Across the globe, states have long aimed to control the movement of people, identify their citizens, and restrict noncitizens' rights through official identification documents. Although states are now less likely to grant permanent legal status, they are increasingly issuing new temporary and provisional legal statuses to migrants. Meanwhile, the need for migrants to apply for frequent renewals subjects them to more intensive state surveillance. The contributors to *Paper Trails* examine how these new developments change migrants' relationship to state, local, and foreign bureaucracies. The contributors analyze, among other topics, immigration policies in the United Kingdom, the issuing of driver's licenses in Arizona and New Mexico, the Deferred Action for Childhood Arrivals program, and community know-your-rights campaigns. By demonstrating how migrants are inscribed into official bureaucratic systems through the issuance of identification documents, the contributors open up new ways to understand how states exert their power and how migrants must navigate new systems of governance. The process of controlling criminal investigations is a complex matter, yet it has frequently been minimized or neglected in police management publications. But knowing how to properly plan for an event, make resource agreements with other participants in the investigation, and implement a coordinating system within the agency is critical to proper case control in a department. Now in its second edition, *Managing and Coordinating Major Criminal Investigations* details a methodology that is adaptable to any existing record or control system. This new edition features an expanded outline format, more detailed instructions, and updated case systems. It also reflects the introduction of new technology developed since the benchmark first edition. Designed so that users can determine the necessary requirements to meet their individual needs, the book aids in the thinking and direction required to accomplish this task. Decisionmakers in small and large agencies can tailor the system to their specifications, retaining flexibility to decide the applications, degree of implementation, and usage. Filled with concrete, specific guidelines and time-tested wisdom from a law enforcement veteran, this book provides police supervisors with the essential tools needed to improve or develop a systemic approach to the control of major investigations. More importantly, it helps to create the necessary mindsets required in supervisors to manage any major crime effectively.

This issues-based reference work (available in both print and electronic formats) shines a spotlight on immigration policy in the United States. The U.S. is a nation of immigrants. Yet while the lofty words enshrined with the Statue of Liberty stand as a source of national pride, the rhetoric and politics surrounding immigration policy all-too-often have proven far less lofty. In reality, the apparently open invitation of Lady Liberty seldom has been without restriction. Throughout our history, impassioned debates about the appropriate scope and nature of such restriction have emerged and mushroomed, among politicians, among scholars of public policy, among the general public. In light of the need to keep students, researchers, and other interested readers informed and up-to-date on status of U.S. immigration policy, this volume uses introductory essays followed by point/counterpoint articles to explore prominent and perennially important debates, providing readers with views on multiple sides of this complex issue. While there are some brief works looking at

debates on immigration, as well as some general A-to-Z encyclopedias, we offer more in-depth coverage of a much wider range of themes and issues, thus providing the only fully comprehensive point/counterpoint handbook tackling the issues that political science, history, and sociology majors are asked to explore and to write about as students and that they will grapple with later as policy makers and citizens. Features & Benefits: The volume is divided into three sections, each with its own Section Editor: Labor & Economic Debates (Judith Gans), Social & Cultural Debates (Judith Gans), and Political & Legal Debates (Daniel Tichenor). Sections open with a Preface by the Section Editor to introduce the broad theme at hand and provide historical underpinnings. Each section holds 12 chapters addressing varied aspects of the broad theme of the section. Chapters open with an objective, lead-in piece (or "headnote") followed by a point article and a counterpoint article. All pieces (headnote, point article, counterpoint article) are signed. For each chapter, students are referred to further readings, data sources, and other resources as a jumping-off spot for further research and more in-depth exploration. Finally, volume concludes with a comprehensive index, and the electronic version includes search-and-browse features, as well as the ability to link to further readings cited within chapters should they be available to the library in electronic format.
