You're Never Weird on the Internet (Almost) Feral House

The Internet isn't all cat videos. There's also Felicia Day -- violinist, filmmaker, Internet entrepreneur, compulsive gamer, hoagie specialist, and former lonely homeschooled girl who overcame her isolated childhood to become the ruler of a new world ... or at least semi-influential in the world of Internet Geeks and Goodreads book clubs. After growing up in the south where she was "homeschooled for hippie reasons", Felicia moved to Hollywood to pursue her dream of becoming an actress and was immediately typecast as a crazy cat-lady secretary. But Felicia's misadventures in Hollywood led her to produce her own web series, own her own production company, and become an Internet star. Felicia's short-ish life and her rags-to-riches rise to Internet fame launched her career as one of the most influential creators in new media. Now Felicia's strange world is filled with thoughts on creativity, video games, and a dash of mild feminist activism -- just like her memoir. Felicia's story demonstrates that everyone should embrace what makes them different and be brave enough to share it with the world, because anything is possible now -- even for a digital misfit.

"Fascinating. Doidge's book is a remarkable and hopeful portrait of the endless adaptability of the human brain."—Oliver Sacks, MD, author of *The Man Who Mistook His Wife for a Hat* What is neuroplasticity? Is it possible to change your brain? Norman Doidge's inspiring guide to the new brain science explains all of this and more. An astonishing new science called neuroplasticity is overthrowing the centuries-old notion that the human brain is immutable, and proving that it is, in fact, possible to change your brain. Psychoanalyst, Norman Doidge, M.D., traveled the country to meet both the brilliant scientists championing neuroplasticity, its healing powers, and the people whose lives they've transformed—people whose mental limitations, brain damage or brain trauma were seen as unalterable. We see a woman born with half a brain that rewired itself to work as a whole, blind people who learn to see, learning disorders cured, IQs raised, aging brains rejuvenated, stroke patients learning to speak, children with cerebral palsy learning to move with more grace, depression and anxiety disorders successfully treated, and lifelong character traits changed. Using these marvelous stories to probe mysteries of the body, emotion, love, sex, culture, and education, Dr. Doidge has written an immensely moving, inspiring book that will permanently alter the way we look at our brains, human nature, and human potential.

For something is systematically dismantling the nine planets of the solar system. Something beyond human comprehension. Something that has no use for biological life in any form...

Planning and Management of Meetings, Expositions, Events and Conventions, Global Edition St. Martin's Press

Aural History is an anti-memoir memoir of encountering devastating grief that uses experimental storytelling to recreate the winding, fractured path of loss and transformation. Written by a thirty-something psychotherapist and queer theorist, *Aural History* is structured as a sequence of three sections that each use different narrative styles to represent a distinctive stage in the protagonist's evolving relationship to trauma. *Aural History*

explores how a cascade of self-dissolving losses crisscrosses a girl's coming of age. Through lyric prose, the first section follows a precocious tomboy whose fierce attachment to her father forces her, when he dies and she is twelve years old, to run the family bakery business, raise a delinquent younger brother, and take care of a destructive, volatile mother. In part two, scenes narrated in the third person illustrate a high-achieving high school student who is articulate and in control except for bouts of sudden and inchoate attractions, the first of which is to her severe and coaxing English teacher. The third story tells of her relation with a riveting, world-famous professor, interspersed with a tragic-comic series of dialogues between the protagonist and a cast of diverse psychotherapists as she, now twenty-five years old and living in New York City, undertakes an odyssey to understand why true self-knowledge remains elusive and her real feelings, choked and incomplete. In what Phillip Lopate calls "an amazing document," *Aural History* pushes the narrative conventions of memoir to capture a story the genre of memoir usually struggles to tell: that you can lose yourself, and have no way to know it. Gila Ashtor is a critical theorist, writer and psychoanalyst based in New York City. She graduated with an MA in Literature and Philosophy from the University of Chicago and a PhD in Literature from Tufts University in 2016. Her research specializations include queer theory, psychoanalysis, trauma, affect studies and pedagogy. Her academic writing focuses on the relationship between queer theory and psychoanalysis and is the subject of her forthcoming book, *Homo Psyche: Queer Theory and Metapsychology*. Her clinical writing is primarily oriented to post-Freudian technique and theory and specifically explores the metapsychology of Jean Laplanche in the context of affect and sexuality studies. She is an Editor of *Studies in Gender and Sexuality* and is completing her

MFA in Nonfiction at Columbia University. Currently, she is a psychoanalyst at the Institute for Psychoanalytic Training & Research (IPTAR) in New York City, where she treats adults and children.

Internationally renowned sociologist Arthur J. Vidich (1922-2006) was an active researcher and teacher whose career spanned the second half of the twentieth century. With a *Critical Eye: An Intellectual and His Times* recounts Vidich's career in the wider cultural context of his life and work. Providing a window into post-World War II intellectual life, the richness of the autobiography lies not only in Vidich's perspectives on the academic world but also in his personal and sociological observations about the world around him. Best known for his book *Small Town in Mass Society* (co-authored with Joseph Bensman, 1958), Vidich taught for more than forty years at the New School for Social Research in New York. He published eighteen books, co-edited a book series with Robert Jackall, and was the founding editor of the *International Journal of Politics, Culture, and Society*. Vidich "provides a valuable lens ... on a profoundly important time in the formation of the modern social sciences, when the changes in the U.S. were having formative impacts on academe in other parts of the world," writes Robert J. Antonio, professor of sociology at the University of Kansas. "The autobiography is lucidly and unpretentiously written." Book jacket.
