English as a Second Language For well over a half century, American Universities and Colleges has been the most

comprehensive and highly respected directory of four-year institutions of higher education in the United States. A two-volume set that *Choice* magazine hailed as a most important resource in its November 2006 issue, this revised edition features the most up-to-date statistical data available to guide students in making a smart yet practical decision in choosing the

university or college of their dreams. In addition, the set serves as an indispensable reference source for parents, college advisors, educators, and public, academic, and high school librarians. These two volumes provide extensive information on 1,900 institutions of higher education, including all accredited colleges and universities that offer at least the

baccalaureate degree. This essential resource offers pertinent, statistical data on such topics as tuition, room and board; admission requirements; financial aid; enrollments; student life; library holdings; accelerated and study abroad programs; departments and teaching staff; buildings and grounds; and degrees conferred. Volume two of the set provides four indexes,

including an institutional Index, a subject accreditation index, a levels of degrees offered index, and a tabular index of summary data by state. These helpful indexes allow readers to find information easily and to make comparisons among institutions effectively. Also contained within the text are charts and tables that provide easy access to comparative data on relevant topics.

This volume presents a multinational perspective on the juxtaposition of language and politics. Bringing together an international group of authors, it offers theoretical and historical constructs on bilingualism and bilingual education. It highlights the sociocultural complexities of bilingualism in societies

where indigenous and other languages coexist with colonial dominant and other prestigious immigrant languages. It underlines the linguistic diaspora and expansion of English as the world's lingua franca and their impact on indigenous and other minority languages. Finally, it features models of language teaching and teacher education. This book challenges the

existent global conditions of non-dominant languages and furthers the discourse on language politics and policies. It does so by pointing out the need to change the bilingual/multilingual educational paradigm across nations and all levels of educational systems. Resources in education

This book presents the first detailed and comprehensive study of information highlighting in

advanced learner language, echoing the increasing interest in questions of near-native competence in SLA research and contributing to the description of advanced interlanguages. It examines the production and comprehension of specific means of information highlighting in English by native speakers and German learners of English as a foreign language,

presenting triangulated experimental and learner corpus data as corroborating evidence. The study focuses on learners' use of discourse-pragmatically motivated variations of the basic word order such as inversion, preposing, and it- and wh-clefts, an underexplored field in SLA research to date. The book also provides a critical re-assessment of the study of pragmatics within SLA. It has largely been neglected to date that L2 pragmatic knowledge includes more than the sociopragmatic and pragmalinguistic abilities for understanding and performing speech acts. Thus, the book argues for an extension of the scope of inquiry in interlanguage pragmatics beyond the cross-cultural investigation of speech acts. It also discusses pedagogical implications for foreign language teaching and will be of interest to applied linguists and SLA researchers, language teachers and curriculum designers.

Together they illustrate Halliday's continuing intellectual enthusiasm and openness to new linguistic trends, even

though his own development has always been by accretion, rather than revolution. So, the reader is fascinated to discover how much of the early work has been retained, often in a considerably modified form, in the 21st century version of Systemic Functional Grammar." - Malcolm Coulthard, Professor of English Language and Linguistics, University of Birmingham, UK

This book provides readers with insights into how Singapore school leaders are actively engaged in the transformation of the Singapore education system. It brings to attention crucial elucidations of the increasing demand and complexity placed on school leaders

through the use of case studies. Each chapter in the book focuses on a particular issue which has become important or has gained renewed importance in the Singapore education system. The chapters first provide a background to the theme under examination and a theoretical basis for discussion. They then narrate the case that shows how school leaders interpret and implement

policy initiatives in their respective schools or lead change in that area. The case studies span over a wide range of domains such as instructional leadership, assessment leadership, stakeholder engagement, professional learning communities, and school branding. The data collected from these case studies came primarily from interviews of educators in their respective

school contexts, in addition to other sources of data such as artifacts. Each case study highlights descriptions, interpretations, and perspectives across school contexts, which is consistent with the proposition that school leadership is very much shaped by context. At the end of each chapter, there are guiding questions to help readers critically analyse and

reflect on the main learning points of the case. <i>A Guide to the ITT NC</i> Springer The definitive work on the subject, this Dictionary - available again in its	eighth edition - gives a full account of slang and unconventional English over four centuries and will entertain and inform all language-lovers. <u>Forum</u> EnglishModel	Exam Papers : Paper 1 & 2.
