JOHNSON DANIEL

**Seluk-Beluk
Hiperlipidemia**
wawasan Ilmu
The World Health

Organization (WHO) has published an annual report on global control of tuberculosis (TB) every year since 1997. The main purpose of the report is to provide a

comprehensive and up-to-date assessment of the TB epidemic and progress made in TB care and control at global, regional and country levels. This fifteenth annual report contains more up-to-date information than any previous report in the series, following earlier data collection and the completion of the production cycle within a calendar year. This report includes the same wealth of information as previous reports in the series, but three new features are worth highlighting. First, the data are more up-to-date than those included in previous reports. Data up to and including 2009 are presented for almost all key indicators; financial data extend to 2011. Second, results from

several analyses undertaken for the first time in 2010 are included. Examples are: (i) for each of the 22 high-burden countries (HBCs), trends in rates of TB incidence and mortality since 1990 combined with projections of whether the target of halving the 1990 mortality rate by 2015 will be achieved; (ii) estimates of the lives saved by TB control between 1995 and 2009 and projections of the additional lives that could be saved up to 2015, including separate estimates for women and children; (iii) assessment of progress in implementing and financing TB care and control against the targets included in a just-released and updated version of the

Global Plan to Stop TB; and (iv) a new and compelling compilation of data showing the contribution that PP PP M can make to case detection. Third, country profiles are available for all countries (rather than the 22 HBCs only) and can be downloaded online at www.who.int/tb/data, always drawing on the latest data available in WHO's global TB database. Annex 1 explains the methods that were used to produce estimates of disease burden. Annex 2 contains summary tables that provide global, regional and country-specific data for the main indicators of interest. Country profiles for all countries are available online at www.who.int/tb/data; their content is

advertised in Annex 3.

Catalog Medical Science of Thesis Abstract Lippincott Williams & Wilkins

The author provides an introduction to patient counselling for pharmacy students and practicing pharmacists. She outlines the various ways of incorporating effective patient counselling into pharmacy practice and gives specific recommendations for developing strong counselling techniques.

Anemia pada remaja putri merupakan masalah gizi kesehatan masyarakat yang perlu mendapatkan perhatian dari semua pihak. Status anemia pada remaja putri dapat memengaruhi status gizi saat mereka remaja dan saat mereka menjadi ibu hamil, melahirkan, dan menyusui serta dapat berdampak pada status kesehatan dan gizi bayi yang akan dilahirkan. Upaya

pencegahan dan penanggulangan masalah anemia pada remaja putri perlu melibatkan multisektor dan multipihak.

Perspektif berbagai sektor perlu diulas untuk memperkuat dasar dan bukti pencapaian intervensi yang dilakukan. Buku ini mengulas masalah anemia pada remaja putri berdasarkan perspektif sosioekologi, dengan mengacu pada teori model sosioekologi. Sehingga diharapkan dapat memperkaya khazanah tentang masalah anemia pada remaja putri, khususnya di Indonesia.

Family Support as Reflective Practice

Penerbit Graniti

A state-of-the-art review of research findings that contribute to an understanding of

hypertension and the best measures for its prevention and control, whether in individual patients or entire populations. Noting that elevated blood pressure is a massive health problem in almost every country, the report argues that programs for hypertension control should be an integral part of all national health care systems. With this goal in mind, the report aims to help policy makers appreciate the significance and complexities of hypertension, understand the options available for control and then select the most appropriate mix of interventions. Details range from recommended procedures for obtaining an accurate

assessment of blood pressure through advice on the best drugs for first-line treatment of hypertensive patients to a discussion of ways to educate populations about relevant lifestyle changes. Throughout the report, population-based and individual approaches are presented as complementary, synergistic strategies for hypertension control. To assist physicians as well as policy makers, the report includes abundant recommendations based on the best scientific evidence for the management of different patient groups. A section on the clinical assessment of the hypertensive patient explains the components of a

coherent step-wise diagnostic process involving history taking physical examination and laboratory investigation. Included are an assessment of the most suitable drugs for first-line treatment and guidelines for developing management plans for mild hypertension, moderate and severe hypertension, resistant hypertension and hypertensive emergencies. In view of the need to assure that scarce resources are invested wisely, the report also discusses and compares the cost-effectiveness of different management strategies.

The Global Rise of Authoritarianism in the 21st Century Penerbit Andi

This introduction to abnormal psychology addresses the causes of psychopathology and issues in the treatment and prevention of abnormal behavior.

Principles of Ambulatory Medicine
Lippincott Williams & Wilkins

Indonesia is a semi-annual journal devoted to the timely study of Indonesia's culture, history, government, economy, and society. It features original scholarly articles, interviews, translations, and book reviews. Published by Cornell University's Southeast Asia Program since April 1966, the journal provides area scholars and interested readers with contemporary analysis of Indonesia and an extensive

archive of research pertaining to the nation and region.

kepatuhan CRC Press Offering a

comprehensive look at physical therapy science and practice, Guccione's Geriatric Physical Therapy, 4th Edition is a perfect resource for both students and practitioners alike.

