at home at sea, and continue to live intimately with it. In doing so, it brings together both ethnographic and archaeological research – much of it with an explicit Ingoldian approach – on a wide range of geographical areas and historical periods.

Monks in Motion Oxford University Press, USA

Kenneth McPherson shows that for millennia the Indian Ocean had a profound influence on the lives of the people who lived on its shores. Fishermen, sailors and merchants traveled its waters linking the world's earliest civilizations from Africa to East Asia in a complex web of relationships. The ocean was also a highway for the exchange of religions, cultures and technologies, giving the Indian Ocean region an identity as a largely self-contained "world." This important study traces the history of the Indian Ocean from ages past to the present day.

The Sea Commands Berghahn Books
The Caribbean has produced one of the

most vigorous and exciting bodies of poetry of the last one hundred year. The Oxford Book of Caribbean Verse is the only contemporary anthology to present the best of the English-language poetry of the region alongside selections from the poetry of both the French and Spanish Caribbean. Featuring a range of established poets from Derek Walcott to Jesus Cos Causse, Olive Senior to Aime Cesaire, as well as exciting new voices, this is a rich and challenging book.

The Oxford Book of Latin American Poetry Oxford Books of Prose & Verse
Selected and introduced by Richard Dawkins, *The Oxford Book of Modern Science Writing* is a celebration of the finest writing by scientists for a wider audience - revealing that many of the best scientists have displayed as much imagination and skill with the pen as they have in the laboratory. This is a rich and vibrant collection that captures the poetry and excitement of communicating scientific understanding and scientific effort from 1900 to the present day. Professor Dawkins has included writing from a diverse range of scientists, some of whom need no introduction, and some of

whose works have become modern classics, while others may be less familiar - but all convey the passion of great scientists writing about their science.

Redefines the great canon of American poetry from its origins in the 17th century right up to the present.

The Oxford Book of Sea Stories Reaktion Books

"This second edition provides significant new material on topics that have come to prominence in recent times, such as oceanography and marine archaeology: key contributions on these subjects from marine expert Dr. Martin Angel at Southampton Oceanography Centre include climate change, environmental issues, marine pollution, and marine wildlife. Among the many brand new entries to this edition are up-to-the-minute articles on underwater vehicles, tsunamis, warfare at sea, marine pollution, the Economic Exclusion Zone, and ship preservation." "This Companion also includes authoritative entries on maritime history: its naval battles, including Pearl

Harbour and Trafalgar; its great ships, from Noah's Ark and the Bounty to the Titanic and the Mary Rose; and its most famous individuals, both real and fictional, including Christopher Columbus, Horatio Nelson, and Robinson Crusoe."--Jacket.

In 1946 the first of the Dead Sea Scroll discoveries was made near the site of Qumran, at the northern end of the Dead Sea. Despite the much publicized delays in the publication and editing of the Scrolls, practically all of them had been made public by the time of the fiftieth anniversary of the first discovery. That occasion was marked by a spate of major publications that attempted to sum up the state of scholarship at the end of the twentieth century, including *The Encyclopedia of the Dead Sea Scrolls* (OUP 2000). These publications produced an authoritative synthesis to which the majority of scholars in the field subscribed, granted disagreements in detail. A decade or so later, *The Oxford Handbook of the Dead Sea Scrolls* has a different objective and character. It seeks to probe the main disputed issues in the study of the Scrolls.

Lively debate continues over the archaeology and history of the site, the nature and identity of the sect, and its relation to the broader world of Second Temple Judaism and to later Jewish and Christian tradition. It is the Handbook's intention here to reflect on diverse opinions and viewpoints, highlight the points of disagreement, and point to promising directions for future research.

The Boundless Sea Oxford University Press, USA

'So you won't sell me your soul?' said the Devil. 'Thank you,' replied the student, 'I had rather keep it myself, if it's all the same to you.' So begins this rich and intriguing collection of fantasy stories. Figures such as the devil, trolls and werewolves, sorcerers and dragons have long been part of the human psyche, and the authors of these marvellous tales draw upon this deep well of images, characters, and landscapes with great imagination and subtlety. With thirty-one tales by writers as diverse as John Buchan and Mervyn Peake, Angela Carter and Terry Pratchett, this is an anthology for the newcomer and dedicated fan alike. *The Oxford Handbook of the Law of the*

The Oxford Book of Sea Songs Oxford University Press

No city in the world has so consistently stimulated the literary imagination as London. Over the centuries, writers, poets, historians, artists, and simple observers have chronicled the life and growth of this intriguing city. In his sparkling anthology, Paul Bailey has captured the essence of London's allure, from the Middle Ages to the present day, with wit, humor, and pathos.

The Oxford Book of American Short Stories Berghahn Books

The Caribbean is the source of one of the richest, most accessible, and yet

technically adventurous traditions of contemporary world literature. This collection extends beyond the realm of English-speaking writers, to include stories published in Spanish, French, and Dutch. It brings together contributions from major figures such as V. S. Naipaul, and Gabriel Garcia Marquez, and work from the exciting new generation of Caribbean writers represented by Edwidge Danticat, and Jamaica Kincaid.

The Waterless Sea Oxford University Press, USA

For humans the sea is, and always has been, an alien environment. Ever moving and ever changing in mood, it is a place without time, in contrast to the land which is fixed and scarred by human activity giving it a visible history. While the land is familiar, even reassuring, the sea is unknown and threatening. By taking to the sea humans put themselves at its mercy. It has often been perceived to be an alien power teasing and cajoling. The sea may give but it takes. Why, then, did humans become seafarers? Part of the answer is that we are conditioned by our genetics to be acquisitive animals: we like to acquire rare materials and we are eager for

esoteric knowledge, and society rewards us well for both. Looking out to sea most will be curious as to what is out there - a mysterious island perhaps but what lies beyond? Our innate inquisitiveness drives us to explore. Barry Cunliffe looks at the development of seafaring on the Mediterranean and the Atlantic, two contrasting seas — the Mediterranean without a significant tide, enclosed and soon to become familiar, the Atlantic with its frightening tidal ranges, an ocean without end. We begin with the Middle Palaeolithic hunter gatherers in the eastern Mediterranean building simple vessels to make their remarkable crossing to Crete and we end in the early years of the sixteenth century with sailors from Spain, Portugal and England establishing the limits of the ocean from Labrador to Patagonia. The message is that the contest between humans and the sea has been a driving force, perhaps the driving force, in human history.

Harvesting the Sea Oxford University Press

This volume offers a survey of American short fiction in 59 tales that combine classic works with 'different, unexpected gems', which invite readers to explore a

wealth of important pieces by women and minority writers. Authors include: Amy Tan, Alice Adams, David Leavitt and Tim O'Brien.

Conquering the Ocean Oxford University Press, USA

A collection of fascinating stories,

entertainingly told, revealing the human face of science. Eureka and Euphorias encompasses some 200 anecdotes brilliantly illustrating scientists in all their shapes: the obsessive and the dilettantish, the genial, the envious, the preternaturally brilliant and the slow-witted who

sometimes see further in the end, the open-minded and the intolerant, recluses and arrivistes. Told with wit and relish by Walter Gratzer, here are stories to delight, astonish, instruct, and most especially, entertain the general reader, scientist and non-scientist alike.
