The aim of this model course is to meet the mandatory minimum standards of competence for seafarers as electro-technical ratings, in the following functions: electrical, electronic and control engineering; maintenance and repair; and controlling the operation of the ship and care for persons on board, at the support level specified in table A- III/7 of the STCW Code **Merchant Ship Construction** Legare Street Press
She's ready for something new. . . Hoping to start over after a painful divorce, Cassie Mancini moves to Texas and is ready to cut loose. When she attends her sister's bridal shower, she can't resist dancing with the sexy male stripper. There's just one problem. The man isn't a stripper. He's the groom's best man, Dr. Adam Hart, and he's a notorious player. Humiliated, Cassie plans to keep her distance from Adam--even though she can't stop thinking about how good she felt in his arms. He's ready for her. . . Adam likes his life just the way it is. By not committing to anyone, he can have his choice of women. But when he meets Cassie, he's blown away by the sizzling chemistry they share. Determined to win her over, Adam sets out to capture Cassie's heart and prove to her that he's now a one-woman man. . . Praise for Sylvia Lett "With Perfect for You, Sylvia Lett offers a story of sizzling romance and dramatic suspense. A new writer to watch for." --Deirdre Savoy "Lett has written a fast-paced novel with suspense, intrigue and romance. This is a real page-turner." --Romantic Times on Take Me Down "Sylvia Lett is a magician at creating heroes to die for." --Evelyn Palfrey, Essence® bestselling author

A more intimate and vivid glimpse of Athenian political life during and directly after the Peloponnesian War is provided by the speech of Andokides On the Mysteries than by any other work: it is also a major source of legal and prosopographical information, and an important specimen of Attic prose style in the most crucial period of its development. Despite this it has been unduly neglected in recent years, partly for lack of an up-to-date English commentary. This new paperback version of MacDowell's standard edition (first published in hardback in 1962) is intended both for undergraduates and professional scholars. The revised text (notably more conservative than other modern texts) with apparatus criticus is supplemented with a full introduction surveying the life and trial of Andokides and his literary style; a note on the basis of the text; a detailed commentary; and appendices which discuss Andokides' innocence or guilt, the chronology and political significance of events in 415 BC, the legal revision ordered by the decree of Teisamenos, the date of the trial and the speech, and aspects of the historical and stylistic background relevant to the work.

The International Code on Intact Stability 2008 (2008 IS Code), presents mandatory and recommendatory stability criteria and other measures for ensuring the safe operation of ships, to minimize the risk to such ships, to the personnel on board and to the environment. The 2008 IS Code took effect on 1 July 2010. The 2008 IS Code features: a full update of the previous IS Code; criteria based on the best state-of-the-art concepts available at

the time they were developed, taking into account sound design and engineering principles and experience gained from operating ships; influences on intact stability such as the dead ship condition, wind on ships with large windage area, rolling characteristics and severe seas. This publication also presents Explanatory Notes to the 2008 IS Code, intended to provide administrations and the shipping industry with specific guidance to assist in the uniform interpretation and application of the intact stability requirements of the 2008 IS Code.

Liquefied Natural Gas (LNG) Tanker Cargo and Ballast Handling Simulator World Health Organization

This book covers the knowledge of shipboard operations required by candidates for professional qualification as Chief Officer and Master Mariner. It deals with the basic routines and procedures, and the many regulations governing their use, for the safe and efficient operation of merchant ships. The book is also designated a fundamental text for the Maritime Transport paper of the Chartered Institute of Transport's membership examinations. The second edition takes into account recent developments in technology and regulation, and in particular covers major international legislation on Safety of Life at Sea and on Maritime Pollution as well as recent UK regulations on occupational health and safety and on operation of ro-ro ferries.

The Third Edition of Jeffrey M. Jenson and Mark W. Fraser's award-winning text, *Social Policy for Children and Families*, offers new evidence that a public health framework based on ecological theory and principles of risk, protection, and resilience is essential for the successful design and implementation of social policy. Written in a conversational, reader-friendly style and incorporating cutting-edge research, this carefully crafted book maps a pathway for developing resilience-based social policies. In every chapter, experts in their respective fields apply the editors' conceptual model across the substantive domains of child and family poverty, child welfare, education, mental health, health, developmental disabilities, substance use, and juvenile justice. Recipient of the Best Edited Book Award from the Society for Research on Adolescence in 2008, the book is an ideal core text for graduate and upper level undergraduate courses and a vital resource for elected officials, policy makers, and others interested in the evolution of policies aimed at preventing problem behaviors and supporting children and families.

The innovations and advancements in the field of science and technology have brought a tremendous shift in the field of engineering. Electrical, electronic and control engineering are some of the major engineering disciplines that have developed at a rapid pace. This book explores all the important aspects of these disciplines in the present day scenario with respect to topics such as power and electrical engineering, information and communication technologies, mechatronics, control engineering, design of new devices, etc. Those in search of information to further their knowledge will be greatly assisted by this comprehensive book.

This is a print on demand publication. This study developed in the course of preparing a collection of all the epigraphical evidence relating to the sanctuary of Demeter and Kore at Eleusis. The author soon realized that many problems connected with the priesthoods could be treated more conveniently in a separate study than in the commentaries on individual inscriptions. The proper scope of the separate study naturally appeared to be all Eleusinian priesthoods and sacred offices. The scheme he has adopted is a prosopographical account, in chronological order, of all the known incumbents of each priesthood, with an emphasis on certain aspects: qualifications for a priesthood, manner of selection, length of incumbency, official functions and duties, rank or importance relative to other priesthoods in the cult, social position, participation in civil life and in other festivals or cults, and religious dress. The evidence not connected with specific priests or priestesses has been interspersed chronologically among them; but there are occasional departures from this procedure where it was more useful to discuss in one place all the evidence on a given topic (e.g., religious dress). The course includes technical aspects of teaching that have a direct relation with the maritime simulator world. Without delving into the details at this stage, it is however emphasized that the simulator pedagogy, as well as psychology of learning forms an important element of the course. The topics that have been covered in this modular course have been chosen in such a way as to provide a valuable introduction for those who have little experience in teaching and also as a very useful refresher for experienced instructors. In addition, those whose teaching experience has been limited to lecturing will gain considerable exposure, as they will explore the world of maritime simulation along with a variety of teaching techniques. The course deals with the relevance of simulator in maritime training and the simulator pedagogy associated with the use of training on a maritime simulator. The basic aspects of the learning process, purpose of training, setting of training objectives and basic principles of course design and the psychology of learning has also been touched upon, however it does not form the main thrust of the course. It is assumed that course participants would have received formal training in these aspects prior to completing this programme. The course has a large practical component in which the participants implement the theoretical guidelines by planning, creating, executing and evaluating their own simulation exercises. The experimental nature of the course being conducted largely using simulators provides the participants the opportunity to hone the necessary skills required to be an effective simulator instructor.
