been fighting the

Syndics for a

century—and losing

badly. Now its fleet is

crippled and stranded

in enemy territory.

Their only hope is a

man who's emerged

from a century-long

hibernation to find he

has been heroically

idealized beyond

belief.... Captain John

"Black Jack" Geary's

exploits are known to

every schoolchild.

Revered for his heroic

"last stand" in the

early days of the war,

he was presumed

dead. But a century

later, Geary miraculously returns and reluctantly takes command of the Alliance Fleet as it faces annihilation by the Syndics. Appalled by the hero-worship around him, Geary is nevertheless a man who will do his duty. And he knows that bringing the stolen Syndic hypernet key safely home is the Alliance's one chance to win the war. But to do that, Geary will have to live up to the impossibly heroic "Black Jack" legend....

Munger's career would

"Overboard with every weight! . . . everything!" Such were the loud and startling words which resounded through the air, above the vast watery desert of the Pacific, about four o'clock in the evening of the 23rd of March, 1865. Few can possibly have forgotten the terrible storm from the northeast, in the middle of the equinox of that year. The tempest raged without intermission from the 18th to the 26th of March. Its ravages were terrible in America, Europe, and Asia, covering a distance of eighteen hundred miles, and extending obliquely to the equator from the thirty-fifth north parallel to the fortieth south parallel. Towns were overthrown, forests uprooted,

coasts devastated by the mountains of water which were precipitated on them, vessels cast on the shore, which the published accounts numbered by hundreds, whole districts leveled by waterspouts which destroyed everything they passed over, several thousand people crushed on land or drowned at sea; such were the traces of its fury, left by this devastating tempest. It surpassed in disasters those which so frightfully ravaged Havana and Guadalupe, one on the 25th of October, 1810, the other on the 26th of July, 1825.

"One of the 12 best business books of all time.... Timeless principles of

empowering leadership.” – USA Today “The best how-to manual anywhere for managers on delegating, training, and driving flawless execution.” —FORTUNE Since Turn the Ship Around! was published in 2013, hundreds of thousands of readers have been inspired by former Navy captain David Marquet’s true story. Many have applied his insights to their own organizations, creating workplaces where everyone takes responsibility for his or her actions, where followers grow to become leaders, and where happier teams drive dramatically better results. Marquet was a Naval Academy graduate and an experienced officer when selected for

submarine command. Trained to give orders in the traditional model of “know all-tell all” leadership, he faced a new wrinkle when he was shifted to the Santa Fe, a nuclear-powered submarine. Facing the high-stress environment of a sub where there’s little margin for error, he was determined to reverse the trends he found on the Santa Fe: poor morale, poor performance, and the worst retention rate in the fleet. Almost immediately, Marquet ran into trouble when he unknowingly gave an impossible order, and his crew tried to follow it anyway. When he asked why, the answer was: “Because you told me to.” Marquet realized that while he had been trained for a different

submarine, his crew had been trained to do what they were told—a deadly combination. That’s when Marquet flipped the leadership model on its head and pushed for leadership at every level. Turn the Ship Around! reveals how the Santa Fe skyrocketed from worst to first in the fleet by challenging the U.S. Navy’s traditional leader-follower approach. Struggling against his own instincts to take control, he instead achieved the vastly more powerful model of giving control to his subordinates, and creating leaders. Before long, each member of Marquet’s crew became a leader and assumed responsibility for everything he did, from clerical tasks to crucial

combat decisions. The crew became completely engaged, contributing their full intellectual capacity every day. The Santa Fe set records for performance, morale, and retention. And over the next decade, a highly disproportionate number of the officers of the Santa Fe were selected to become submarine commanders. Whether you need a major change of course or just a tweak of the rudder, you can apply Marquet’s methods to turn your own ship around.

In To the Far Blue Mountains, Louis L'Amour weaves the unforgettable tale of a man who, after

returning to his homeland, discovers that finding his way back to America may be impossible. As part of the Louis L'Amour's Lost Treasures series, this edition contains exclusive bonus materials! Barnabas Sackett was leaving England to make his fortune in the New World. But as he settled his affairs, he learned that a royal warrant had been sworn out against him and that men were searching for him in every port. At issue were some rare gold coins Sackett had sold to finance his first trip to the Americas—coins believed to be part of a great treasure lost by King John years before. Believing that Sackett possesses the rest of the treasure, Queen Bess will stop at

nothing to find him. If he's caught, not only will his dream of a life in America be lost, but he will be brutally tortured and put to death on the gallows. Louis L'Amour's Lost Treasures is a project created to release some of the author's more unconventional manuscripts from the family archives. In Louis L'Amour's Lost Treasures: Volumes 1 and 2, Beau L'Amour takes the reader on a guided tour through many of the finished and unfinished short stories, novels, and treatments that his father was never able to publish during his lifetime. L'Amour's never-before-seen first novel, *No Traveller Returns*, faithfully completed for this program, is a voyage into danger and

violence on the high seas. Additionally, many beloved classics are being rereleased with an exclusive Lost Treasures postscript featuring previously unpublished material, including outlines, plot notes, and alternate drafts. These postscripts tell the story behind the stories that millions of readers have come to know and cherish.

