Fundamentals of Investments McGraw-Hill Education
Fundamentals of Corporate Finance 8e combines an applied introduction of concepts, with a clear and strong focus on learning outcomes. Based on the principle that students' understanding of corporate finance should be developed in terms of a few integrated and powerful ideas, it has 3 basic themes at its core:
1. An emphasis on intuition: It separates and explains key principles on a common-sense, intuitive level before launching into specifics. The

intuitive organisation of chapters also means that traditionally 'more-difficult' topics arise as a natural extension to the work that has gone before. 2. A unified valuation approach: Net present value (NPV) is treated as the basic concept underlying corporate finance. 3. A managerial focus: It emphasises the role of the financial manager as a decision maker, and the need for managerial input and judgement is stressed. Up-to-date examples and cases in all chapters make the 8th edition a comprehensive manual of applied financial management, covering financial hot topics and focus areas, as well as a historic overview of developments in (and lessons learned from)

equity and debt markets. Cases focusing on well-known ANZ and international companies show how recognisable organisations put corporate finance into practice, and how real-world events such as the COVID-19 pandemic affect some of their corporate finance decisions. This new edition is even more flexible than its predecessors, offering flexibility of coverage to unit coordinators in designing their courses. Corporate Finance Irwin/McGraw-Hill
Prepared by Matthew Will of the University of Indianapolis, the Study Guide contains a thorough list of activities for the student, including an introduction to the chapter, sources of business information, key

concepts and terms, sample problems with solutions, integrated PowerPoint slides, and related web links.

Loose-leaf Corporate Finance: Core Principles and Applications + Connect

McGraw-Hill Education *Corporate Finance: Core* was developed for the graduate (MBA) level as a concise, up-to-date, and to-the-point product, the majority of which can be realistically covered in a single term or course. To achieve the objective of reaching out to the many different types of students and the varying course settings, corporate finance is distilled down to its core, while maintaining a decidedly modern approach. Purely

theoretical issues are downplayed, and the use of extensive and elaborate calculations is minimized to illustrate points that are either intuitively obvious or of limited practical use. The goal was to focus on what students really need to carry away from a

principles course. A balance is struck by introducing and covering the essentials, while leaving more specialized topics to follow-up courses. Net present value is treated as the underlying and unifying concept in corporate finance. Every subject

covered is firmly rooted in valuation, and care is taken throughout to explain how particular decisions have valuation effects. Also, the role of the financial manager as decision maker is emphasized, and the need for managerial input and judgment is stressed.
