This book examines how and why practitioners of nature religion - Western witches, druids, shamans - seek to relate spiritually with nature through 'magical consciousness'. 'Magic' and 'consciousness' are concepts that are often fraught with prejudice and ambiguity respectively. Greenwood develops a new theory of magical consciousness by arguing that magic ultimately has more to do with the workings of the human mind in terms of an expanded awareness than with socio-cultural explanations. She combines her own subjective insights gained from magical practice with practitioners' in-depth accounts and sustained academic theory on the process of magic. She also tracks magical consciousness in philosophy, myth, folklore, story-telling, and the hi-tech discourse of postmodernity, and asks important questions concerning nature religion's environmental credentials, such as whether it is as inherently ecological as many of its practitioners claim.

London City of Revelation McFarland

To this day, throughout the ancient city of Bath, there exist statues and images of the man who was the legendary founder of the city, and the father of King Lear. A leper and a swineherd... a necromancer and a wise king... his memory lives on. Restless at the royal court, the young Prince Bladud sets off to consult an oracle in the west country - a wild wooded place near a mysterious hot spring that gushes from a cave. There the priestess tells him that he will be a great king, and that one day he will fly like an eagle. When he returns to his father's hill-fort at Trinovantum, ancient London, Bladud's head is full of magnificent dreams... until trickery entraps him in a loveless

marriage. His unquenchable thirst for knowledge, sharpened by a mysterious experience at the burial mound of his forefathers, takes him away from his home and wife on a dangerous journey to faraway Greece. There he meets and falls in love with a woman who has appeared to him many times already in dreams and visions. On returning to his own country, he finds his father dying and his wife conspiring with his brother to disinherit him. Then, found to be suffering from a disease believed to be leprosy, he is driven from the court and shunned by his people. In this dark time he becomes a swineherd. One day, he notices his pigs are free of sores after wallowing in hot mud. He tries the healing waters of Sul himself, is cured, and returns to claim his throne... His was a golden age of wisdom and magic, where Otherworld beings mingle freely with the people of this world, and where swans and ravens and owls take on their own special mysterious significance. Full of brilliant imagination, this colourful fantasy draws its strength and inspiration from the strange and beautiful realms of Celtic and Greek myth and legend.

The history of London is so important in national and indeed international terms, it seems extraordinary that this is the first general bibliography of the subject to appear. It contains over 22,000 selected references to books and articles on the history of London, from the Dark Ages to the beginning of the Second World War. The whole of the former GLC area plus the City is covered. Arrangement is by subject, and there is a substantial analytical index. Material for the bibliography was collected from specialist libraries all over London and beyond. It is a starting point for any enquiry about London's development over the centuries, whether from the academic historian, the amateur or the general enquirer. A supplement is planned, to cover new material on the period.

En inventant le terme de psychogéographie, Guy Debord institue une expérience de la ville qui devait aboutir à une « science » des états psychiques en relation avec l'environnement urbain. Le projet initial de la psychogéographie n'a pas résisté à la radicalité politique des situationnistes. Pourtant, en nous affranchissant de la définition précise et restrictive proposée par Debord, il devient possible de considérer que la psychogéographie est à la fois héritière d'une tradition, interlocutrice de ses contemporains et initiatrice d'une postérité. Réunissant des auteurs d'horizons disciplinaires variés (philosophie, géographie, urbanisme, psychanalyse, sinologie), ce volume incite à une réflexion théorique, historique et littéraire sur ce que nous apprend l'expérience de la dérive urbaine aujourd'hui.

Paperback re-print of Earthstars The Visionary Landscape. London's Sacred sites are not scattered about the capital at random. Many form a recognisable pattern of sacred geometry, a vast temple groundplan identical to the design used to lay out Stonehenge's megaliths over 3,500 years ago. Astonishingly, it also relates to the measures and proportions of the New Jerusalem, The City of Revelation. If the conclusions drawn by the author are correct, this pattern is a circuit diagram of the forces of creation and a new evolutionary impulse is coming through our sacred sites, a transformatory influence which will change the way we perceive the world

One of the most persistent themes in myth and legend from the world's many cultures is the story of the journey - the quest. In *Mythical Journeys, Legendary Quests*, Moyra Caldecott shows the connection between the sacred, mythic journeys as found in legend and story and the real journey of the individual soul towards enlightenment. This perennial quest for reassurance in the face of human mortality is spread as wide as our existence on the planet and throughout history. Indeed Carl Jung and Joseph Campbell have shown us that myth and legend are not just fantasy tales for children. They are powerful expressions, in code, of a deep yearning towards an understanding of human existence. Moyra Caldecott has selected material from many cultures to illustrate this: from ancient Egypt and Sumeria to aboriginal Australia, pre-Columbian America, Vietnam, India, Africa and Europe. For each legend she provides background on its origin and detailed analysis of its meaning and significance.

