In the age of automation the ability to navigate persons and devices in indoor environments has become increasingly important for a rising

number of applications. However, we are still far away from achieving cheap provision of global indoor positioning with an accuracy of 1 meter or better. With the emergence of global satellite positioning systems, the performance of outdoor positioning has become excellent, but many mass market applications require seamless positioning capabilities in all environments. Therefore indoor positioning has become a focus of research and development during the past decade. This book categorizes all sighted indoor positioning approaches into 13 distinct technologies and describes the measuring principles of

each. Individual approaches are characterized and key performance parameters are quantified.

To God be the Glory is La Shea's second published book of poetry. The poems represent La Shea's acknowledgement that God is Supreme. He has control over the earth and universe.

The Bible states that the earth is the Lord's, and the fullness thereof; the world, and they that dwell therein.-- Psalm 24:1

The poems also represent people that have had an impact on La Shea's life either through example, support, or guidance. The exemplifying lives of Jesus Christ and Dr.

Martin Luther King, Jr.; two men who knew that their lives were on borrowed time and yet were not diswayed from accomplishing their unselfish contribution to mankind. These two great men and some family and friends are personified through La Shea's poems. May the book be a blessing to the reader and that he or she must also say, "To God be the Glory!"

Rehabilitation is a

comprehensive ready-reference for mental health practitioners and students, providing practical advice on the full range of interventions for psychosocial rehabilitation. It contextualises the interventions described and provides pointers to enable the reader to explore the theory and research. This manual recognises the wide-ranging impact of mental illness and its ramifications on daily life, and promotes a recovery model of psychosocial rehabilitation and aims to empower clinicians to engage their clients in tailored rehabilitation plans. The book is divided into five key sections. Section 1 looks at assessment covering tools available in

the public domain, instruments, scoring systems, norms and applications for diagnosis and measurement of symptoms, cognitive functioning, impairment and recovery. Section 2 covers the full range of therapeutic interventions and offers advice on training and supervision requirements and evaluation of process, impact and outcome. Section 3 provides manuals and programs for intervention effectively provided as group activities. Section 4 explains how to design a full programme that integrates therapeutic interventions with group programmes as well as services provided by other agencies. The final

section looks at peer support and self help, providing manuals and resources that support programmes and interventions not requiring professional or practitioner direction.

Recent rapid advances in femtosecond technology have had a great impact on their industrial applications such as: ultrafast optoelectronic devices and optical telecommunication systems, ultrashort-pulse lasers and measurement systems, and the development of novel materials for ultrafast functions. In this book, a wealth of knowledge covering requirements in applications details of recent achievements in important technical

areas is presented by world-prominent authors in a concise, systematic form. As a whole, this is the first comprehensive book on the emerging field of femtosecond technology.

Memoirs Springer Rehabilitation should not stop when the

disabled person is discharged from hospital, and many neurological patients require ongoing rehabilitation in order to maximize their functional abilities, minimize complications and promote full participation at home and in the community. This book analyses community rehabilitation needs from many different perspectives, including the views of disabled people, rehabilitation clinicians and service providers. Many examples of community rehabilitation schemes are presented, with evidence for their effectiveness, and case studies are used to highlight the main issues. The authors take an international view, and there are

chapters dealing with the disabled child in the community and with neuropsychological rehabilitation. This important book examines the growing trend towards community rehabilitation in neurology and is directed towards all clinicians involved with neurorehabilitation. *Laser Processing of Engineering Materials* Heinle ELT Through wonderful readings and carefully designed activities, this best-selling series helps students develop reading skills and systematically increase their active vocabulary. OF THE YEAR BY
BOOKPAGE AND
LIBRARY JOURNAL The
Crimson Petal and the
White meets Fight
Club: A page-turning
novel set in the world
of female pugilists and
their patrons in late
eighteenth-century
England. Moving from
a filthy brothel to a fine
manor house, from the
world of street fighters
to the world of
champions, *The Fair
Fight* is a vivid,
propulsive historical
novel announcing the
arrival of a dynamic
new talent. Born in a
brothel, Ruth doesn't
expect much for
herself beyond abuse.
While her sister's
beauty affords a
certain degree of
comfort, Ruth's harsh

looks set her on a path
of drudgery. That is
until she meets pugilist
patron George Dryer
and discovers her true
calling—fighting bare
knuckles in the prize
rings of Bristol. Manor-
born Charlotte has a
different cross to bear.
Scarred by smallpox,
stifled by her social
and romantic options,
and trapped in twisted
power games with her
wastrel brother, she is
desperate for an
escape. After a
disastrous, life-
changing fight
sidelines Ruth, the two
women meet, and it
alters the perspectives
of both of them. When
Charlotte presents
Ruth with an
extraordinary
proposition, Ruth
pushes dainty
Charlotte to enter the
ring herself and learn
the power of her own

strength. A gripping, page-turning story about people struggling to transcend the circumstances into which they were born and fighting for their own places in society, *The Fair Fight* is a raucous, intoxicating tale of courage, reinvention, and fighting one's way to the top.

The complete guide to understanding and using lasers in material processing! Lasers are now an integral part of modern society, providing extraordinary opportunities for innovation in an ever-

widening range of material processing and manufacturing applications. The study of laser material processing is a core element of many materials and manufacturing courses at undergraduate and postgraduate level. As a consequence, there is now a vast amount of research on the theory and application of lasers to be absorbed by students, industrial researchers, practising engineers and production managers. Written by an acknowledged expert in the field with over twenty years' experience in laser processing, John Ion distils cutting-edge information and research into a single key text. Essential for anyone studying or working with lasers,

Laser Processing of Engineering Materials provides a clear explanation of the underlying principles, including physics, chemistry and materials science, along with a framework of available laser processes and their distinguishing features and variables. This book delivers the knowledge needed to understand and apply lasers to the processing of engineering materials, and is highly recommended as a valuable guide to this revolutionary manufacturing technology. The first single volume text that treats this core engineering subject in a systematic manner. Covers the principles, practice and application of lasers in

all contemporary industrial processes; packed with examples, materials data and analysis, and modelling techniques

Technology in Supply Chain Management and Logistics: Current Practice and Future Applications analyzes the implications of these technologies in a variety of supply chain settings, including block chain, Internet of Things (IoT), inventory optimization, and medical supply chain. This book outlines how technologies are being utilized for product planning, materials management and inventory, transportation and distribution, workflow, maintenance, the environment, and in health and safety.

Readers will gain a better understanding of the implications of these technologies with respect to value creation, operational effectiveness, investment level, technical migration and general industry acceptance. In addition, the book features case studies, providing a real-world look at supply chain technology implementations, their necessary training requirements, and how these new technologies integrate with existing business technologies. Identifies emerging supply chain technologies and trends in technology acceptance and utilization levels across various industry sectors Assists professionals with technology investment

decisions, procurement, best values, and how they can be utilized for logistics operations. Features videos showing technology application, including optimization software, cloud computing, mobility, 3D printing, autonomous vehicles, drones and machine learning.
