**NIDA Research Monograph** Routledge

The culmination of a lifetime's scholarly work, this study by Sister Prudence Allen traces the concept of woman in relation to man in Western thought from ancient times to the present. This volume is the second in her study, in which she explores claims about sex and gender identity in the works of over fifty philosophers (both men and women) in the late medieval and early Renaissance periods.

Handbook of Evidence-Based Substance Abuse Treatment in Criminal Justice Settings OUP Oxford

En s'intéressant à l'incarcération des femmes au Canada et au

Québec, cet ouvrage révèle que l'emprisonnement, comme dispositif pénal, est d'une étonnante ténacité.

Christine de Pizan Routledge

"This is an exceptional book that comprehensively covers the interface between psychology and criminology regarding an empirical understanding of crime. It is written in an engaging and accessible manner, nicely linking key themes in order to situate the contribution of psychology to theories of criminal behaviour, strategies for informed practice, and contemporary challenges. It should prove to be an incredible resource for students, but also be of interest to researchers and clinicians. I cannot recommend this text more heartily." Dr Ralph Serin, Carleton University, Canada "James McGuire is one of the leading international experts on what works in reducing reoffending, and he has written an extremely valuable and accessible textbook on psychology and crime. The book is a clearly written, well-

researched and up-to-date survey of important contributions of psychology to key criminological issues. It is especially noteworthy for its illuminating reviews of cognitive-social learning theories, risk factors and longitudinal studies, risk assessment, cognitive-behavioural programmes and meta-analyses of treatment effectiveness." Professor David Farrington, Institute of Criminology, University of Cambridge What contributions can psychology make to our understanding of crime? How can psychological models and research help to prevent crime and reduce repeat offending? This highly readable book discusses the complex relationships between psychology, criminology and criminal justice. Challenging the assumptions of those who object to the use of psychology within criminology, this book shows how a methodical approach to the study of criminal behaviour can generate both systematic findings and practical solutions to problems. McGuire argues for a broader understanding of crime, based on factors such as the individual's cognitive and emotional development, in addition to the influences of socialization, peer groups, and the social and economic environment. He highlights the value of understanding 'pathways' to offending behaviour, and the critical points at which choices are made. Topics include: Theoretical and empirical research foundations of 'criminogenic risk factors' Theory turned into practice - the development of offending behaviour programmes A psychological perspective on some core concepts in criminology: retribution, deterrence and incapacitation Major practical applications of psychology in policing, prosecution and sentencing This authoritative and stimulating text is essential reading for students in criminology and psychology and for criminal justice practitioners and policy

makers.

Effects of Judges' Sentencing Decisions on Criminal Careers SAGE Publications

Parental Incarceration makes available personal stories by adults who have had the childhood experience of parental incarceration. These stories help readers better understand the complex circumstances that influence these children's health and development, as well as their high risk for intergenerational crime and incarceration. Denise Johnston examines her own children's experience of her incarceration within the context of what the research and her 30 years of practice with prisoners and their children has taught her, arguing that it is imperative to attempt to understand parental incarceration within a developmental framework. Megan Sullivan, a scholar in the Humanities, examines the effects of her father's incarceration on her family, and underscores the importance of the reentry process for families. The number of arrested, jailed, and imprisoned persons in the United States has increased since 1960, most dramatically between 1985 and 2000. As the majority of these incarcerated persons are parents, the number of minor children with an incarcerated parent has increased alongside, peaking at an estimated 2.9 million in 2006. The impact of the experience of parental incarceration has garnered attention by researchers, but to date attention has been focused on the period when parents are actually in jail or prison. This work goes beyond that to examine the developmental impact of children's experiences that extend long beyond that timeframe. A valuable resource for students in corrections, human services, social work, counseling, and related courses, as well as practitioners, program/agency

administrators, policymakers, advocates, and others involved with families of the incarcerated, this book is testimony that the consequences of mass incarceration reach far beyond just the offender.

