The first book to attempt to provide a framework for analyzing disability through the ages,

Henri-Jacques Stiker's now classic *A History of Disability* traces the history of western cultural responses to disability, from ancient times to the present. The sweep of the volume is broad; from a rereading and reinterpretation of the Oedipus myth to legislation regarding disability, Stiker proposes an analytical history that demonstrates how societies reveal themselves through their attitudes towards disability in unexpected ways. Through this history, Stiker examines a fundamental issue in contemporary Western discourse on disability: the cultural assumption that equality/sameness/similarity is always desired by those in society. He

highlights the consequences of such a mindset, illustrating the intolerance of diversity and individualism that arises from placing such importance on equality. Working against this thinking, Stiker argues that difference is not only acceptable, but that it is desirable, and necessary. This new edition of the classic volume features a new foreword by David T. Mitchell and Sharon L. Snyder that assesses the impact of Stiker's history on Disability Studies and beyond, twenty years after the book's translation into English. The book will be of interest to scholars of disability, historians, social scientists, cultural anthropologists, and those who are

intrigued by the role that culture plays in the development of language and thought surrounding people with disabilities.

The book is divided into two interactive parts, one devoted to the visual arts and the other to design and architecture. It covers three themes: - The development of the information and communication technologies that generate mutations and give rise to new ways of perceiving space and time and

create new languages;
- In the postcolonial and globalised world, society redefines itself through its different communities whose identity is based on national, cultural or religious bases; - As society dematerialises whole swathes of its activities via the new information and communication technologies, what criteria do we adopt to define ourselves as individuals? The reproduced works present new and recent works of contemporary artists, designers and architects that have a specific resonance with the themes examined.

 quelques clefs de

compréhension de cette « banalité du mal » (pour paraphraser Hanna Arendt) – ici chevillée à notre condition familiale. Ce ne sont pas de victimes éplorées et de monstres dont il est question ici, mais d'une intersubjectivité altérée, débouchant sur des conduites destructives, comme s'il existait au monde l'on ne sait quel « droit de faire du mal aux siens ». L'ouvrage reflète l'expérience de terrain d'une équipe interdisciplinaire (psychiatres, psychologues, éducateurs), spécialisée dans les thérapies systémiques des familles maltraitantes. Il présente les multiples facettes de la maltraitance, décrit quelques

configurations familiales spécifiques et propose des stratégies thérapeutiques, l'ensemble étant illustré de vignettes cliniques et de génogrammes familiaux. Cette approche novatrice par sa perspective comme par ses techniques se fonde en premier lieu sur les ressources, les compétences et la résilience naturelle de n'importe quelle famille. Gérard Salem, psychiatre et psychothérapeute, il est l'auteur de nombreuses publications consacrées aux thérapies systémiques ou à l'hypnose médicale. Il enseigne aux facultés de médecine de Lausanne, de Genève et de Paris (VI et VIII).