Year after year, this text is recommended as the primary preparatory resource for the Geriatric Physical Therapy Specialization exam. And this new fourth edition only gets better. Content is thoroughly revised to keep you up to date on the latest geriatric

physical therapy protocols and conditions. Five new chapters are added to this edition to help you learn how to better manage common orthopedic, cardiopulmonary, and neurologic conditions; become familiar with functional outcomes and assessments; and better understand the psychosocial aspects of aging. In all, you can rely on Guccione's Geriatric Physical Therapy to help you effectively care for today's aging patient population. Comprehensive coverage of geriatric physical therapy prepares students and clinicians to provide thoughtful, evidence-based care for aging patients. Combination of foundational knowledge and

clinically relevant information provides a meaningful background in how to effectively manage geriatric disorders. Updated information reflects the most recent and relevant information on the Geriatric Clinical Specialty Exam. Standard APTA terminology prepares students for terms they will hear in practice. Expert authorship ensures all information is authoritative, current, and clinically accurate. **NEW!** Thoroughly revised and updated content across all chapters keeps students up to date with the latest geriatric physical therapy protocols and conditions. **NEW!** References located at the end of each chapter point students

toward credible external sources for further information. NEW! Treatment chapters guide students in managing common conditions in orthopedics, cardiopulmonary, and neurology. NEW! Chapter on functional outcomes and assessment lists relevant scores for the most frequently used tests. NEW! Chapter on psychosocial aspects of aging provides a well-rounded view of the social and mental conditions commonly affecting geriatric patients. NEW! Chapter on frailty covers a wide variety of interventions to optimize treatment. NEW! Enhanced eBook version is included with print purchase, allowing students to access all of the text, figures, and references

from the book on a variety of devices. *Farmasi Rumah Sakit* Penerbit Graniti Penyakit Tuberkulosis (TB) merupakan penyakit infeksi kronis menular yang masih merupakan masalah kesehatan masyarakat di dunia. Indonesia salah satu negara yang berkontribusi besar dalam menyumbang kasus TB di dunia. Saat ini tuberkulosis juga masih menjadi beban di Indonesia. Saat ini tuberkulosis masih menjadi masalah utama kesehatan di Indonesia. Penyakit TB dipengaruhi oleh beberapa faktor pejamu. Adapun faktor yang berkaitan dengan pejamu antara lain usia, jenis kelamin, ras, sosial ekonomi, kebiasaan hidup, status perkawinan, pekerjaan, keturunan,

nutrisi, dan imunitas.

Community & Public Health Nursing: Promoting the Public's Health

Sanata Dharma University Press Unity in Diversity and the Standardisation of Clinical Pharmacy Services represents the proceedings of the 17th Asian Conference on Clinical Pharmacy (ACCP 2017), held 28–30 July 2017 in Yogyakarta, Indonesia. The primary aim of ACCP 2017 was to bring together experts from all fields of clinical pharmacy to facilitate the discussion and exchange of research ideas and results. The conference provided a forum for the dissemination of knowledge and exchange of experiences. As such, it

brought together clinical pharmacy scholars, pharmacy practitioners, policy makers and stakeholders from all areas of pharmacy society and all regions of the world to share their research, knowledge, experiences, concepts, examples of good practice, and critical analysis with their international peers. This year also marks the celebration of 20 years of ACCP. Central themes of the conference and contributed papers were Clinical Pharmacy, Social and Administrative Pharmacy, Pharmacy Education, Pharmacoeconomics, Pharmacoepidemiology, Complementary and Alternative Medicine (CAM) and a number of

related topics in the field of Pharmacy.

Social Psychology and Cultural Context

Lippincott Williams & Wilkins

Family support is an increasingly important strategic approach to welfare services for children and families. This invaluable resource for all professionals engaged in the development and delivery of these services is underpinned by reflective practice values and structured around four themes: * conceptual frameworks and vocabulary (defining) * policy and organisational structures and processing (planning) * tools for creative practice (doing) * approaches to evaluation (measuring).

Contributors from around the world provide international perspectives on core issues in family support. These include the importance of community, the role of statutory and voluntary agencies, youth advocacy, culturally appropriate family support, child protection, disability services and effective means of evaluation. Providing a combination of clear theoretical frameworks and practical guidance, with clear 'how to' messages and a strong emphasis on evaluation, this book will be of interest to social workers, care staff, teachers, community development and police officers, students, policy-makers, evaluators and

all those working in all areas of family support.

SINOPSIS Diabetes
Melitus hingga saat ini
masih merupakan
penyebab mortalitas
dan morbiditas yang
tinggi di Indonesia.

Kepatuhan
penggunaan obat
merupakan faktor yang

menentukan
keberhasilan dalam
pengobatan dan
mencegah
berkembangnya
penyakit ini ke arah
yang lebih berbahaya.
Pengetahuan
merupakan salah satu
faktor yang
mempengaruhi
kepatuhan, dimana
dengan tingkat
pengetahuan yang baik
akan membuat pasien
mengerti mengenai
penyakitnya dan
mengerti bagaimana
harus mengubah
perilakunya dalam
menghadapi penyakit
tersebut. Hal inilah
yang dikaji dalam buku
ini, apakah teori yang
mengatakan makin
tinggi tingkat
pengetahuan akan
makin patuh seorang
pasien dalam
mengonsumsi
obatnya.