*Annual Report on the Substance Abuse Program at the California Substance Abuse Treatment Facility (SATF) and State Prison at Corcoran* Springer Science & Business Media

This book brings together the experiences of men who served time in prison with contemporary research on correctional policy. The authors examine how these two seemingly disparate perspectives complement each other to provide straightforward, commonsense solutions to address the current state of the corrections system.

#### **The Marion Experiment** DS Brewer

A book that lists French language words and gives their equivalent in English, and English language words with their equivalent in French.

*Joseph d'Armathie* SIU Press

This volume collects a wide range of papers discussing all aspects of Therapeutic Community (TC) research. An invaluable resource for anyone involved in the field, it considers questions of which methods are most appropriate in the TC environment, how research studies affect this, as well as practical and ethical questions.

Corrections: A Text/Reader, Second Edition is designed for undergraduate and/or graduate corrections courses. Organized like a traditional corrections text, it offers brief authored introductions in a mini-chapter format for each key Section, followed by carefully selected and edited original articles by leading scholars. This hybrid format - ensuring coverage of important material while emphasizing the significance of contemporary research - offers an excellent alternative which recognizes the impact and importance of new directions and policy in this field, and how these advances are determined by research.

Reintegration, Supervised Release, and Intensive Aftercare

Walter de Gruyter GmbH & Co KG

Only the very rare among us are completely unscathed by the effects of addiction - our own, that of a family member, friend, or coworker. Even the addictions of strangers - from the drunk driver or drug addict, to gambling, food, spending, or violence-addicted people - may subject us to dangers, threaten our well-being, and drain money from our pockets. Recent national estimates in just the US show that substance abuse and addiction alone cost taxpayers a total of nearly \$500 billion a year. In these volumes, experts from around the world present the newest issues, research, and insights into addictions of all kinds. Led by Angela Browne-Miller, Director of the Metaxis Compulsive and Habitual Behaviors Institute in California, this team of contributors includes scholars and practitioners from the United States, Canada, the United Kingdom, Sweden, Thailand, Africa, and Russia. Topics range from drug addiction among male, female, teen, and aging populations, and among White, Hispanic,

Black, Asian, Native American, and other groups, using liquor, cocaine, methamphetamine, khat, and/or other lesser known drugs, to behavioral addictions including online gaming, excessive buying, and eating disorders. Chapters also address issues including addiction as a public health problem and the politics of drug treatment policies. Treatment methods for addictions, from electrotherapy to holistic approaches are addressed, as are spiritual, psychological, and cross-cultural issues involved. The experts behind these chapters include those from the University of California, Berkeley, Johns Hopkins School of Medicine, and Purdue University, to McGill University, Nottingham Trent University, and the All India Institute of Medical Sciences.

*Advances in Psychology and Law* American Philosophical Society  
The criminal justice system now serves as the chief provider of health care services to a significant portion of society. This includes the provision of physical and mental health care for offender populations who require substantial health care resources. To date, little is known or understood with regard to how these services and programs are being delivered. This book addresses the gaps in our knowledge by presenting a range of studies detailing the daily practices that occur in places where criminal justice and public health systems intersect. This includes an assessment of sheriff agency emergency communication systems, a study of problem behaviours and health using a juvenile sample, the challenge of treating mentally ill prison inmates with note of important gender differences, the impact of case management on justice systems, and a review of substance abuse cessation programs among pregnant women currently

serving probation and parole sentences. Also included is a policy piece in which the authors call for an integrated model that is neither criminological nor public health specific. These readings provide a range of empirical examples that highlight important successes and challenges facing the criminal justice and public health systems. They suggest that integration and partnerships represent the most efficacious means to reduce critical social problems such as violence, poor health, and criminality. This book was originally published as a special issue of *Criminal Justice Studies*.

