A rare systematic thinker, Habermas has furthered our understanding of modernity, social interaction and linguistic practice, societal institutions, rationality, morality, the law, globalization, and the role of religion in multicultural societies. He has helped shape discussions of truth, objectivity, normativity, and the relationship between the human and the natural sciences. This volume provides an accessible and comprehensive conceptual map of Habermas' theoretical framework and its key concepts, including the theory of communicative action, discourse ethics, his social-political philosophy and their applications to contemporary issues. It will be an invaluable resource for both novice readers of Habermas and those interested in a more refined understanding of particular aspects of his work.

The Struggle of the Shi'is in Indonesia is a pioneering work. It is the first comprehensive scholarly examination in English of the development of Shiism in Indonesia. It focuses primarily on the important period between 1979 and 2004 - a period of nearly a quarter of a century that saw the notable dissemination of Shi'i ideas and a considerable expansion of the number of Shi'i adherents in Indonesia. Since Islam in Indonesia is overwhelmingly Sunni, this development of Shiism in a predominantly Sunni context is a remarkable phenomenon that calls for careful, critical investigation. There is also an important examination of the principal ideas underlying the Madhab Ahl al-Bayt, the Imamate and Imam Madhi, Ja'fari jurisprudence and ritual piety. Appropriately, in his discussion, Zulkifli provides a succinct outline of contrasts with Sunni ideas and practice. He also examines the publishing efforts that underpinned the dissemination of Shi'i ideas and the founding of IJABI (Ikatan Jamaah Ahlul Bait Indonesia) in July 2000 for the propagation of Ahl al-Bayt teachings. Given the Indonesian context, Zulkifli is also concerned with Sunni reactions to these Shi'i developments - a story that continues to unfold to the present. This book as a work of great value and significance for the continuing understanding of the richness and complexity of Indonesian Islam.

If the Qur'an is the first written formulation of Islam in general, Malik's Muwatta' is arguably the first written formulation of the Islam-in-practice that becomes Islamic law. This book considers the methods used by Malik in the Muwatta' to derive the judgements of the law from the Qur'an and is thus concerned on one level with the finer details of Qur'anic interpretation. However, since any discussion of the Qur'an in this context must also include considerations of the other main source of Islamic

law, namely the sunna, or normative practice, of the Prophet, this latter concept, especially its relationship to the terms of hadith and amal (traditions and living tradition), also receives considerable attention, and in many respects, this book is more about the history and development of Islamic law than it is about the science of Qur'anic interpretation. This is the first book to question the hitherto accepted frameworks of both the classical Muslim view and the current revisionist western view on the development of Islamic law. It is also the first study in a European language to deal specifically with the early development of the Madinan, later Malik, school of jurisprudence, as it is also the first to demonstrate in detail the various methods used, both linguistic and otherwise, in interpreting the legal verses of the Qur'an. It will be of interest to all those interested in the underlying bases of Islamic law and culture, and of particular interest to those involved in studying and teaching Islamic studies, both at undergraduate and research level. It will also be of interest to those studying the relationship between orality and literacy in ancient societies and the writing down of ancient law.

'Structural reform has been one of the most important, and yet one of the most neglected, aspects of modern local government.

This book represents the first attempt, since the early seventies, at providing a comprehensive account of both the theory and practice of structural reform in local government in developed countries. Using recent policy experience from seven different countries, the authors present seminal theoretical perspectives on structural reforms in local governance and the policy implications deriving from them. Written by well-known scholars of local government from around the world, this volume is a "must-read" for all academics, practitioners, students and policymakers.' - Giorgio Brosio, University of Turin, Italy

In this groundbreaking book, organizational effectiveness experts Edward Lawler and Christopher Worley show how organizations can be "built to change" so they can last and succeed in today's global economy. Instead of striving to create a highly reliable Swiss watch that consistently produces the same behavior, they argue organizations need to be designed in ways that stimulate and facilitate change. Built to Change focuses on identifying practices and designs that organizations can adopt so that they are able to change. As Lawler and Worley point out, organizations that foster continuous change are closely connected to their environments. Reward experimentation. Learn about new practices and technologies. Commit to continuously improving performance. Seek temporary competitive advantages.

We live in fantastic times. Collectively we know more about the world around us than any one individual could ever learn in their lifetime. Some of that is an experience which underlies the natural complexity of our physical presence. Some of it has to do with the dynamic complexity of life. Above this, we have created constantly evolving and hugely complex social interactions to maintain our growing technological innovations. "Code Not Over" presents to us how to design and build useful software in the right way. This book gives us real-world example cases that open up our minds to see the enormous challenges in software development we can turn them into opportunities. This book fits for anyone who wants to flourish in learning about software development.

In the revised Fourth Edition of the best-selling text, John W. Creswell and new co-author Cheryl N. Poth explore the philosophical underpinnings, history, and key elements of five qualitative inquiry approaches: narrative research, phenomenology, grounded theory, ethnography, and case study. Preserving Creswell's signature writing style, the authors compare the approaches and relate research designs to each of the traditions of inquiry in a highly accessible manner. Featuring new content, articles, pedagogy, references, and expanded coverage of ethics throughout, the Fourth Edition is an ideal introduction to the theories, strategies, and practices of qualitative inquiry.

Psychologists, economists, historians, computer scientists, sociologists, philosophers, and legal scholars explore the conscious choice not to seek information. The history of intellectual thought abounds with claims that knowledge is valued and sought, yet individuals and groups often choose not to know. We call the conscious choice not to seek or use knowledge (or information) deliberate ignorance. When is this a virtue, when is it a vice, and what can be learned from formally modeling the

underlying motives? On which normative grounds can it be judged? Which institutional interventions can promote or prevent it? In this book, psychologists, economists, historians, computer scientists, sociologists, philosophers, and legal scholars explore the scope of deliberate ignorance.

