Negotiating Business Equipment Leases is designed to help you negotiate long-term equipment leases at favorable rates while avoiding the blind spots, pitfalls, and out-and-out deceptions that frequently take place in leasing. The author coaches both the negotiating novice and the experienced professional step by step through every critical phase of the lease negotiation process - from choosing the right lessor, to gaining and keeping maximum bargaining leverage, to closing the deal. You'll discover how to quickly spot a lessor's Achilles' heel and turn it to your advantage as well as protect yourself against the questionable tactics some leasing companies use to gain the upper hand. You'll learn how to check out the background and reputation of prospective lessors; how lessors profit in a lease transaction and what concessions they'll make on request; why lessees often compromise before the deal request is made; how to gain respect, credibility and bargaining power; what to look for in a lessor's offer; how to write a bid letter (RFQ) that gets your leasing requirements met; why putting together the lease agreement is part of the negotiation process; and even how to get out of a lease when necessary. Negotiating Business Equipment Leases is your personal lease advisor, enabling you to negotiate as a leasing expert, even if you have no financing or negotiating background. For the experienced negotiator, the information offered here will add even more power to your bargaining ability.

Companies live or die on the basis of estimating their costs. Preparing estimates and bidding for new jobs is a complex and often costly process. There is no substitute for on the job training -- until now. Drawing on the authors' combined experience of more than 70 years, *Estimating Building Costs* presents state-of-the-art principles, practices, and techniques for assessing these expenditures that can be applied regardless of changes in the costs of materials, equipment, and labor. The book is an efficient and practical tool for developing contracts or controlling project costs. The authors cover the major components of the direct cost: estimating procedures and cost trends related to materials, construction equipment, and skilled and unskilled labor. They describe various types of building estimates encountered during the lifecycle of a project, as well as the role and accuracy of each. The book provides an overview of the industry, cost indexes in use, approaches to preparing a detailed estimate, and an in-depth description of the organization and function of the estimating group. Including CSI Master Format and UniFormat codes, estimating forms, a list of available estimating software packages, a detailed construction site and investigation report, the book provides a cost estimating methodology that readers can tailor to their own organizational needs.

The Camera Assistant's Manual

Simon Kempf has developed hedonic (quality-adjusted) office rent indices for German metropolitan areas. His study explores new territory as it constructs, for the first time, such indices for Germany. The author thereby has taken into account the different qualities of the underlying lease contracts regarding location factors, lease factors, building factors, equipment and layout factors of the office rental unit - using more than 22,005 office lease contracts stored in the Rental Databank of IPD GmbH in Wiesbaden. This hedonic index construction methodology is well known among real estate researchers and statisticians, but it has been mainly used in the residential sector. As a second novelty the multiple imputation method in the statistical analysis to solve the problem of missing data is employed. Quality-adjusted office rent indices serve as market and economic indicators as well as a bench-marking instrument.
