### The Alchemy of Sexual

Energy [start2dream.de](http://start2dream.de)

A guide to nourishing the body through bone marrow rejuvenation exercises • Presents exercises to “regrow” bone marrow, revive the internal organs, and prevent osteoporosis • Explains the use of bone breathing and bone compression, “hitting” to detoxify the body, and

sexual energy massage and chi weight lifting to enhance the life force within Most Westerners believe that a daily physical exercise program helps slow the aging process. Yet those whose bodies appear most physically fit on the outside often enjoy only the same life span as the average nonathletic person. It is the internal organs and glands that nourish every function of the body, and it is the bone marrow that nourishes and rejuvenates the organs and glands

through the production of blood. By focusing only on the muscles without cultivating the internal organs, bones, and blood, the Western fitness regimen can ultimately exhaust the internal system. In Bone Marrow Nei Kung Master Mantak Chia reveals the ancient mental and physical Taoist techniques used to “regrow” bone marrow, strengthen the bones, and rejuvenate the organs and glands. An advanced practice of Iron Shirt Chi Kung, Bone Marrow Nei Kung was developed as a

way to attain the “steel body” coveted in the fields of Chinese medicine and martial arts. This method of absorbing energy into the bones revives the bone marrow and reverses the effects of aging through the techniques of bone breathing, bone compression, and sexual energy massage, which stimulates the hormonal production that helps prevent osteoporosis. Also included is extensive information on chi weight lifting and the practice of “hitting” to detoxify the

body.

A fundamental Taoist practice for enhancing and utilizing chi • Includes breathing and movement exercises to promote vitality and healing through the cultivation of chi in the tan tien and perineum areas • Presents the foundational exercises that are essential for more advanced practices such as Iron Shirt Chi Kung and Cosmic Healing Tan Tien Chi Kung is the art of cultivating and

condensing chi in the lower abdomen--the tan tien--the fundamental power storehouse of the body. Known as the Ocean of Chi to the ancient Taoists, this lower abdominal area holds the key to opening the body and the mind for the free and continuous movement of chi. Tan Tien Chi Kung contains specific breathing and movement exercises that develop the power of the chi stored in the body to increase vitality, strengthen organs, and promote self-healing.

Mantak Chia explains how these exercises also provide a safe and effective method for receiving earth energy, which allows the practitioner to achieve balance physically, mentally, and spiritually--all of which are essential for the more advanced practices of Iron Shirt Chi Kung and Cosmic Healing. It is our mind that directs and guides our chi, but if the mind and body are out of balance or under stress, the mind cannot perform this function. The tan tien actually contains

a large quantity of neurotransmitters, making it a key source of body intelligence. It is for this reason the Taoists also referred to Tan Tien Chi Kung as Second Brain Chi Kung and created exercises that would allow practitioners to gain awareness of the tan tien's function to restore the mind-body balance that is essential for spiritual growth and optimal well-being. *Tendon Nei Kung* Simon and Schuster  
A guide to restoring men's sexual health and function

to maintain a flourishing sex life well into old age • Includes fully illustrated instructions for exercises to clear energetic blockages of the male reproduction organs, restore function, reduce prostate enlargement, and prevent prostate gland cancer • Presents a routine of exercises to be practiced daily as well as guidance on supporting your practice with nutritional and herbal supplements • Explains how these techniques can forestall the need for surgery in early stages of

prostate disease Age need not be a death sentence for men's sexual health and vitality. Taoist Master Mantak Chia and William U. Wei explain how to use the energetic and physical practice of Chi Kung to not only maintain a flourishing sex life well into old age but also reduce prostate enlargement and prevent prostate gland cancer. With fully illustrated step-by-step instructions, the authors provide exercises and techniques to open the energetic pathways connected to the male

reproductive organs and clear the energy blockages that lead to sexual dysfunction and illness. They explain how to perform sexual energy and prostate gland massages and detail stretching exercises and the practice of chi weight lifting--attaching weights to the penis and scrotum to enhance sexual vigor. They explain that while these techniques are primarily preventive, they can also act to regenerate and restore function, forestalling the need for surgery in early stages of

