Improving educational outcomes for all young Australians is central to the nation's social and economic prosperity and will position young people to live fulfilling, productive and responsible lives. Young Australians are therefore placed at the centre of the Melbourne Declaration on Educational Goals. These goals are: (1) Australian schooling promotes equity and excellence; and (2) All young Australians become: successful learners, confident and creative individuals, and active and informed citizens. Together, all Australian governments commit to working with all school sectors and the broader community to achieve the educational goals for young Australians. This commitment will be supported by action in eight inter-related areas: (1) developing stronger partnerships; (2) supporting quality teaching and school leadership; (3) strengthening early childhood education; (4) enhancing middle years development; (5) supporting senior years of schooling and youth transitions; (6) promoting world-class curriculum and assessment; (7) improving educational outcomes for Indigenous youth and disadvantaged young Australians, especially those from low socioeconomic backgrounds; and (8) strengthening accountability and transparency. Year 7 Naplan-style Literacy Tests Penguin Group Australia

This book examines how the politics of dress has been incorporated in constructions of nationhood in both Asia and the Americas, and reveals how politicians and political regimes (including tribal, revolutionary, authoritarian, colonial, and democratic) manipulate sumptuary practices in order to create national identities, to legitimise hierarchies of power or to build personal political identities. In tackling these broad themes over two centuries, the editors and contributors grapple with gender politics; in particular, how men and women's dress reflect their political and economic position in the nation-states.

Choosing a School for Your Child -- NSW. Courier Corporation

There are many factors affecting a child's personality and the adult they become, but the least understood is birth order. Why is it that children in a family can share the same gene pool, a similar socio-economic environment and experience similar parenting styles yet have fundamentally different personalities, interests and even different careers as adults? Birth order! The implications for parents, teachers and adults involved with children are many. First published in 2003 to great acclaim, this fully revised and updated edition seeks to increase the reader's understanding of birth order theory, including the impact of a child's broader social environment and the rise of the standard two-child family, where the second-born is simultaneously the last-born. It will enable you to delve a little deeper and look for the constellation of positions within a family, giving you a clearer picture of your own quirks and ambitions, along with those of your siblings, children, partner, workmates, friends and colleagues. Addressing multiple births, children with a disability, genetic engineering, blended families, gender balance, only children and birth-order balance in the workplace, parenting expert and father of three Michael Grose challenges parents to raise each child differently according to his or her birth order.

With English becoming the world's foremost lingua franca, the pressure to improve English language education (ELE) has been steadily increasing. Consequently, the nature of ELE has changed drastically in the last decade. This has not only brought about a number of changes in the way English is taught and learnt, but it has also led to various innovative practices around the world. As a result, this edited book aims to shed light on the new theoretical and methodological developments in the field of ELE as well as the major issues and difficulties faced by practitioners in different parts of the globe. One very important variable that the book takes into account is the role that English already plays in a particular society since this may affect the views that teachers and students hold of the language. This in turn can significantly influence the way English is taught and learnt in given political, economic and socio-cultural settings. The purpose of this book is therefore to provide a comprehensive overview of the pedagogical methods, policies and problems that underlie English language education in ten different regions across the world, including: the USA, Canada, the UK, Australia, New Zealand, India, Singapore, Japan, China and Hong Kong. In doing so, the different chapters in the book emphasize the importance of responding to linguistic and other forms of diversity in order to develop English language education in a globalized world. This book will be useful for teachers and students of English language, for English language curriculum and materials developers, and for those involved in educational policy-making and language acquisition research. Written by experts in the field, the range of content covered in the book's chapters will also help policy-makers, researchers and practitioners develop effective English language education practices and policies, and propose solutions to emerging issues

in English language teaching and learning in different environments around the world. The newly-developed arguments and concerns pertaining to English language education will serve as future reference for professionals interested in this area of expertise.

