"The philosophy of mind is unique among contemporary philosophical subjects," writes John Searle, "in that all of the most famous and influential theories are false." One of the world's most eminent thinkers, Searle dismantles these theories as he presents a vividly written, comprehensive introduction to the mind. He begins with a look at the twelve problems of philosophy of mind--which he calls "Descartes and Other Disasters"--problems which he returns to throughout the volume, as he illuminates such topics as materialism, consciousness, the mind-body problem, intentionality, mental causation, free will, and the self. The book offers a refreshingly direct and engaging introduction to one of the most intriguing areas of philosophy.

Dressing Global Bodies addresses the complex politics of dress and fashion from a global perspective spanning four centuries, tying the early global to more contemporary times, to reveal clothing practice as a key cultural phenomenon and mechanism of defining one’s identity. This collection of essays explores how garments reflect the hierarchies of value, collective and personal inclinations, religious norms and conversions. Apparel is now recognized for its seminal role in global, colonial and post-colonial engagements and for its role in personal and collective expression. Patterns of exchange and commerce are discussed by contributing authors to analyse powerful and diverse colonial and postcolonial practices. This volume rejects assumptions surrounding a purportedly all-powerful Western metropolitan fashion system and instead aims to emphasize how diverse populations seized agency through the fashioning of dress. Dressing Global Bodies contributes to a growing scholarship considering gender and race, place and politics through the close critical analysis of dress and fashion; it is an indispensable volume for students of history and especially those interested in fashion, textiles, material culture and the body across a wide time frame.

“This rich volume will interest scholars and students of Africa, the African diaspora, world history, legal history, and international affairs.” —Lorelle Semley, author of To Be Free and French: Citizenship in France’s Atlantic Empire
The enforced removal of individuals has long been a political tool used by African states to create generations of asylum seekers, refugees, and fugitives. Historians often present such political exile as a potentially transformative experience for resilient individuals, but this reading singles the exile out as having an exceptional experience. This collection seeks to broaden that understanding within the global political landscape by considering the complexity of the experience of exile and the lasting effects it has had on African peoples. The works collected in this volume seek to recover the diversity of exile experiences across the continent. This corpus of testimonials and documents is presented as an “archive” that provides evidence of a larger, shared experience of persecution and violence. This consideration reads exiles from African colonies and nations as active participants within, rather than simply as victims of, the larger global diaspora. In this way, exile is understood as a way of asserting political dissidence and anti-imperial strategies. Broken into three distinct parts, the volume considers legal issues, geography as a strategy of anticolonial resistance, and memory and performative understandings of exile. The experiences of political exile are presented as fundamental to an understanding of colonial and postcolonial oppression and the history of state power in Africa.

This collection examines cloth as a material and consumer object from early periods to the twenty-first century, across multiple oceanic sites—from Zanzibar, Muscat and Kampala to Ajanta, Srivijaya and Osaka. It moves beyond usual focuses on a single fibre (such as cotton) or place (such as India) to provide a fresh, expansive perspective of the ocean as an “interaction-based arena,” with an internal dynamism and historical coherence forged by material exchange and human relationships. Contributors map shifting social, cultural and commercial circuits to chart the many histories of cloth across the region. They also trace these histories up to the present with discussions of contemporary trade in Dubai, Zanzibar, and Eritrea. Richly illustrated, this collection brings together new and diverse strands in the long story of textiles in the Indian Ocean, past and present.

Le Grand Dictionaire Historique, ou le mélange curieux de l'histoire sacrée et profane Readme Publishing

The catalyst for this book is the fact that noted sociologist Charles Tilly, upon his death in 2008, left one completed chapter of an unfinished manuscript entitled “Cities, States, and Trust Networks,” examining the relationships between cities and nation-states over the sweep of history, and in particular the role of trust networks in mediating this relationship. Though this was the catalyst, the book serves a broader purpose: to survey recent frontier work on cities, nation-states, and the relations between the two in historical and contemporary perspective. Essays in the book will address four main themes: city-state relations, trust networks and commitment, democracy and inequality, and the importance of historical legacies in shaping state structures, practices, and capacities. They will be global in scope, with research on the United States, Latin America, Europe, Asia, and Africa; a number of the pieces will be comparative. They will also be interdisciplinary, including works of geography, history, political science, sociology, urban planning. The book addresses several confluent needs of readers. One is to simply update themes addressed in earlier edited work such as Bringing the State Back In (1985). A second is to bring together current thinking about cities on the one hand and nation-states on the other, literatures that are often segregated from each other. A third is to perform those two purposes in a way that is global in scope and combines both historical and current analyses, to pull together insights from the full range of human experience.