*Freedom, Imprisonment, and Slavery in the Pre-Modern World*  
McGraw-Hill Education (UK)

Established in 1895 as the first U.S. scholarly journal in its field, *AJS* remains a leading voice for analysis and research in the social sciences, presenting work on the theory, methods, practice, and history of sociology. *AJS* also seeks the application of perspectives from other social sciences and publishes papers by psychologists, anthropologists, statisticians, economists, educators, historians, and political scientists.

*Federal Probation* Librairie Droz

This respected text from the American Society of Addiction Medicine is valuable for all physicians and mental-health personnel who specialize in addiction medicine and who treat patients with addiction disorders. The chapters blend scientific principles underlying addiction with the practical essentials of clinical addiction medicine. Many of the contributors are affiliated with leading government agencies that study addiction and its science, such as the National Institute on Alcohol Abuse and Alcoholism and the National Institute on Drug Abuse. The book

will appeal to a wide and interdisciplinary range of professionals, especially those with interest or duties relating to addiction-related disorders, and in particular physicians seeking certification status via either the American Board of Addiction Medicine or the American Board of Psychiatry and Neurology. A companion Website will offer the fully searchable text.

*Parental Incarceration* Rodopi

The Marion Experiment combines academic research with personal accounts by prisoners to investigate solitary confinement and supermax prisons. USP Marion became a model for supermax prisons, with many other prison systems—in the U.S. and abroad—copying the special architectural and program innovations there.

Papers of the Fourth European Conference of Psychology and Law, held in Barcelona, Apr. 1994.

**Proceedings, American Philosophical Society (vol. 122, No. 4, 1978)** Wm. B. Eerdmans Publishing

Contrary to common assumptions, medieval and early modern writers and poets often addressed the high value of freedom, whether we think of such fable authors as Marie de France or Ulrich Bonerius. Similarly, medieval history knows of numerous struggles by various peoples to maintain their own freedom or political independence. Nevertheless, as this study illustrates, throughout the pre-modern period, the loss of freedom could happen quite easily, affecting high and low (including kings and princes) and there are many literary texts and historical documents that address the problems of imprisonment and even

enslavement (Georgius of Hungary, Johann Schiltberger, Hans Ulrich Krafft, etc.). Simultaneously, philosophers and theologians discussed intensively the fundamental question regarding free will (e.g., Augustine) and political freedom (e.g., John of Salisbury). Moreover, quite a large number of major pre-modern poets spent a long time in prison where they composed some of their major works (Boethius, Marco Polo, Charles d'Orléans, Thomas Malory, etc.). This book brings to light a vast range of relevant sources that confirm the existence of this fundamental and impactful discourse on freedom, imprisonment, and enslavement.

Principles of Addiction Medicine Bloomsbury Publishing USA  
Get high. Become addicted. Commit crimes. Get arrested and be sent to jail. Get released. Repeat. It's a cycle often destined to persist, in large part because the critical step that is often missing in the process, which is treatment geared toward ensuring that addicts are able to reenter society without the constant threat of imminent relapse. The Handbook of Evidence-Based Substance Abuse Treatment in Criminal Justice Setting probes the efficacy of corrections-based drug interventions, particularly behavioral treatment. With straightforward interpretation of data that reveals what works, what doesn't, and what needs further study, this volume navigates readers through the criminal justice system, the history of drug treatment for offenders, and the practical problems of program design and implementation. Probation and parole issues as well as concerns specific to special populations such as women, juvenile offenders, and inmates living with HIV/AIDS are also examined in detail. The Handbook's wide-ranging coverage includes: Biology and

genetics of the addicted brain. Case management for substance-abusing offenders. Integrated treatment for drug abuse and mental illness. Evidence-based responses to impaired driving. Monitoring technology and alternatives to incarceration. The use of pharmacotherapy in rehabilitation. This must-have reference work is a comprehensive and timely resource for clinicians,

researchers, and graduate students across a variety of disciplines including clinical psychology, criminology and criminal justice, counseling, and educational policy makers.
