Theorems and their proofs  
lie at the heart of

mathematics. In speaking of the purely aesthetic qualities of theorems and proofs, G. H. Hardy wrote that in beautiful proofs 'there is a very high degree of unexpectedness, combined with inevitability and economy'. Charming Proofs presents a collection of remarkable proofs in elementary mathematics that are exceptionally elegant, full of ingenuity, and succinct. By means of a surprising argument or a powerful visual representation, the

proofs in this collection will invite readers to enjoy the beauty of mathematics, and to develop the ability to create proofs themselves. The authors consider proofs from topics such as geometry, number theory, inequalities, plane tilings, origami and polyhedra. Secondary school and university teachers can use this book to introduce their students to mathematical elegance. More than 130 exercises for the reader (with solutions) are also included.

 "This volume deals with the development of Chinese hermeneutics, or exegetic systems, from their beginnings to the twentieth century. The contributors address critical issues in the study of Chinese hermeneutics by focusing on key periods during which the hermeneutic tradition in China underwent significant changes. The

volume is divided into six parts, corresponding to the six major periods of intellectual change in traditional and contemporary China. Part 1 considers the foundational period of Chinese hermeneutics, examining Confucian classics such as the Analects, Mencius, and the Book of Odes. Part 2 traces the broadening of the hermeneutic tradition from Confucian classics to the military canon, political discourse, astronomy, and Buddhist exegesis from the Han to

the Chinese Middle Ages. In Part 3 the focus is on Zhu Xi's monumental synthesis and redefinition of the Confucian tradition at the beginning of the early modern period. His vision of Confucian thought remained influential throughout the imperial period, and his interpretations of the Confucian classics became state orthodoxy starting with the thirteenth century. Part 4 focuses on this challenge and discusses the intellectual changes that took place during the late

imperial period and their profound effects on Chinese hermeneutics. Part 5 documents the challenges to traditional Chinese hermeneutics in the modern era and the emergence of a new, critical hermeneutics in the beginning of the twentieth century. The volume concludes with Part 6, which explores Chinese hermeneutics from a comparative perspective and identifies its distinctive features. The understanding of Chinese hermeneutics gained from these essays is that of a

dynamic plurality of traditions that has endured into the twentieth century and continues to shape contemporary intellectual debates."

This volume explores the grammatical properties of body-part expressions across a range of languages and language families in the Americas, including Arawakan, Eastern Tukano, Mataguyan, Panoan, and Takanan. Expressions denoting parts of the body often exhibit specific grammatical properties that are intrinsically related to their semantics, and frequently appear in dedicated constructions, many of which are found

exclusively in association with these expressions. Following a detailed introduction and discussion of the foundations of body-part grammar, the chapters in the first part of the book investigate categorialization, lexicalization, and the semantic processes associated with body-part expressions. In the second part of the book, contributors investigate specific grammatical properties of body-part expressions, such as inalienability,

incorporation, possessive constructions, prefixation, topicality, and word-formation strategies. The volume draws on data from lesser-known languages that are often under-represented in comparative work, and makes a significant contribution not only to the linguistics of the Americas and the typology of body-part expressions, but also to typological studies more broadly, and to historical, comparative, and anthropological linguistics.
