In this book Prof. (UCN)  
Dr. Christian Hanisch has  
now published his  
dissertation with the  
scientific investigations,

statistical evaluations and the results. The research shows that trauma, depression, anxiety and much else can be caused by mental blockages and how to counteract this through neuro-coaching. How psychotherapy or coaching, based on physical and physiological - especially neuroelectric - principles can work, he makes clear on the basis of comprehensible test series.

### **Research and Teaching at the Intersection**

Diaphanes

In the past few decades,

scientists of human nature—including experimental and cognitive psychologists, neuroscientists, evolutionary theorists, and behavioral economists—have explored the way we arrive at moral judgments. They have called into question commonplaces about character and offered troubling explanations for various moral intuitions.

Research like this may help explain what, in fact, we do and feel. But can it tell us what we ought to

do or feel? In *Experiments in Ethics*, the philosopher Kwame Anthony Appiah explores how the new empirical moral psychology relates to the age-old project of philosophical ethics. Some moral theorists hold that the realm of morality must be autonomous of the sciences; others maintain that science undermines the authority of moral reasons. Appiah elaborates a vision of naturalism that resists both temptations. He traces an intellectual genealogy of the

burgeoning discipline of "experimental philosophy," provides a balanced, lucid account of the work being done in this controversial and increasingly influential field, and offers a fresh way of thinking about ethics in the classical tradition. Appiah urges that the relation between empirical research and morality, now so often antagonistic, should be seen in terms of dialogue, not contest. And he shows how experimental philosophy, far from being something new, is

actually as old as philosophy itself. Beyond illuminating debates about the connection between psychology and ethics, intuition and theory, his book helps us to rethink the very nature of the philosophical enterprise.  
Psychology Zed Books Ltd.  
"Fundamentals of Human Resource Management covers a wide range of HR topics and shows students the importance of human resource management within the restraints of a compact semester. Offering a wealth of

functional examples and applications, this text emphasizes the notion that all managers need basic human resource management skills."-- Publisher's website.

### **Fundamentals of Investment Appraisal**

Logos Verlag Berlin GmbH  
This work provides up-to-date discussions of recent developments in modern macroeconomics; it also features interviews with leading economists that aim to shed new light on the major intellectual and policy issues of the 1990s.  
*Macroeconomics and New*

*Macroeconomics* Walter de Gruyter GmbH & Co KG  
Over the past four decades the world's most developed economies have experienced rapid de-industrialization. More than three-quarters of employment is now in the service industry. This book is the first systematic examination of the political economy of this transition and explores its profound implications for the economy, politics, and society.

**A Listening Heart** BoD - Books on Demand

This book explores new approaches to successful innovation - with all uncertainty. Its focal points are management of the informal and a new perspective of human work: innovation work is based on artistic, experience-based and playful action. The book helps recognize and utilize new success potentials for innovation in enterprises. It addresses managers and experts who are interested in promoting innovation in practice. Moreover, scientists will

gather new interdisciplinary insights into innovation management and work organization from this book.

[The Political Economy of the Service Transition](#)

Butterworth-Heinemann

This book is about innovation, reflection and inclusion. Cultural innovation is something real that tops up social and technological innovation by providing the reflective society with spaces of exchange in which citizens engage in the process of sharing

their experiences while appropriating common goods content. We are talking of public spaces such as universities, academies, libraries, museums, science-centres, but also of any place in which co-creation activities may occur. The argument starts with the need for new narratives in the history of philosophy, which can be established through co-creation, the motor of cultural innovation. The result is redefining the history of philosophy in terms of a dialogical civilization by

ensuring continuous translations, individual processes of reflection and collective processes of inclusion. Readers will grasp the effectiveness of the history of philosophy in societies that are inclusive, innovative and reflective.

**Law** Walter de Gruyter GmbH & Co KG  
Automatic speech recognition systems have to handle various kinds of variabilities sufficiently well in order to achieve high recognition rates in practice. One of the

variabilities that has a major impact on the performance is the vocal tract length of the speakers. Normalization of the features and adaptation of the acoustic models are commonly used methods in speech recognition systems. In contrast to that, a third approach follows the idea of extracting features with transforms that are invariant to vocal tract lengths changes. This work presents several approaches for extracting invariant features for automatic speech

recognition systems. The robustness of these features under various training-test conditions is evaluated and it is described how the robustness of the features to noise can be increased. Furthermore, it is shown how the spectral effects due to different vocal tract lengths can be estimated with a registration method and how this can be used for speaker normalization.