This is the first study by a Western scholar of a significant facet of the history of the Second World War - Japanese-trained independence and volunteer armies as agents of revolution and modernization. At the time, the Japanese did not see that their military imprinting would affect a whole generation of political/military leadership of nations of post-Second World War Southeast Asia. Leaders like Suharto, Ne Win and Park are all products of Japanese military training.

This collection of more than one hundred excerpts from speeches, lectures, articles, and pamphlets, most of the not previously available in English, is regarded as the principal source book on Indonesian politics for the post-revolution period of 1945-1965. Chosen to define and illuminate the country's complex issues, the selections provide a balanced, comprehensive, and well-ordered survey of Indonesian political thinking from just before independence to the fall of Sukarno. After an introduction by Herbert Feith in which he discusses the Indonesian intellectual and his place in politics, the major and minor Indonesian figures of the period express their political views and their responses to the events of the first twenty years of independence. A commentary at the beginning of each chapter supplies background material relating to the selections. Three appendixes offer brief biographies of the Indonesian authors, a glossary of unfamiliar terms, and a chronological chart. Indonesian Political Thinking, now brought back to life in Equinox Publishing's Classic Indonesia series, is a must-have resource for Indonesians and Indonesianists alike. HERBERT FEITH was professor of Politics at Monash University, Victoria, Australia. He first became familiar with Indonesian problems when he was an English Language Assistant with the Ministry of Information of the Republic of Indonesia during the 1950s. He received the MA degree from the University of Melbourne, the PhD from Cornell University, and was a Research Fellow in the Department of Pacific History, Australian National University, 1960-62. Professor Feith is author of The

Decline of Constitutional Democracy in Indonesia, also a member of Equinox Publishing's Classic Indonesia series. LANCE CASTLES graduated from Melbourne University, Australia, received the MA degree from Monash University, and the PhD degree from Yale University. He is the author of Religion, Politics, and Economic Behavior in Java: The Kudus Cigarette Industry.

understand Nature,his own place in the scheme of Creation and the purpose of Life itself. In this quest for Truth, spanning many centuries and diverse civilizations, organized religion has shaped human life and determined to a large extent, the course of history. While some religions have been based on books, claimed by their adherents to be divinely inspired, others have relied solely on human experience. Al-Qur'an, the main source of the Islamic faith, is a book believed by Muslims, to be of completely Divine origin. Muslims also believe that it contains Divine guidance for all humankind. Since the message of the Qur'an is believed to be for all times, it should be relevant to every age. Does the Qur'an pass this test? In this booklet, I intend to give an objective analysis of the Muslim belief regarding the Divine origin of the Qur'an, in the light of established scientific discoveries. There was a time, in the history of world civilization, when "miracles", or what was perceived to be a miracle, took precedence over human reason and logic. But how do we define the term "miracle"? A miracle is anything that takes place out of the normal course of life and for which humankind has no explanation. However, we must be careful before we accept something as a miracle. An article in `The Times of India`, Mumbai, in 1993 reported that "a saint" by the name "Baba Pilot" claimed to have stayed continuously submerged under water in a tank for three consecutive days and nights. However, when reporters wanted to examine the base of the tank of water where he claimed to have performed this "miraculous" feat, he refused to let them do so. He argued by asking as to how one could examine the womb of a mother that gives birth to a child. The `Baba" was hiding something. It as a gimmick simply to gain publicity.(THE TRUTH ABOUT MUHAMMAD AND JESUS)Top 10 information you can learn in this book & why this is a must read book for all 1. Irshad Manji's message of moral courage, with stories about

contemporary reformers such as Martin Luther King, Jr., Gandhi, and Islam's own Gandhi, inspire and show the way to practicing faith without fear. Irshad addresses all people, Muslim and non-Muslim alike, in this universal message about the importance of independent thought and internal strength, of love, liberty, free speech, and the pursuit of happiness. Allah, Liberty, and Love is about creating choices beyond conforming or leaving the faith, which is what Manji hears from young Muslims who write to her in frustration, whose emails, letters, and conversations are included in this book. Manji writes, "I'll show struggling Muslims how to embrace a third option: reforming ourselves." And she recounts many affecting stories from young people who have contacted her for advice on how to step out of limiting views of Islam and the restrictions they put on life, love, family, and careers.

Morphology of the Folk Tale Edward Elgar Publishing
Recalling the Indies reflects on a 'migrant story', the stories of the journeys of the Indisch Dutch from the days of their childhood in the Dutch East Indies, through their grim experiences of war-time imprisonment and the Indonesian revolution, to their eventual settlement in Australia. Almost half a million people of Dutch and Dutch-Indonesian descent were forced to leave their homeland when Indonesia claimed its independence from the Netherlands. Where would they go? To the Netherlands, whose language they spoke but from whose culture and climate they had become alienated? This was their first landing but here they were met with hostility. On to Australia? But there 'people of colour' were confronted by the infamous White Australia Policy. Eventually approximately 10,000 Indisch Dutch people settled in Australia; many more settled in North America, others in New Zealand. In this volume Joost Cote and Loes Westerbeek have brought together a broad range of contributors to tell the story of the Australian Indisch Dutch for the first time. Contributions range from the personal stories of the migrants themselves, to essays by Dutch and Australian scholars working in the field.

This book, first published in 1970, provides a description of the standard Arabic language used today as the universal means of written communication throughout the Arab world and in formal spoken communication (vernaculars differ both from each other and from the standard language). The principal emphasis is on syntax and morphology of which there exists no comprehensive

account. Phonology and lexicon are treated briefly and there is a chapter on the script.
