Theseus was the mythical king and founder-hero of Athens. Like Perseus, Cadmus, or Heracles, Theseus battled and overcame foes that were identified with an archaic religious and social order. His role in history has been called "a major cultural transition, like the making of the new Olympia by Hercules".

Sameness and Substance Renewed A TOON Graphic

Thomas Aquinas has always been viewed as a highly important figure in Western Civilization, and the chief philosopher of Roman Catholicism. In recent decades there has been a renewed interest in Aquinas' thought as scholars have been exploring the relevance of his thought to contemporary

philosophical problems. The book will be of interest not only to historians of medieval philosophy, but to philosophers who work on problems associated with the nature of material objects. Because human beings are typically understood to be a kind of material object, the book will also be of interest to philosophers working on topics in the philosophy of religion, philosophy of mind, and the philosophy of human nature. Although the work contains the kinds of details that are necessary for a work of historical scholarship, it is written in a manner that makes it approachable for undergraduate students in philosophy and so it would be a welcomed addition to any university library.

Four-Dimensionalism defends the thesis that the material world is composed of temporal as well as spatial parts. This defense includes a novel account of persistence over time, new arguments in favour of the four-dimensional ontology, and responses to the challenges four-dimensionalism faces. Theodore Sider pays particular attention to the philosophy of time, including a strong series of arguments against presentism, the thesis that only the present is real. Arguments offered in favour of four-dimensionalism include novel arguments based on time travel, the debate between spacetime substantialists and relationalists, and vagueness. Also included is a comprehensive discussion of the paradoxes of coinciding material objects, and a novel resolution of those paradoxes based on temporal counterpart theory. In conclusion Sider replies to prominent objections to four-dimensionalism, including discussion of the problem of the rotating homogenous disk. Four Dimensionalism is an original and highly readable study of the metaphysics of time and identity.

Aquinas and the Ship of Theseus Capstone

One book. Two readers. A world of mystery, menace, and desire. A young woman picks up a book left behind by a stranger. Inside it are his margin notes, which reveal a reader entranced by the story and by its mysterious author. She responds with notes of her own, leaving the book for the stranger, and so begins an unlikely conversation that plunges them both into the unknown. The book: *Ship of Theseus*, the final novel by a prolific but enigmatic writer named V.M. Straka, in which a man with no past is shanghai'd onto a strange ship with a monstrous crew and launched onto a disorienting and perilous journey. The writer: Straka, the incendiary and secretive subject of one of the world's greatest mysteries, a revolutionary about whom the world knows nothing apart from the words he wrote and the rumors that swirl around him. The readers: Jennifer and Eric, a college senior and a disgraced grad student, both facing crucial decisions about who they are, who they

might become, and how much they're willing to trust another person with their passions, hurts, and fears. *S.*, conceived by filmmaker J. J. Abrams and written by award-winning novelist Doug Dorst, is the chronicle of two readers finding each other in the margins of a book and enmeshing themselves in a deadly struggle between forces they don't understand, and it is also Abrams and Dorst's love letter to the written word.

The book is divided into three sections: Neurath's biographical background and the economic and social context of his ideas; his theory of science; and the development of his role in debates on Marxist concepts of history and his own conception of science. Ship of Theseus Penguin

The Ship of Theseus was one of, if not the, the first thought problem the author was ever taught. As a child he was absolutely infatuated with Greco-Roman mythology and read, without discernment, from D'Aulaire to Hamilton to Bullfinch. He considered the problem to be interesting, but had never connected it to magic in any meaningful way. Segue to late August/mid September of 2014, when the author watched the Doctor Who episode "Deep Breath" and was reminded of his love for the Ship of Theseus. It then occurred to him that the problem might be adaptable into a card routine. This book reveals the history of the plot and several solutions as it pertains to a card routine involving spectators.
