"[Dressed to kill] seeks to show naval uniforms from a new perspective because it is important that the development of uniform be viewed alongside contemporary civilian fashions. The essays at the beginning not only examine the progression of regulations but also, more significantly, place the uniforms in their economic, social and historical contexts. They are followed by a catalogue of selected uniforms from the rich collections of the National Maritime Museum, which serve to reinforce the themes drawn out in the essays. The last section of line drawings of selected patterns

provides an insight into the construction of the garments."--T.p. verso.

The story of the thirteen courageous Black men who integrated the U.S. Navy during World War II, leading desegregation efforts across America and anticipating the civil rights movement Through oral histories and original interviews with surviving family members, Dan Goldberg brings thirteen forgotten heroes away from the margins of history and into the spotlight. He reveals the opposition these men faced: the racist pseudo-science, the regular condescension, the repeated epithets, the verbal abuse and even violence. Despite these immense challenges, the Golden Thirteen persisted—understanding the power of integration, the opportunities for black Americans if they succeeded, and the consequences if they failed. Until 1942, black men in the Navy could hold jobs only as cleaners and cooks. The Navy reluctantly decided to select the first black men to undergo officer training in 1944, after enormous pressure from ordinary citizens and civil rights leaders. These men, segregated and sworn to secrecy, worked harder than they ever had in their lives and ultimately passed their exams with the highest average of any class in Navy history. In March 1944, these sailors became officers, the first black men to wear the gold stripes. Yet even then, their fight wasn't over: white men refused to salute them, refused to eat at their table, and refused to accept that black men could be superior to them in rank. Still, the Golden Thirteen persevered, determined to hold their heads high and set an example that would inspire generations to come. In the vein of Hidden Figures, The Golden Thirteen reveals the contributions of heroes who were previously lost to history.

Royal Navy Uniforms 1930-1945 uses over 400 illustrations - both period images and new colour photographs of original items - to show the clothing of both Officers and Ratings in World War II and during the years leading up to it, when Naval uniforms underwent significant modernization. The illustrations are supported by detailed text describing the development and use of Naval clothing of the time. Its contents include Officers' clothing and effects; Class 1 and III Ratings' clothing and effects; seamens' clothing and effects; battledress and tropical clothing; miscellaneous clothing, personal effects and substantive and non-substantive insignia. This is the first book to offer a detailed study of Royal Navy clothing in the 1930s and World War II and will be a vital resource for collectors, historians and enthusiasts. All of the major uniform types are superbly illustrated with 470 colour and black & white studio images and period photographs.
