The Officers

Camp tells the story of Caro, a young officer from Florence, and his companions from the time of their capture by the advancing Germany army in the summer of 1943 until their release from a work camp almost two years later. These men seem to have stumbled into their fate: captured and transported to Germany, their lives seem almost dreamlike, and nothing stands out,

except when someone is killed or disappears, or starves to death. As the months of imprisonment mount and the officers are moved farther away from their homeland - and into smaller and increasingly poorly run camps - they are reduced to mere shells of humanity, their hope preserved only by intense discussions of food and the swapping of elaborate "recipes".

Now in paperback with new preface  
The celebrated Joan Wulff was one of the first and few women to earn a reputation as a noteworthy fly fisher. She first published this immensely helpful book for women who are learning the sport or those

wanting to improve, and, because of its solid approach, it has found an audience with all who enjoy angling with a fly. "To get the most out of this sport," says Joan, "you must be independent: capable of choosing your tackle, tying on leader tippetts and flies, reading water, wading safely, and playing fish with skill." The book teaches all these things and the myriad techniques that have worked for

Joan in her lifetime of practicing and perfecting the sport.