The matter of

American servicemen missing in action (MIA) in Southeast Asia is a poignant and tragic issue resulting from the United States involvement in the Vietnam War. The problem of an adequate MIA accounting remains a principal point of contention between this country and the Socialist Republic of Vietnam, as well as a discordant issue separating the United States Government and a small but determined group of its citizens - some of the MIA families. One of the goals of the National Defense University is to provide an opportunity for our students and faculty to contribute to the public dialogue on a broad range of national security issues.

Captain Clarke prepared this carefully researched study while a resident student at The National War College during the 1977-78 academic year, and we are pleased to make it available through publication for a wider audience. The author describes the process of determination of MIA status, the political and psychological considerations that impacted on that process, and the development of the MIA question as an example of the intersection of domestic and international considerations impacting on policy. He discusses the manner in which the Vietnamese have attempted to employ this contentious issue

for their own purposes, and analyzes the differing approaches taken by Presidents Nixon, Ford, and Carter toward resolving the problem. By explaining how this painful impasse evolved, Captain Clarke's study not only contributes to public understanding of a sensitive and complex issue but also assists future policymakers in avoiding a repetition of this or similar predicaments. Army and Navy Chronicle, and Scientific Repository

The mysterious "missing years" of Captain Picard's life—before he commanded the Enterprise—are revealed at last in this Star Trek: The Next Generation novel! Jean-Luc Picard. His name has gone down in legend as the captain of the U.S.S. Stargazer and two starships

Enterprise. But the nine years of his life leading up to the inaugural mission of the U.S.S. Enterprise to Farpoint Station have remained a mystery—until now, as Picard's lost era is finally unearthed. Following the loss of the Stargazer and the brutal court-martial that resulted, Picard no longer sees a future for himself in Starfleet. Turning to his other love, archaeology, he embarks on a quest to rediscover a buried age of ancient galactic history...and awakens a living survivor of that era: a striking, mysterious woman frozen in time since before the rise of Earth's dinosaurs. But this powerful immortal has a secret of cataclysmic proportions, and her

plans will take Picard—aided along the way by a brilliant but naive android, an insightful Betazoid, and an enigmatic El-Aurian—to the heights of passion, the depths of betrayal, and the farthest reaches of explored space.

The Missing Man

Every year in the US, almost two million children run away from home. In addition, on the average, the police in our country have at any one time over 100,000 active missing-adult cases. This book will show readers how, with just a little advance preparation and insight, they can greatly increase their chances of finding a missing loved one, even after police have stopped actively looking. With

sensationalized child disappearances, teenagers vanishing, and adults faking their own deaths, the challenge of finding missing persons often falls most directly on those who love them. And though in past years this involved a considerable amount of footwork, that is no longer the case. With the advent of the Internet and the many new search engines available, much of the searching and canvassing can now be done from computers. Family members and friends looking for missing loved ones need to know what programs and databases to access, though, to get the search under way. Snow, reveals to readers the process the police use when

trying to locate missing people of interest, information that readers can then use to locate their own missing loved ones. Using real stories and first hand accounts, the author offers hope and guidance to those who may have given up the search for a child, a spouse, a parent, or a friend.

On April 6, 2013, a 53-year old male career captain died from injuries suffered from a fall during roof operations at a commercial structure fire. The initial box alarm was for smoke in the basement of a fabric store.

Approximately 30 - 45 minutes after smelling the odor of smoke, the store owner went to

the basement to investigate and found a fire in the rear of the basement (southwest corner). He attempted to extinguish the fire with a portable fire extinguisher, but due to smoke and fire, he was forced to leave the basement. The 1st Alarm for companies assigned to Box 1232 had a difficult time finding the seat of the fire due to the amount of heat and smoke. Crews also struggled to gain access to the basement due to fabric and other products limiting aisle space. After the 2nd Alarm was struck, the Incident Commander ordered Ladder 27 (L27) to the roof to make a trench cut between the fire building and the Bravo Exposure. L27 accessed the roof from

Side Charlie and were preparing to walk to the Bravo Exposure. The captain of L27 took several steps towards Side Alpha of the roof, which was obscured by smoke, and fell to the roof of a one-story storage building attached to the fire building. The captain died instantly. The other members of L27 heard the sound of the captain landing on the roof of a storage building. The driver/operator of L27 ordered the crew to their knees, conducted a personnel accountability report, and realized the captain was missing. The crew from L27 got off the roof and tried to locate the captain. They found him lying on the roof of the storage building and made several rescue

attempts. Before the captain could be removed, the storage building roof collapsed into the basement of the fabric store.

Rescue operations were started by breaching the wall of the storage building. Approximately 2 hours later, the captain was removed from the structure.
