CLARKE HALLIE

The Tiny Seed HarperCollins Childrens Books

Explores the plant cycle, how seeds grow, ways they travel, and what it takes for a seed to become a plant.

How Do Plants Grow? Penguin

From tiny seed to a huge, fold-out bloom, the transformative life cycle of a sunflower plays out in this bold read-aloud. A Sibert Honor Book! A Theodor Seuss Geisel Honor Book! To understand how a seed becomes a sunflower, you have to peek beneath the soil and wait patiently as winding roots grow, a stalk inches out of the earth, and new seeds emerge among blooming petals. "A seed falls, And settles into the ground, And the Sun shines, And the rain comes down, And the seed grows..." Leading up to a striking fold-out spread of a full-grown sunflower, the lively, bold illustrations in *A Seed Grows* offer a close-up view of each step of the growth cycle. Additional material in the back of the book explains the science of plant life cycles, and goes into more detail on the ways in which flowers and seeds depend on other creatures. Antoinette Portis is the author of *A New Green Day*, a Publishers Weekly Best Book of the Year and NCTE Notable Book in Poetry, as well as the Sibert Honor winning *Hey, Water!* A CALIBA Golden Poppy Award Finalist A New York Public Library Best Book of the Year A Publishers Weekly Best Book of the Year A Junior Library Guild Gold Standard Selection A Horn Book Fanfare Title

National Geographic Readers: Seed to Plant Timber Press
Kelvin and his Dad were taking a walk, looking at the trees and flowers in the park. When Kelvin asked his Dad ¿How do trees grow?¿ To which his dad replied, ¿Do you really want to know?¿ In this story, children will learn about the process of photosynthesis and why it is important to life on Earth. Look out for this and other titles in The Young Scientist Series of books which ¿Teaches Young Minds through Science and Rhymes¿.

How This Seed Grows Into This Sunflower Holiday House
Sometimes the best place to explore is your own backyard! Young kids love to explore their surroundings and the backyard is where they usually begin. Backyard science books help teachers teach living sciences with things kids can observe in their own backyard or park.

How a Seed Grows Lerner Publishing Group

A story of growth and change (and tomatoes!). In an ordinary garden full of flowers and plants, some creatures have made their homes above the ground, while others live below it. Everybody lives happily. Until one day, a new seed arrives, which sprouts into a plant. And as the plant grows (and grows, and grows), its stalk and leaves get in the way of those who live aboveground, while its roots disrupt those who live below. It is a huge problem. So, the garden's residents decide that it must be chopped down. Unless ... wait! What's that growing on the plant? A multilayered (and multilevel!) tale that's worth digging into!

The Seedling That Didn't Want to Grow Holiday House

National Bestseller Winner of the National Book Critics Circle Award for Autobiography A New York Times Notable Book Geobiologist Hope Jahren has spent her life studying trees, flowers, seeds, and soil. *Lab Girl* is her revelatory treatise on plant life—but it is also a celebration of the lifelong curiosity, humility, and passion that drive every scientist. In these pages, Hope takes us back to her Minnesota childhood, where she spent hours in unfettered play in her father's college laboratory. She tells us how she found a sanctuary in science, learning to perform lab work "with both the heart and the hands." She introduces us to Bill, her brilliant, eccentric lab manager. And she extends the mantle of scientist to each one of her readers, inviting us to join her in observing and protecting our environment. Warm, luminous, compulsively readable, *Lab Girl* vividly demonstrates the mountains that we can move when love and work come together. Winner of the American Association for the Advancement of Science/Subaru Science Books & Film Prize for Excellence in Science Books Finalist for the PEN/E.O. Wilson Literary Science Writing Award One of the Best Books of the Year:

Creative Houseplant Projects Old Publishing

How do you make a garden grow? In this playful companion to the popular *Tap the Magic Tree* and *Touch the Brightest Star*, you will see how tiny seeds bloom into beautiful flowers. And by

tapping, clapping, waving, and more, young readers can join in the action! Christie Matheson masterfully combines the wonder of the natural world with the interactivity of reading. Beautiful collage-and-watercolor art follows the seed through its entire life cycle, as it grows into a zinnia in a garden full of buzzing bees, curious hummingbirds, and colorful butterflies. Children engage with the book as they wiggle their fingers to water the seeds, clap to make the sun shine after rain, and shoo away a hungry snail. Appropriate for even the youngest child, *Plant the Tiny Seed* is never the same book twice--no matter how many times you read it! And for curious young nature lovers, a page of facts about seeds, flowers, and the insects and animals featured in the book is included at the end. Fans of *Press Here*, *Eric Carle*, and *Lois Ehlert* will find their next favorite book in *Plant the Tiny Seed*.

How a Seed Grows Into a Sunflower Vintage

"Gail Gibbons is known for her ability to bring the nonfiction world into focus for young students. Through pictures, captions, and text, this book provides a window into the world of growing things...Erin Mallon complements Gibbons's text with a clear, clipped, and purposeful narration." -AudioFile Magazine
Plant Grow Harvest Repeat Little Simon

If you listen, nature speaks. Explore nature through evocative riddles and bold imagery that take the reader from day to night and back again in this perfect read aloud. Who scribbles on the sidewalk with glistening ink? Snail! Who's a comma in a long, long sentence of a stream? Tadpole! Active readers will delight in the clever language and striking illustrations by esteemed author/illustrator Antoinette Portis. On each spread, children will solve riddles about the familiar animals, plants and the weather that one child encounters outdoors throughout a whole day. A Junior Library Guild Selection

The Amazing Life Cycle of Plants Greenwillow Books

Watch seeds grow right before your eyes! Readers can follow the fun clues and guess what delicious fruits will grow from each seed. With a lift of each foldout flap, kids can watch the seeds take root in the soil, sprout from the ground, and finally, make the fruits we love to eat! A tomato seed grows ripe tomatoes, an orange seed grows juicy oranges, a pea seed grows crunchy pea pods, a pepper seed grows shiny bell peppers, and blueberry seeds grow plump blueberries. Each cardstock page of this book folds out into a large 14" x 14" inch page that reveals a child enjoying the healthy and delicious fruits of the seeds.

Cambridge Primary Science Stage 5 Activity Book Simon and Schuster