[An Outline of the History of Economic Thought](#)  
Springer Science & Business Media

Offering a uniquely modern presentation of macroeconomics, this brand-new text makes it easy for instructors to emphasize a solid microfoundations, real-business cycle approach. In the all-new **MACROECONOMICS: A MODERN APPROACH**, leading economist and proven author Robert J. Barro couples his extraordinary command of growth, equilibrium, and business cycles with a focus on microfoundations to create a groundbreaking new

macroeconomics textbook steeped in real-world application. Accessibly written and extremely student friendly, the book is packed with current policy and data examples, reflecting the author's extensive research in the field. The book also includes captivating boxed features, challenging exercises, and innovative online resources like CengageNOW, which enables students to create personalized learning paths and equips instructors with tools to

easily assign, grade, and record homework and quizzes. Covering growth theory more completely than any other text, **MACROECONOMICS** delivers a unified model of macroeconomics that serves well for economics majors and nonmajors alike.

*Classical Approaches to the Study of Religion* OUP Oxford

Written in a clear, conversational style, the fourth edition of the classic *Futures, Options, and Swaps* provides the most comprehensive

coverage of derivatives currently available. This book is renowned for providing an excellent balance between introductory and advanced topics. Extensively updated. Includes additional application exercises. Reflects new trends and changes which represent an evolution away from the "Chicago" markets. Additional new material on risk included. Features accompanying website. [www.blackwellpublishing.com/kolb](http://www.blackwellpublishing.com/kolb)

**A Modern Guide to**

**Macroeconomics** World Scientific

The retail industry and associated business models have gone through a significant phase of disruption. The rapid emergence of new technologies, digital business models and the evolution of social media platforms as a new sales channel continue to influence the sector. Key contextual or external trends will affect and shape the retail landscape in the years to come. Therefore, it seems important to prepare for

this situation and be ready with a head start in terms of knowledge. This textbook provides its readers basic knowledge about the national and international retail sector and gives important insights into trends and developments. It deals with key trends, in particular new patterns of personal consumption, evolving geopolitical dynamics, technological advancements and structural industry shifts. Moreover, it explains why it is so important that retailers use these trends,

adapt their retail strategies and tactics, create strong brands and come up with innovative, new ways of doing business. Today we are living in a challenging time for retail. This textbook tries to give insights and explanations to better understand these challenges and provide managerial implications. *The People of the Book, Ahl Al-kitāb* Oxford University Press This book gives a comprehensive account of traditional and more

recent developments in macroeconomic theory. It is written primarily for students at the intermediate level. The book differs from the customary expositions in that the authors do not discuss topic by topic but orthodoxy by orthodoxy. Thus, the main approaches, like Classical theory, Keynesian theory, theory of portfolio selection, Monetarism, Rational Expectations theory, and Neokeynesian "disequilibrium" theory are presented in historical order. Each of these

approaches is substantiated and criticized in a self-contained chapter, and the authors have taken great pains to bring out the relations and differences between them. A mathematical appendix reviews those mathematical facts which are especially important for macroeconomic models and serves to make the text easy to read.

Futures, Options and Swaps 4e +CD Walter de Gruyter GmbH & Co KG  
Poopology. Only what is

inside counts. Find out what it means when it comes out. So if you have ever wondered what your poop says about you, you'll finally be able to get some answers. To understand ourselves better, Poopology shows how we can correctly interpret our faeces and find a deeper meaning in them. Humorous awesome! A must for every toilet.

**Event structures with higher-order dynamics**

Walter de Gruyter GmbH & Co KG  
Waardenburg's

magisterial essay traces the rise and development of the academic study of religion from the mid-nineteenth to the mid-twentieth century, outlining the establishment of the discipline, its connections with other fields, religion as a subject of research, and perspectives on a phenomenological study of religion. Furthermore a second part comprises an anthology of texts from 41 scholars whose work was programmatic in the evolution of the academic study of religion. Each

chapter presents a particular approach, theory, and method relevant to the study of religion. The pieces selected for this volume were taken from the discipline of religious studies as well as from related fields, such as anthropology, sociology, and psychology, to name a few.