London is a powerful and mysterious city -

its spirit stands outside of time, certain places have influenced the behaviour of its citizens. Philipp Röttgers leads you to these places. Follow him into the heart of darkness, into the area of Jack the Ripper, to the churches of Nicholas Hawksmoor, along the routes of "From Hell". Meet William Blake and walk along "Ripper Street". Discover London's ›genius loci‹, its ›spirit of place‹. This alternative travel guide has two sides: A scientific trip through the depiction of London's ›genius loci‹ in literature by authors such as Iain Sinclair, Alan Moore, Ben Aaronovitch, Neil Gaiman and Peter Ackroyd. And the tour stories, that lead you to the historical ›genius loci‹. Connect places, become the flaneur, the walker, the wanderer. This book approaches London the only two ways, according to Röttgers, that it can be experienced properly: through literature and through walking.

Ladies of the Lake Delcourt

This beautiful book visits twenty-eight richly atmospheric sites and tells the mythological stories associated with them. Woven into these landscapes are tales of love and betrayal, greed and courage, passion and revenge, featuring the famous characters of Celtic lore, such as Cú Chulainn, the children of Lír and Queen Maeve. The historical and archaeological facts and the folk traditions of each ancient site are explored. Some are famous, such as Tara and Newgrange; others are less well known but equally captivating such as the Béara Peninsula in Cork. In a world where many have lost touch with the land and their past, the legendary Irish landscape still survives and the stories are never quite over as long as there are people to tell them.

Eclectic British author Alan Moore (b. 1953) is one of the most acclaimed and controversial comics writers to emerge since the late 1970s. He has produced a large number of well-regarded comic books and graphic novels while also making occasional forays into music, poetry, performance, and prose. In *Alan Moore: Comics as Performance, Fiction as Scalpel*, Annalisa Di Liddo argues that Moore employs the comics form to dissect the literary canon, the tradition of comics, contemporary society, and our understanding of history. The book considers Moore's narrative strategies and pinpoints the main thematic threads in his works: the subversion of genre and pulp fiction, the interrogation of superhero tropes, the manipulation of space and time, the uses of magic and mythology, the instability of gender and ethnic identity, and the accumulation of imagery to create satire that comments on politics and art history. Examining Moore's use of comics to scrutinize contemporary culture, Di Liddo analyzes his best-known works--*Swamp Thing*, *V for Vendetta*, *Watchmen*, *From Hell*, *Promethea*, and *Lost Girls*. The study also highlights Moore's lesser-known output, such as *Halo Jones*, *Skizz*, and *Big Numbers*, and his prose novel *Voice of the Fire*. *Alan Moore: Comics as Performance, Fiction as Scalpel* reveals Moore to be one of the most significant and distinctly postmodern comics creators of the last quarter-century.

Interpreting Roman London Oxford University Press, USA

An exploration of the traditional rites of auspicious building and crafting • Explains the ceremonial beginnings and Hermetic principles in the laying out of foundations not only for sacred buildings like temples but also for homes and barns • Examines the principles and ceremonies of electional astrology and details how to compute natural time, as opposed to clock time • Shares examples from ancient Egypt, Iran, India, and Europe that range from the Stone Age to the Renaissance and include secret societies When we make things--whether a building, a sacred space, or a magical object--there is a precise moment when the artifact comes into being as a separate entity. That moment in time possesses its own unique quality, and because of this, there is a right time to do something and a wrong time. And, as Nigel Pennick reveals, we have the power to select favorable moments for our creations, just as our ancestors did. Illustrating ancient principles of divination, chronomancy, and electional astrology,

Pennick examines all the factors behind the ancestral art of geomancy: the auspicious creation and alignment of sacred buildings as places of power. Sharing examples from ancient Egypt, Iran, India, and Europe that range from the Stone Age to the modern day, including secret societies like the Rosicrucians and the Freemasons, he explains how many cities were constructed on specially selected sites and founded ritually at precise, predetermined moments. Looking at the traditional rites of creating places of power, Pennick explains the ceremonial beginnings and Hermetic principles in the laying out of foundations as well as the use of sacrifice in the building of many notable structures. Examining the role of sacred geometry in geomancy, Pennick explains the Hermetic meaning assigned to each direction in traditional European cultures as well as the principles of natural measures and the science of understanding lucky and unlucky days. Revealing how geomantic principles are rooted in the structure of the world and the cosmic patterns of space and time, the author shows how they transcend the ages and are just as meaningful today as they were to our ancestors.
