In Faces of Faith: Reflections in a Rearview Mirror, David Fly writes, A few years ago, I noticed that automakers had come up with the line I've looked for all my life. They put it on the rearview mirror on the passenger side. Objects in the mirror are closer than they appear. That's the way it is with my family. They are the faces in my rearview mirror. Telling stories about them has brought them closer, has taught me who I am and where I belong, and has revealed the Spirit of God. If I didn't tell those stories again, I would miss them terribly. That's what this book is all about.

*Tracking the Texas Rangers: The Twentieth Century* is an anthology of fifteen previously published articles and chapter excerpts covering key topics of the Texas Rangers during the twentieth century. The task of determining the role of the Rangers as the state evolved and what they actually accomplished for the benefit of the state is a difficult challenge. The actions of the Rangers fit no easy description. There is a dark side to the story of the Rangers; during the Mexican Revolution, for example, some murdered with impunity. Others sought to restore order in the border communities as well as in the remainder of Texas. It is not lack of interest that complicates the unveiling of the mythical force. With the possible exception of the Alamo, probably more has been written about the Texas Rangers than any other aspect of Texas history. *Tracking the Texas Rangers* covers leaders such as Captains Bill McDonald, "Lone Wolf" Gonzallas, and Barry Caver, accomplished Rangers like Joaquin Jackson and Arthur Hill, and the use of Rangers in the Mexican Revolution. Chapters discuss their role in the oil fields, in riots, and in capturing outlaws. Most important, the Rangers of the twentieth century experienced changes in investigative techniques, strategy, and intelligence gathering. *Tracking* looks at the use of Rangers in labor disputes, in race issues, and in the Tejano civil rights movement. The selections cover critical aspects of those experiences—organization, leadership, cultural implications, rural and urban life, and violence. In their

introduction, editors Bruce A. Glasrud and Harold J. Weiss, Jr., discuss various themes and controversies surrounding the twentieth-century Rangers and their treatment by historians over the years. They also have added annotations to the essays to explain where new research has shed additional light on an event to update or correct the original article text.

Jeremiah 29:11 says, "I know the plans I have for you, ' says the Lord." The truth of this statement is, it is indeed, God who knows the plans he has for us but we don't; not until he reveals them to us, that is. Therefore, in order to walk according to God's plans we need to be ready to seek and track his purposes on a daily basis. This is a process we call, God-tracking. The e-mail devotional, trACKer has at it's core the message of seeking to remain within the will of God by tracking his plans and purposes. This, the second in a series of devotional books, is comprised of a selection of 52 trACKers that Dudley has published over the years. Most of what you will read is based upon the author's own life journey. The hope is that you will read one entry per week over the course of one year.

**The Face of God** Church Publishing, Inc. Targeted advertisements, tailored information feeds, and recommended content are now common and somewhat inescapable components of our everyday lives. With the help of searches, browsing history, purchases, likes, and other digital interactions, technological experiences are now routinely "personalized." Companies with access to this information often downplay the fact that users' personal data serves as a key form of monetization, and their privacy policies tend to use the terms "personalization" and "customization" to legitimize the practice of tracking and algorithmically anticipating users' daily movements. In *Making it Personal*, Tanya Kant sheds light on the dilemmas of algorithmic personalization, exploring such key contemporary questions as: What do users really know about the algorithms that guide their online experiences and social media presence? And if personalization practices seek to act on our behalf, then how can users constitute, retain, or relinquish their autonomy and sense of self? At the heart of the book are new interviews and focus groups with web users who-through a myriad of resistant, tactical, resigned or trusting engagements-encounter algorithmic personalization as part of their lived experience on the web. Tanya Kant proposes that for those who encounter it, algorithmic personalization creates

epistemic uncertainties that can emerge as trust or anxiety, produces an ongoing struggle for autonomy between user and system, and even has the power to intervene in identity constitution. In doing so, algorithmic personalization does not just generate "filter bubbles" for individuals' worldviews, but also creates new implications for knowledge production, the deployment of cultural capital as an algorithmic tactic, and, above all, formations of identity itself.

[Tracking the Literature of Tropical Weather](#) Rowman & Littlefield

This book tracks across history and cultures the ways in which writers have imagined cyclones, hurricanes, and typhoons, collectively understood as "tropical weather." Historically, literature has drawn upon the natural world for its store of symbolic language and technical device, making use of violent storms in the form of plot, drama, trope, and image in order to highlight their relationship to the political, social, and psychological realms of human affairs. Charting this relationship through writers such as Joseph Conrad, Herman Melville, Gisèle Pineau, and other writers from places like Australia, Japan, Mauritius, the Caribbean, and the Philippines, this ground-breaking collection of essays illuminates the specificities of the ways local, national, and regional communities have made sense and even relied upon the literary to endure the devastation caused by deadly tropical weather.

Is it possible to find God beyond the distorted images and empty words? Can we even speak about God at all? The author claims that it is more important than ever to look for a truer image of God. A person who seeks God's face will be compelled, at the same time, to seek his or her own face. Conversely, those seeking to find themselves are often compelled to search for God. The book describes faith as a spacious landscape in which one can breathe freely and engages the rich imagery of the Bible to help the individual breathe freely and find orientation without feeling imprisoned. "This openness and freedom are to be found in the Gospel itself," says the author. "They were lived by the Master himself, who portrayed the face of God by meeting human beings where they actually were-not where they ought to have been." +

It is written from the perspective of the need to analyze media discourses and the ways in which their circulation creates a 'common sense' view of the world. The focus is on English language papers and news magazines; additionally, some Hindi, Urdu, and Sindhi newspapers are examined. The highlight is on the ways in which English language publications contribute to and function within middle class matrices of modernity, consumption, conflict, and conservatism in India.