Thinkers Keys Allen & Unwin

Brett Dalton is a tough guy - hardened, angry, uncaring and always ready to use his fists. When the world hates you, you might as well hate it back...But when Brett is busted by the cops for stealing and sent to The Farm for rehab, there are no fences to keep him in and anger gets in his way - but so does love. Brett's trapped in a grave new world, a world where he's not hardened at all; he's raw.

Interculturalism at the crossroads Random House Australia

This book explains the concept of multiliteracies and provides the literacy knowledge, resources, attitudes, and strategies that elementary and middle school students need to succeed in a changing world. The authors present a range of new and established ideas about literacy, emphasising successful practices. Chapters cover how teachers can rely less on print texts; respond to new trends in children's literature; and balance guided reading, outcomes-based curricula, and school-wide approaches to planning. New concepts are accompanied by reflection strategies to help understandings of literacy, multiliteracies, and texts. All chapters include Theory Into Practice: Classroom Application sections throughout to demonstrate how to incorporate multiliteracies every day in the classroom. [Back cover, ed].

In this volume, leading educators and theologians discuss various aspects of academic freedom, particularly in the context of colleges and universities with religious affiliations. These insightful and provocative essays address some of the most pressing issues now facing educational institutions and the Catholic Church, in particular: the ethical questions involved in maintaining academic freedom in a Catholic institution, the expression of dissent in an academic context and the authority of the vatican, the role of Catholic theologians within the university, and the relationship of the Catholic clergy and hierarchy--the local bishop, for example--to individual colleges and universities. The essays in this work are both theoretical and practical. They will be of special significance to theorists and educators in Catholic and religious higher education, but they will also be important reading for all those interested in academic issues. The insights and applications contained in this work reach into all sectors of the academic community.

"The Hutchins School, founded in 1846 as a memorial to Archdeacon Williams Hutchins, has a long and proud history as one of the oldest boys' schools in Australia. This book takes a fresh look at the School's formative years up to the move to Sandy Bay in 1965, before focusing on the trials and achievements of those who conceived, planned and executed the transformation of Hutchins into a modern and highly successful school for boys in the Anglican tradition."--Jacket.

Winner of the CBCA Crichton Award for New Illustrators in the CBCA Awards, 2015 Honour Book for Picture Books in the CBCA Awards, 2015 In one minute of silence you can imagine sprinting up the beach in Gallipoli in 1915 with the fierce fighting Diggers, but can you imagine standing beside the brave battling Turks as they defended their homeland from the cliffs above... In the silence that follows a war long gone, you can see what the soldiers saw, you can feel what the soldiers felt. And if you try, you might be able to imagine the enemy, and see that he is not so different from you... In One Minute's Silence, you are the story, and the story is yours - to imagine, remember and honour the brothers in arms on both sides of the conflict, heroes who shed their blood and lost their lives. A moving and powerful reflection on the meaning of Remembrance Day.

SMART Spelling Penguin Group Australia

It's well established that parents in western countries such as Australia currently do too much for their kids, albeit with good intentions. Before driving their kids to school (or station or bus stop) each morning most parents would have woken their children up, made their breakfast and lunch, depositing the latter in their schoolbags, before reminding them to get dressed and brush their teeth. All this well-intentioned activity may make for an easier life at home but it encourages children to be dependent on adults for longer. This is the exact opposite of what parents have done in the past, which is to develop their children's independence and achieve the most important parenting outcome of all - their own redundancy. There are a number of reasons for this high level of dependency parenting, including family shrinkage (parents are able to do a great deal for kids in small families), older parents (often over-concerned about their children), busy lives (it's easier to do than delegate) and a heightened fear that the world is a dangerous place for young people. While terms such as 'helicopter parents', 'bubble-wrapping kids' and 'over-parenting' are now common place,

they are unhelpful and offer little direction for parents. Spoonfed Generation will explain the importance of children's independence and the vital stages to letting go. Never before has a generation been so dependent on their parents; now it's time to remove the spoon and put it back in the drawer.
