Winner of the UKLA Author Award 2009:UKLA 'Lockwood has written a useful, supportive book which will help teachers and librarians...He describes the background and summarises the research and then proposes thoroughly practical programmes' - Carousel 'Michael Lockwood has produced an excellent, practical overview and analysis of what works in the primary school to promote reading for pleasure....Lockwood's work is grounded and valuable to those who need it most - teachers in the classroom working hard to engender a love of reading' - English Drama Media 'This book is first class. It puts the matter very clearly and succinctly, and presents a great deal of evidence to support the argument that pleasure is not a frivolous extra, but the very heart and essence of what reading is about. It also gives readers plenty of ideas for carrying the principle into the classroom, and for

justifying it...This is an excellent piece of work, which I hope will find a place on every staffroom bookshelf.' - Philip Pullman
English primary school children are less likely to read for pleasure than their counterparts in many other countries. This practical and focused book discusses the background to this situation and looks at how government initiatives have tried to address it. Drawing on the author's own research project in order to identify good practice in promoting reading for enjoyment, the book presents specific activities which teachers can use to develop their own whole school and classroom practice, enabling them to put the fun back into reading. Each chapter features case-study material and provides examples of planning from schools that have successfully created thriving reading cultures through schemes such as reading assemblies, book clubs, library loyalty cards, school book evenings and quizzes. There is also an extensive, annotated list of print and internet-based resources. Topics covered include: - Becoming a reading for pleasure school - Promoting a love of reading in the early years - Developing

reading enjoyment in the later primary years - Getting boys reading Promoting Reading for Pleasure in the Primary School is written for all those involved in education who would like to see as many children as possible develop a love of reading. It will be particularly relevant for primary teachers, teaching assistants, trainee teachers, advisers and consultants, as well as teacher educators and researchers.

This bestselling resource has been fully updated, putting formative assessment at the heart of the Talk for Writing process and showing how to help children love writing across the curriculum. By helping children speak the language of non-fiction in a fun engaging way before they attempt to write, the Talk for Writing approach builds children's confidence and linguistic ability enabling them to craft their own writing. In the new edition, this practical resource offers:

- Fully worked, tried and tested examples of how to apply Talk for Writing to each non-fiction text type
- A wide range of fun activities helping children internalise how to express and link text effectively
- A process that co-constructs learning so that children learn how to structure text and create toolkits of key ingredients
- Guidance for teachers in England on how to apply the approach across the

primary curriculum

- An OLC including new footage of Pie Corbett demonstrating Talk for Writing and new footage of classes engaged in the approach
- Advice on how to use the DVD and handouts to train all staff in the approach
- Evidence of impact from cold to hot tasks

Designed for busy teachers, Talk for Writing across the Curriculum, second edition, will help transform children's writing and attainment across the curriculum. "This book celebrates the importance of talk in becoming and growing as a writer: talk to share ideas; talk to analyse text; talk to co-construct writing; and to talk to evaluate writing. Throughout the book constantly underlines the importance of talk for learning and the many creative and rich ways talk can be used to help young writers internalise the rhythms and patterns of text. Full of practical ideas and activities, the teaching combines being creative and being critical in a wholly integrated way. An invaluable resource for primary school teachers!" Debra Myhill, Professor of Education at the University of Exeter, UK "The teaching of reading has always taken priority in policy and practice in literacy. Pie Corbett and Julia Strong have produced a very welcome counterweight to that dominance in their Talk for Writing Across the Curriculum. It is so refreshing to see suggestions for teaching to bring elements of language together, especially when done in such an entertaining and engaging way as this. This new edition makes a 'classic' even better." David Wray, Emeritus Professor, University of Warwick, UK "This latest update of Pie and Julia's best-selling book reflects changes in the curriculum, strengthening the T4W approach, using cold and hot tasks, showing new worked examples of how to apply T4W to each non-fiction type and placing formative assessment at the

heart of the process. It is exciting to see how all the best ideas and findings in education are converging, evidenced in this latest 'up to the minute' excellent publication." Shirley Clarke,

The debate over whether class size matters for teaching and learning is one of the most enduring, and aggressive, in education research. Teachers often insist that small classes benefit their work. But many experts argue that evidence from research shows class size has little impact on pupil outcomes, so does not matter, and this dominant view has informed policymaking internationally. Here, the lead researchers on the world's biggest study into class size effects present a counter-argument. Through detailed analysis of the complex relations involved in the classroom they reveal the mechanisms that support teachers' experience, and conclude that class size matters very much indeed. Drawing on 20 years of systematic classroom observations, surveys of practitioners, detailed case studies and extensive reviews of research, Peter Blatchford and Anthony Russell contend that common ways of researching the impact of class size are limited and sometimes misguided. While class size may have no direct effect on pupil outcomes, it has, they say, significant force through interconnections with classroom processes. In describing these connections, the book opens up the everyday world of the classroom and shows that the influence of class size is everywhere. It impacts on teaching, grouping practices and classroom management, the quality of peer relations, tasks given to pupils, and on the time teachers have for marking, assessments and understanding the strengths

and challenges for individual pupils. From their analysis, the authors develop a new social pedagogical model of how class size influences work, and identify policy conclusions and implications for teachers and schools.