prostate disease. The authors present a routine of exercises to be practiced daily as well as guidance on supporting your practice with nutritional and herbal supplements. Tan Tien Chi Kung Universal Tao Publications The use of complementary therapies is exploding, increasing the pressure to establish a rigorous science to support its practice. Clinical Research in Complementary Therapies: Principles, Problems and Solutions

provides students with the tools they need to research complementary and integrative medicine (CIM) and so fill this gap. Essential for both undergraduate and postgraduate students, this second edition is significantly updated and enhanced. Part 1 deals with research strategies and methods, explaining the major types of clinical research in CIM and how these inter-relate. New chapters are included on whole systems research, qualitative research and questionnaire

development. Not all therapies can be treated the same way nor channeled through the signal process of randomized controlled trials. Therefore, detailed description of mixed methods approaches including observational, qualitative, cost-benefit and comparative effectiveness research are described. Part 2 deals with specific complementary therapies and how they are invested by experts in each field. The book analyses the key

questions asked and the controversies debated in complementary medicine research and offers clear and innovative guidance for answering these questions. FEATURES • Provides an overarching synthesis of methods in CIM and how they are to be used collectively including the role of comparative effectiveness research • Suggests both general and specific factors which need to be considered in assessing or planning complementary therapy research • Pinpoints aspects of

research which are different in orthodox research and complementary therapy research • Reviews the types of research carried out in specific complementary therapies and analyses issues which arise • Includes information on measuring the economic cost and benefits of complementary medicine, clinical audit and the role of placebos use • Builds upon recent research results, looks at the lessons these provide for all complementary

therapies and suggests key issues to address in future research. • Provides an overarching synthesis of methods in CIM and how they are to be used collectively including the role of comparative effectiveness research • Suggests both general and specific factors which need to be considered in assessing or planning complementary therapy research • Pinpoints aspects of research which are different in orthodox research and complementary therapy

Energetic massage techniques that dispel negative emotions, relieve stress, and strengthen the senses, internal organs, and nervous system • Shows how Chi Massage employs one's own internal energy to promote rejuvenation • Presents Chi Massage techniques for every organ and bodily system • Provides a daily practice routine that requires only 5 to 10 minutes to complete The Western concept of massage

primarily concerns muscle manipulation. In the practice of Chi Massage, internal energy, or Chi, is manipulated to strengthen and rejuvenate the sense organs--eyes, ears, nose, tongue, teeth, and skin--and the internal organs. The Taoist techniques in this practice are more than 5,000 years old and, until very recently, were closely guarded secrets passed down from master to student with each master often knowing only a small part of the complete method. In Chi

Self-Massage Master Mantak Chia pieces together the entire system of Chi Massage into a logical routine, revealing the methods used by Taoist masters to maintain their youthfulness. He explains the energetic theory behind Chi Massage and how negative emotions affect the organs and nervous system. By practicing the exercises outlined and following the daily routine that requires only 5 to 10 minutes to complete, readers can strengthen their senses--

most notably vision, hearing, and taste--detoxify their internal organs and glands, help control negative emotions, relieve stress and constipation, and improve their complexion, teeth and gums, and overall stamina.

*The Pelvic Floor* HMH  
How to achieve perfect vision naturally through proven eye-training methods • Explains how vision problems are related to imbalances in the internal organs • Provides Taoist and Ayurvedic practices for

harmonizing the liver and kidneys, the organs directly associated with eye problems In the West, problems with eyesight are treated separately from overall health, usually with prescription glasses or contact lenses. But Eastern systems of holistic healing view the eyes as mirrors of physical health. Eye problems reflect problems with the internal organs, most specifically the liver and kidneys. The Art of Cosmic Vision offers Taoist healing sound exercises for

strengthening the liver and kidneys as well as seven internal Chi Kung exercises and Dao-Yin self-massage practices for toning the organ meridians. It also provides extensive dietary recommendations, including a complete Ayurvedic analysis of the three main nutritional body types. The wide variety of eye-strengthening exercises in *The Art of Cosmic Vision* includes the Egyptian Black Dot technique, the Taoist Long Swing technique, the Tai Chi

Rocker Eye technique, and relaxing Yoga Eye Palming techniques. Rather than viewing the ciliary muscle within the eye as the only muscle responsible for focus, these exercises improve focus by training all of the muscles surrounding the eyes. With attention to improved diet, physical exercise, and these proven eye-training techniques, readers can restore their vision to vibrant health.

