Set in the remote, northeastern hills of India, The point of return revolves around the father-son relationship of a willful, curious boy, Babu, and Doctor Dam, an enigmatic product of British colonial rule and Nehruvian nationalism. Told in reverse chronological order, the novel examines an India where the ideals that brought freedom from colonial rule are beginning to crack under the pressure of new rebellions and conflicts. For Dr. Dam and Babu, this has meant living as strangers in the same home, puzzled and resentful, tied only by blood. As the father grows weary and old and the son tries to understand him, clashes between ethnic groups in their small town show them to be strangers to their country as well. Before long, Babu finds himself embarking on a great journey, an odyssey through the memories of his father, his family, and his nation.

This book examines India's Northeast borderland – strategically positioned at the confluence of South Asia, East and Southeast Asia – from the perspective of international relations. The volume interrogates the geopolitics of region-making in both colonial and postcolonial times and traces the transformation of Northeast India from a British strategic frontier into a securitised borderland. It situates the region in transnational interactions both in conflict and cooperation with its immediate neighbouring regions of China, Bangladesh, and Myanmar, especially in the context of India's Look East/Act East policy. The volume paves the way for a new 'region-state' framework borne out of the constructivist worldview and offers answers to many conundrums centring border studies. It further delineates approaches to overcoming the present geopolitical and territorial challenges of India's Northeast with a critical thrust on regional policymaking. The volume will be of interest to students and researchers in the disciplines of social sciences and humanities in India as well as South and Southeast Asia. It will be especially useful to those in politics and international relations, strategic studies, international

political economy, foreign policy, development studies and regional development, besides foreign policy-makers and diplomats, development practitioners, economists and policy analysts.

The Preface Elucidates That The Text Is Designed For Degree Courses In India. However, I Imagine That It Could Play A Useful Role For Those In Britain. It Is Mainly Intended As An Introductory Text For Those Studying Social Sciences And Economics.

Individuals From Other Disciplines Would, No Doubt, Still Find It Useful As A General Reference. The Chapters Are Well Written And Easy To Follow. An Appealing Feature Of The Book Is That Much Emphasis Is Placed On The Understanding And Application Of Statistical Methods. There Is Avoidance Of Excessive Presentation Of Formulae. For These Reasons Alone I Think That Students Will Find The Text Attractive. Each Chapter Finishes With A Series Of Well-Formulated Questions, Which Test The Readers' Understanding.

The Two Chapters On Statistical Inference And Tests Of Significance Are Excellent. It Is A Comprehensive And Interesting Text, One That I Think Most Students Would Find Useful. Indeed, It Is An Useful Addition To My Library, Having Already Referred To It Often. The Statistician, London, Vol. 45, No. 3 (1996).