### **History of Philosophy and the Reflective**

**Society** BoD – Books on Demand

La 4e de couverture

indique : "Dorota

Sajewska proposes an

innovative perspective for looking back at the formative process of Polish modernity, and delves into repressed areas of experience connected with World War I and the ensuing emancipatory movements. The book shows that underpinning modern Polish nationhood, is both a romantic myth of independence and a horror of fratricidal war. Searching for traces of memory in precarious bodies inflicted with the violence of war,

Necroperformance asks us to acknowledge the fragility of life as it actively reinforces an attitude of respect for the right to live. Sajewska's chief objective is to understand the social impact of remains - of the abject body (dead, wounded, disfigured, despoiled by violence) - its place in culture and its agency. These are remains like the body of Rosa Luxemburg, which opens the book's narrative - a woman, a Jew, a Polish-German communist activist who

was imprisoned, persecuted, murdered, and desecrated after death. This alternative archive becomes a basis for thought on a new anthropology rooted in the experience of the Great War and recorded in the form of modern theatre."

*Echo on a Chip - Secure Embedded Systems in Cryptography* Springer Science & Business Media  
The book provides students of European company law courses, scholars and practitioners with an overview.

Although company law remains mainly regulated at the level of national laws, it has become important to obtain a systematic view of the main directives in the field of company law, the EU Court of Justice's jurisprudence, the European Model Company Act and the state of implementation of these directives in the member states of the Union. The book therefore contains, in addition to the illustration of the law laid down by EU legislative bodies and the related

soft laws, detailed references to the most important domestic legislations and case laws, in order to make them known and usable as much as possible. Moreover, the book allows identifying the most relevant current legislative trends and the main historical reasons for divergences.

**Lesson Study** Walter de Gruyter GmbH & Co KG  
*Debunking Economics* exposes what many non-economists may have suspected and a minority of economists have long

known: that economic theory is not only unpalatable, but also plain wrong. When the original *Debunking* was published back in 2001, the market economy seemed invincible, and conventional 'neoclassical' economic theory basked in the limelight. Steve Keen argued that economists deserved none of the credit for the economy's performance, and that 'the false confidence it has engendered in the stability of the market economy has encouraged

policy-makers to dismantle some of the institutions which initially evolved to try to keep its instability within limits'. That instability exploded with the devastating financial crisis of 2007, and now haunts the global economy with the prospect of another Depression. In this radically updated and greatly expanded new edition, Keen builds on his scathing critique of conventional economic theory whilst explaining what mainstream economists cannot: why

the crisis occurred, why it is proving to be intractable, and what needs to be done to end it. Essential for anyone who has ever doubted the advice or reasoning of economists, *Debunking Economics* provides a signpost to a better future.

[Ruling the Spirit](#) BoD - Books on Demand

This book provides a comprehensive overview of the development of economics from its beginnings, at the end of the Middle Ages, up to contemporary

developments. It is strong on contemporary theory, providing extensive coverage of the twentieth century, particularly since the Second World War. The second edition has been revised and updated to take account of new developments in economic thought.

Fundamentals of Human Resource Management

Prentice Hall

In a dialogue with all of the theological disciplines and also with closely related human and philosophical sciences, this standard work sets

out criteria for a contemporary approach to preaching. The assumptions, arguments, models, perspectives and methods for analyzing the homiletic process are presented in an understandable form. Figures and practical guidelines offer helpful illustrations. This comprehensive and engaging format makes this volume a supportive textbook, a reliable reference work and a stimulating aid for preaching – all in one. *Necroperformance*

University of Pennsylvania Press

Marieke de Mooij's new edition of *Consumer Behavior and Culture* continues to explore how cultural influences can affect consumer behavior. The author uses her own model of consumer behavior to try and answer the fundamental questions about consumption – what people buy, why they buy it and how they buy. This edition has been updated to include: An insight into the different roles of the internet and the growing

influence of social media  
An exploration of the various psychological and sociological aspects of human behavior, such as

concept of self, personality, group influence, motivation, emotion, perception and information processing  
Updated examples

throughout, including millennials as consumers and how the language of consumption can differ across cultures