A guide to the foundational practice of “smiling to the organs” to promote deep relaxation and internal health • Presents exercises that dissolve the physical and mental tensions that can cause energy blockages and unhealthy chi flow • Shows how to recognize illness at its inception on the organ level and how to balance the emotions

to heal it The Inner Smile is a practice that focuses gratitude and joy on the internal organs to resolve the physical and mental tensions that can lead to illness. In Taoism negative emotions--anger, sadness, depression, fear, and worry--are seen as low-grade energy that causes chronic disease and steals our major life force by creating energy blockages. Master Mantak Chia shows that the internal awareness produced by the simple yet powerful Inner Smile meditation practice

flushes the organs of poisonous negative energy that may be blocking chi energy flow in order to nourish the entire body. Just as a genuine outer smile transmits positive energy and has the power to warm and heal, an inner smile produces a high grade of energy that promotes powerful internal healing, deep relaxation, happiness, and longevity. Smiling to the organs and thanking them for the work they do helps to reawaken the intelligence of the body,

which, once activated, can dissipate emotional imbalances and inner disharmony before serious illness manifests. Taoist Secrets of Love

A guide to the practice of Inner Alchemy, which allows you to control the energies of your inner universe to better connect with energies of the outer universe • Teaches the essential first-level meditations in Taoist practice, also known as Fusion of the Five Forces, for self-healing and emotional and spiritual

development • Shows step-by-step how to remove negative emotions from the organs in which they are lodged by neutralizing and transforming the negativity back into positive energy • Includes basic and advanced-level meditations Fusion of the Five Elements is the necessary first step in the Taoist practice of Inner Alchemy, in which one learns to control the generation and flow of emotional, mental, and physical energies within the body. It is a series of

meditations designed to locate and dissolve negative energies trapped inside the body by making a connection between the five outer senses (experienced through the ears, eyes, nose, mouth, and tongue) and the five major negative emotions (anger, hate, worry, sadness, and fear). When the body is cleared of negative energy, universal chi energy flows freely and productively, nourishing both body and soul. The practice is divided into two parts. The first works with

controlling the forces of the five elements on the five major organs of the body by learning the elements' effects upon each other and how to balance and utilize these energies properly. The advanced Fusion exercises then show how to channel the greater energies of the stars and planets to strengthen internal weaknesses and crystallize positive energy. By "fusing" all the different kinds of energy together, a harmonious whole is created--the key to manifesting an

Immortal existence.

comprehensive subject index of almost 2,000 entries round out the superb coverage! Weiss's life's work examines the subject of herbal medicine from both a clinical and practical viewpoint, incorporating his personal observations and clinical experience with scientific studies. This material formed the basis of Herbal Medicine, 2E, also by Thieme. The second edition, revised, expanded and modernized by Volker Fintelmann, streamlines the work into a more clinical text, incorporating

the latest scientific research and Commission E findings on the efficacy of herbs. This edition is recommended for allopathic physicians and other medical professionals who are new to the field of herbal medicine. Professor Rudolf Fritz Weiss (1895-1991) is highly regarded as the founding father of modern German phytotherapy. He studied botany and medicine at the University of Berlin, qualifying as a doctor in 1922 and subsequently taking additional

qualifications in internal medicine. A teaching post in herbal medicine was interrupted by war service as an army doctor, followed by seven years in Russian captivity as a doctor in prisoner-of-war camp hospitals. After retiring from clinical practice in 1961, he devoted his life to the scientific development and acceptance of herbal medicine. Weiss was appointed as a member of the German Commission E in 1978. He was founder and editor of the Zeitschrift fuer

Phytotherapie, and lectured on current advances in the subject at the University of Tuebingen.

