The 2014 Ukrainian crisis has highlighted the pro-Russia stances of some European countries, such as Hungary and Greece, and of some European parties, mostly on the far-right of the political spectrum. They see themselves as victims of the EU

“technocracy” and liberal moral values, and look for new allies to denounce the current “mainstream” and its austerity measures. These groups found new and unexpected allies in Russia. As seen from the Kremlin, those who denounce Brussels and its submission to U.S. interests are potential allies of a newly re-assertive Russia that sees itself as the torchbearer of conservative values. Predating the Kremlin’s networks, the European connections of Alexander Dugin, the fascist geopolitician and proponent of neo-Eurasianism, paved the way for a new pan-European illiberal ideology based on an updated reinterpretation of fascism. Although Dugin and the European far-right belong to the same ideological world and can be seen as two sides of the same coin, the alliance between Putin’s regime and the European far-right is more a marriage of convenience than one of true love. This unique book examines the European far-right’s connections with Russia and untangles this puzzle by tracing the ideological origins and individual paths that have materialized in this permanent dialogue between Russia and Europe.

Is Russia Fascist? Mitchell Beazley

This study examines the enduring Cold War legacies underpinning Western perceptions of contemporary Russia under President Vladimir Putin. It analyzes the ways in which the West has interpreted and reacted to Russia's domestic authoritarianism and foreign policy behavior and argues for diplomatic engagement based on liberal pluralism.

Russia in the Wake of the Cold War Larousse

Louis XI, known as "The Spider King" because he wove many intricate plots, lives on in popular imagination primarily as a villain and a cruel, cunning, rather unscrupulous character. Absolutists fled to his banner whilst constitutionalists reviled him as a rapacious totalitarian murderer. In *Images of Kingship in Early Modern France*, Adrianna Bakos uses the changing nature of Louis XI's historical reputation to explore the intellectual and political climate of early modern France. Using Louis XI's historical reputation as a prism for fresh investigation, Adrianna Bakos offers new, more complex interpretations of the ideological landscape of early modern France. *Images of Kingship in Early Modern France* is an important contribution to European historiography and to debates on historical versus political interpretations of Kingship.

In *Is Russia Fascist?*, Marlene Laruelle argues that the charge of "fascism" has become a strategic narrative of the current world order. Vladimir Putin's regime has increasingly been accused of embracing fascism, supposedly evidenced by Russia's annexation of Crimea, its historical revisionism, attacks on liberal democratic values, and its support for far-right movements in Europe. But at the same time Russia has branded itself as the world's preeminent antifascist power because of its sacrifices during the Second World War while it has also emphasized how opponents to the Soviet Union in Central and Eastern Europe collaborated with Nazi Germany. Laruelle closely analyzes accusations of fascism toward Russia, soberly assessing both their origins and their accuracy. By labeling ideological opponents as fascist, regardless of their actual values or actions, geopolitical rivals are able to frame their own vision of the world and claim the moral high ground. Through a detailed examination of the Russian domestic scene and the Kremlin's foreign policy rationales, Laruelle disentangles the foundation for, meaning, and validity of accusations of fascism in and around Russia. *Is Russia Fascist?* shows that the efforts to label opponents as fascist is ultimately an attempt to determine the role of Russia in Europe's future. *Report of the Superintendent of Education of the Province of Quebec for the Year ...* Scarecrow Press

The study of bibliography takes various forms: a historical introduction to the development of the book over the centuries, an examination of the constituent parts of the book and methods of its description. First published in 1931 by Allen & Unwin and The Library Association, *A Student's Manual of Bibliography* soon

established itself as a classic in its field.; its author, Arundell Esdaile, of the British Museum, was a lecturer in bibliography at the London University School of Librarianship from 1919-1939. His professional colleague, Roy Stokes, University of British Columbia, became responsible for Esdaile's Manual of Bibliography with its fourth edition published in 1967. Designed for the literary student, the student librarian, and the beginning book collector, this manual assumes nothing but interest from the outset; it prepares readers for more advanced texts as they develop specialized interests.
