Since the mid-twentieth century, Zoltán Kodály's child-developmental philosophy for teaching music has had significant

positive impact on music education around the world, and is now at the core of music teaching in the United States and other English speaking countries. The Kodály Today handbook series is the first comprehensive system to update and apply the Kodály concepts to teaching music in elementary school classrooms. Kodály in the Fourth Grade Classroom provides teachers with a step-by-step road map for developing children's performance, creative movement, and literacy skills in an organic and thoughtful manner. Through six years of field-testing with music teachers in the United States, Great Britain, and Hungary (the home country of Zoltán Kodály), authors Micheál Houlahan and Philip Tacka have developed a methodology specifically for 21st century classrooms. Houlahan and Tacka use the latest research findings in cognition and perception to create a system not only appropriate for the developmental stages of fourth graders but also one which integrates vertically between elementary music classes. The methods outlined in this volume encourage greater musical ability and creativity in children by teaching them to

sing, move, play instruments, and develop music literacy skills. In addition, Kodály in the Fourth Grade Classroom promotes critical thinking, problem solving, and collaboration skills. Although the book uses the Kodály philosophy, its methodology has also been tested by teachers certified in Orff and Dalcroze, and has proven an essential guide for teachers no matter what their personal philosophy and specific training might be. Over 100 children's books are incorporated into Kodály in the Fourth Grade Classroom, as well as 35 detailed lesson plans that demonstrate how music and literacy curriculum goals are transformed into tangible musical objectives. Scholarly yet practical and accessible, this volume is sure to be an essential guide for elementary music teachers everywhere.

Truth, Denial and Transition: Northern Ireland and the Contested Past makes a unique and timely contribution to the transitional justice field. In contrast to the focus on truth and those societies where

truth recovery has been central to dealing with the aftermath of human rights violations, comparatively little scholarly attention has been paid to those jurisdictions whose transition from violent conflict has been marked by the absence or rejection of a formal truth process. This book draws upon the case study of Northern Ireland, where, despite a lengthy debate, the question of establishing a formal truth recovery process remains hotly contested. The strongest and most vocal opposition has been from unionist political elites, loyalist ex-combatants and members of the security forces. Based on empirical research, their opposition is unpicked and interrogated at length throughout this book. Critically exploring notions of national imagination and blamelessness, the politics of victimhood and the tension between traditions of sacrifice and the fear of betrayal, this book is the first substantive effort to concentrate on the opponents of truth recovery rather than its advocates. This

book will interest those studying truth processes and transitional justice in the fields of Law, Politics, and Criminology. What is History Teaching, Now?