The guide to engaging and directing the three primordial forces of Earth, Heaven, and Higher Self to achieve enlightenment and immortality •

Explains how to circulate the life force, or chi, by balancing yang (male) and yin (female) currents of bioenergy • Includes an overview of the complete Taoist body/mind/spirit system along with newly refined methods of activating the life force • The sequel to the classic Awaken Healing Energy

Through the Tao In 1983, Mantak Chia introduced the “Microcosmic Orbit” to the West. Prior to that time, most of the Eastern energy practices transmitted to the West were incomplete, dealing only with the ascending yang/masculine channel, which shoots life-force energy up the spine. The Microcosmic Orbit showed practitioners how to establish the descending yin/feminine channel of the life-force energy loop. Within Taoist systems, cultivating feminine energy has always been

seen as the key to gaining balance and wholeness. Healing Light of the Tao presents the more advanced methods of chi cultivation in the Microcosmic Orbit, offering a full understanding of Taoist spiritual theory through its comprehensive overview of the complete Taoist body/mind/spirit system. The book also includes more advanced meditation methods for absorbing the higher frequencies of Earth Force, Cosmic Force, and Universal Force (Heavenly

chi) into the basic orbit. It establishes a spiritual science that not only emphasizes practical benefits to health, sexual vitality, and emotional balance, but also shows how changes made in the energy body can lead to physical rejuvenation that the Taoists called immortality. *Personality and Social Behavior* Thieme Finally, the exciting and long-awaited sequel to one of the biggest health and healing bestsellers of all time has arrived. When Peter Kelder's Ancient

Secret of the Fountain of Youth was released by Harbor Press in 1985, it immediately touched off an incredible sales phenomenon rivaled only by The Celestine Prophecy and Conversations with God. In this book, readers were introduced to the Tibetan Rites of Rejuvenation, a series of exercises developed over centuries in the monasteries of Tibet and credited by thousands for everything from increased energy to better memory, weight loss, and just looking and feeling

younger. Almost as quickly as the books filtered across the globe, letters began to pour in to Harbor Press requesting more information on these mysterious rites. Now, more than ten years and two million books later, comes a comprehensive companion volume that addresses the unanswered questions of so many readers. Picking up where Kelder's book left off, *Ancient Secret of the Fountain of Youth, Book 2* provides the complete Fountain of

Youth health program, with detailed information on a variety of topics discussed only fleetingly in the original bestseller: the history and origins of the Five Rites, valuable insights about how the Rites work, diet suggestions, and easy-to-follow exercises. Illustrated with fifty black-and-white photographs, this guide will help turn back the hands of time, invigorating and energizing readers' lives as never before.

Taoist techniques for replenishing our internal energy with universal cosmic energy • Shows how to transform excess

sexual energy (Ching Chi) into self-healing energy • Presents advanced Cosmic Healing Chi Kung practices, which gather the limitless resources of Cosmic Chi for healing • Explains how opening of the three tan tiens to the six directions allows personal consciousness to connect directly to higher sources of energy Taoists consider our sexual energy to be the creative force that we can use to regenerate the body's internal energy, but we must learn how to harness excess sexual energy and

transform it into chi, or life-force energy. When we circulate the sexual energy in the Microcosmic Orbit--a continuous energy loop that runs up the spine and down the front of the body--we transform it into self-healing energy that can be stored in the organs and the three tan tiens: energy centers in the brain, the heart center, and the lower abdomen. The Alchemy of Sexual Energy builds upon Microcosmic Orbit practices discussed in Healing Light of the Tao.

The more we open the flow of our internal energy the more capable we are of connecting to the cosmic energy that exists outside ourselves in the universe. By learning to open the three tan tiens to the six directions, the Taoist practitioner combines mind power with extension of chi to draw cosmic energy into the body. This energy, too, can be stored in the three tan tiens and used as needed for healing. When we learn to flow in this way with the energy of the Tao, life ceases to

be a struggle.
