Understanding Aleister Crowley's Thoth
Tarot New York : G. Schirmer
This open access volume examines
experiences of contemporary Latvian
migrants, thereby focusing on reasons for
emigration, processes of integration in
their host countries, and - in the case of
return migration - re-integration in their
home country. In the context of European
migration, the book describes the case of
Latvia, which is interesting due to the
multiple waves of excessive emigration,
continuously high migration potential

among European Union member states, and diverse migrant characteristics. It provides a fascinating insight into the social and psychological aspects linked to migration in a comparative context. The data in this volume is rich in providing individual level perspectives of contemporary Latvian migrants by addressing issues such as emigrants' economic, social and cultural inclusion in the host country, ties with the home country and culture, interaction with public authorities both in the host and home country, political views, and perspectives on the permanent settlement in migration or return. Through topics such as assimilation of children, relationships between emigrants representing different emigration waves, the complex identities and attachments of minority emigrants, and the role of culture and media in identity formation and presentation, this book addresses topics that any contemporary emigrant community is faced with.

Music and Science in the Age of Galileo
features twelve new essays by leading
specialists in the fields of musicology,
history of science, astronomy, philosophy,
and instrument building that explore the
relations between music and the scientific
culture of Galileo's time. The essays take a
broad historical approach towards
understanding such topics as the role of
music in Galileo's experiments and in the
scientific revolution, the musical formation
of scientists, Galileo's impact on the art
and music of his time, the scientific
knowledge of instrument builders, and the
scientific experiments and cultural context
of Galileo's father, Vincenzo Galilei. This
volume opens up new areas in both
musicology and the history of science, and
twists together various strands of parallel
work by musicians and scientists on
Galileo and his time. This book will be of
interest to musicologists, historians of
science and those interested in
interdisciplinary perspectives of the late
Renaissance -- early Baroque. For its

variety of approaches, it will be a valuable
collection of readings for graduate
students, and those seeking a more
integrated approach to historical
problems. The book will be of interest to
historians of science, philosophers,
musicologists, astronomers, and
mathematicians.

The book focuses on implications of
traditional and processed foods for autism
spectrum disorder (ASD) intervention and
management. Numerous phytonutrients
and pharmacologically active compounds
in edible natural products and diet could
influence and offer protection to neuronal
dysfunction that occurs due to ASD. The
neuroprotective effects of various fruits,
vegetables, nuts and seeds
phytochemicals, and other natural
bioactive ingredients against ASD and
related conditions are discussed. Topics
such as the possible neuroprotective
mechanism of action of these foods and
the therapeutic role of antioxidants in
relation to ASD are addressed. This book
also highlights the scope of using anti-
inflammatory agents and antioxidants to

promote neurogenesis and improve other symptoms in ASD. It emphasizes personalized nutritional approaches with dietary management of neurodevelopmental disorders/ASD cases. Information in this book is relevant to researchers in the field of complementary and alternative medicine, nutraceuticals, neuroscience, agriculture, nutrition, and food science. This volume is beneficial to students of varying levels, and across multiple disciplines.

Originally published in 2003, *Understanding Aleister Crowley's Thoth Tarot* has proved to be the essential guide to accessing the unique symbolism and meaning of Aleister Crowley's remarkable tarot deck along with the deeply textured artwork of Lady Frieda Harris. Crowley authority Lon Milo DuQuette starts by providing an insightful historical background before delving into descriptions of each card in depth, from a tarot perspective and from an expanded, magickal point of view. He first describes the tarot meaning of each card in detail and then explains all the other attributions Crowley intended. This unique guide has been updated with a new introduction that

provides information on the unicursal hexagram cards included with the deck but never explained. Replaces ISBN 9781578632763

NATIONAL BESTSELLER • From the New York Times bestselling author of *The Wind-Up Bird Chronicle* and one of the world's greatest storytellers comes "an insistently metaphysical mind-bender" (*The New Yorker*) about a teenager on the run and an aging simpleton. Here we meet 15-year-old runaway Kafka Tamura and the elderly Nakata, who is drawn to Kafka for reasons that he cannot fathom. As their paths converge, acclaimed author Haruki Murakami enfolds readers in a world where cats talk, fish fall from the sky, and spirits slip out of their bodies to make love or commit murder, in what is a truly remarkable journey. "As powerful as *The*

Wind-Up Bird Chronicle.... Reading Murakami ... is a striking experience in consciousness expansion." —The Chicago Tribune

Photography possesses a powerful ability to bear witness, aid remembrance, shape, and even alter recollection. In *Beyond Memory: Soviet Nonconformist Photography and Photo-Related Works of Art*, the general editor, Diane Neumaier, and twenty-three contributors offer a rigorous examination of the medium's role

in late Soviet unofficial art. Focusing on the period between the mid-1950s and the late 1980s, they explore artists' unusually inventive and resourceful uses of photography within a highly developed Soviet dissident culture. During this time, lack of high-quality photographic materials, complimented by tremendous creative impulses, prompted artists to explore experimental photo-processes such as camera and darkroom manipulations, photomontage, and hand-coloring. Photography also took on a provocative array of forms including photo installation, artist-made samizdat (self-published) books, photo-realist painting, and many other surprising applications of the flexible medium. *Beyond Memory* shows how innovative conceptual moves and approaches to form and content-echoes of Soviet society's coded communication and a Russian sense of absurdity-were common in the Soviet cultural underground. Collectively, the works in this anthology demonstrate how

late-Soviet artists employed irony and invention to make positive use of difficult circumstances. In the process, the volume illuminates the multiple characters of photography itself and highlights the leading role that the medium has come to play in the international art world today. *Beyond Memory* stands on its own as a rigorous examination of photography's place in late Soviet unofficial art, while also serving as a supplement to the traveling exhibition of the same title.
