No need for copper or plates to achieve the distinctive calligraphic script of eighteenth-century Europe — just a pen, ink, and this comprehensive workbook will do. Master calligrapher Dick Jackson explains the basic strokes for almost all letters of the copperplate alphabet. Simple instructions and examples introduce the swirls, flourishes, strikings, and thick and thin strokes that make

copperplate calligraphy a source of pleasure for the practitioner and a delight to the reader. A historical introduction traces the growth of copperplate from its roots in the French *ronde* of the seventeenth century, to its adaptation by English clerks into their copybooks, and the development of the style known as round hand. In addition, guide sheets and instructions for individual letters and numbers offer aspiring calligraphers a practical approach to this enduring art form.

### **The Universal Penman**

Courier Corporation  
Chicago-based jewelry engraver J. M. Bergling (1866–1933) created thousands of letter styles, signets, monograms, and ciphers. A noted author on the subjects of lettering and heraldic design, Bergling created books that became standard references of his era. He assembled his first book, *Art Monograms and Letters*, with the hopes of inspiring other etchers, engravers, sign painters, and artisans. This volume contains selected

illustrations from that publication in addition to his complete Art Alphabets and Lettering, which comprises 96 pages of layouts and letter styles ranging from simple to ornate. Commercial artists, designers, calligraphers, engravers, amateurs, and professionals will prize this exclusive edition as a source of high-quality images and alphabets. This reference book features an appreciative Foreword by artist and author James Gurney, which places Bergling's

works in historical context. *Italic and Copperplate Calligraphy* Courier Dover Publications  
The marvels of Celtic design depend both on understanding how to create ornament and pattern, and on knowing how to devise a composition - a dazzling arrangement which is even more striking than its individual components. Here you can find the key to these remarkable designs. Jack Mackinder has divided his book into two parts. Firstly, he

explains how the pages of the Book of Kells, the Book of Durrow and the other great Gospel manuscripts of the 7th to 9th centuries were set out by the ancient scribes. The author has re-created the precise geometric methods they used, explaining how you can apply these principles to your own work. Secondly, he shows how to draw step patterns, key patterns, interlaces and spirals to fit into the shapes created in the manuscripts. Monograms and