There are many models of schooling; some work, some don't. Mastery is an entire model of schooling with over 100 years of provenance, its impact has been researched for decades, with many of the world's greatest education minds testing and refining the approach. It's one of the models of schooling that actually works. In this book, Mark McCourt examines the history of a teaching for mastery approach, from its early beginnings to the modern day when cognitive scientists have been able to bring further evidence to the debate, demonstrating why a model that was first proposed in the 1910s has the incredible impact on both pupil attainment and attitudes to learning that it has had all around the world over many decades. Drawing on examples from cross disciplines, the story of mastery is one that all educators can engage with. Mark also draws on his own subject, mathematics, to further exemplify the approach and to give practical examples of pedagogies and didactics that teachers can deploy immediately in their own classroom.

Effective Teaching and Learning for Pupils in Low Attaining Groups UCL Press

With dialogue and dialogic teaching as upcoming buzz-words, we face a familiar mix of danger and opportunity. The opportunity is

to transform classroom talk, increase pupil engagement, and lift literacy standards from their current plateau. The danger is that a powerful idea will be jargonised before it is even understood, let alone implemented, and that practice claiming to be dialogic will be little more than re-branded chalk and talk or ill-focused discussion. Dialogic teaching is about more than applying tips such as less hands-up bidding. It demands changes - in the handling of classroom space and time; in the balance of talk, reading and writing; in the relationship between speaker and listener; and in the content and dynamics of talk itself.

Rethinking Class Size: The complex story of impact on teaching and learning Teaching Resources

From the queen of historical fiction, *Letters From the Lighthouse* by Emma Carroll is a stunningly evocative wartime drama, and sure to keep you breathlessly reading to its very last page. We weren't supposed to be going to the pictures that night. We weren't even meant to be outside, not in a blackout, and definitely not when German bombs had been falling on London all month like pennies from a jar. February, 1941. After months of bombing raids in London, twelve-year-old Olive Bradshaw and her little brother Cliff are evacuated to the Devon coast. The only person with two spare beds is Mr Ephraim, the local lighthouse keeper. But he's not used to company and he certainly doesn't want any evacuees. Desperate to be helpful, Olive becomes his post-girl, carrying secret messages (as she likes to think of the letters) to the villagers. But Olive has a secret of her own. Her older sister Sukie went missing in an air raid, and she's desperate to discover what happened to her. And then she finds a strange coded note which seems to link Sukie to Devon, and to something dark and impossibly dangerous. 'A gripping adventure.' *Guardian* 'A triumph.' *The Bookseller* 'Carroll sews together

accessible history with a cracking plot and a character to love in the strong, principled Olive.' *The Times*, Children's Book of the Week 'What readers are saying: 'I recommend that you buy this book now!!!' Hugo, age 11 'Buy this book because it has lots of action, mystery and tragedy.' Joshua, age 10 'An amazing book.' Skye, age 9 'This is the book for you. It has secret, mystery and suspense, how could you not like this?' Roman, age 11 'It will be the most incredible book you've ever read.' The Psychology of Education Routledge

Reading for pleasure urgently requires a higher profile to raise attainment and increase children's engagement as self-motivated and socially interactive readers. *Building Communities of Engaged Readers* highlights the concept of 'Reading Teachers' who are not only knowledgeable about texts for children, but are aware of their own reading identities and prepared to share their enthusiasm and understanding of what being a reader means. Sharing the processes of reading with young readers is an innovative approach to developing new generations of readers. Examining the interplay between the 'will and the skill' to read, the book distinctively details a reading for pleasure pedagogy and demonstrates that reader engagement is strongly influenced by relationships between children, teachers, families and communities. Importantly it provides compelling evidence that reciprocal reading communities in school encompass: a shared concept of what it means to be a reader in the 21st century;

considerable teacher and child knowledge of children's literature and other texts; pedagogic practices which acknowledge and develop diverse reader identities; spontaneous 'inside-text talk' on the part of all members; a shift in the focus of control and new social spaces that encourage choice and children's rights as readers. Written by experts in the literacy field and illustrated throughout with examples from the project schools, it is essential reading for all those concerned with improving young people's enjoyment of and attainment in reading.
