BASIC Stamp: An Introduction to Microcontrollers introduces microcontroller theory using the Parallax BASIC Stamp I, II, and IIsx. The BASIC Stamp microcontroller is based on Microchip's PIC hardware with some modifications and is very approachable for beginning users. Once the basic theory is established, BASIC Stamp, 2/E walks the reader through applications suitable for designers as well as the home hobbyist. These applications can be used as is or as a basis for further modifications to suit specific design needs. BASIC Stamp, 2/E thoroughly explains the hardware base of the BASIC Stamp microcontroller including internal architecture, the peripheral functions, as well as providing the technical data sheets for each kind of chip. The authors also explain the BASIC Stamp development systems including DOS and Windows-based tools in tremendous detail. As an added feature, BASIC Stamp, 2/E includes full instructions for using PBASIC programming and formatting. The book provides many specific applications for microcontroller use, complete with programming instructions, including: single instructions, multiple instructions, interfacing directions, and more complex applications such as motion detection, light measurement, and home automation. Provides a keystone for the introductory level of the Newnes microelectronics titles Introduces PIC microcontroller operation Demonstrates applications for designers and hobbyists

Shakespeare's absolute pre-eminence is simply unparalleled. His plays pack theatres and provide Hollywood with block-buster scripts; his works inspire mountains of scholarship and criticism every year. He has given us many of the very words we speak, and even some of the thoughts we think. Nick Groom and Piero explore how Shakespeare became so famous and influential, and why he is still widely considered the greatest writer ever. They investigate how the Bard has been worshiped at different times and in different places, used and abused to cultural and political ends, and the roots of intense controversies which have surrounded his work. Much more than a biography or a guide to his plays and sonnets, Introducing Shakespeare is a tour through the world of Will and concludes that even after centuries, Shakespeare remains the battlefield on which our very comprehension of humanity is being fought out.

Kidnapped and sold into slavery in the American South, freeman Solomon Northup spent twelve years in bondage before being freed. Twelve Years a Slave is Northup's moving memoir, revealing unimaginable details of the horrors he faced as a slave on Southern plantations, and his unshakable belief that he would return home to his family. Written in the year after Northup was freed and published in the wake of Harriet Beecher Stowe's Uncle Tom's Cabin, Northup's story was quickly taken up by abolitionist groups and news organizations as part of the fight against slavery, and continues to resonate more than a century after the end of the American Civil War. <i>Image Perception</i> Raintree	
School refusal affects up to 5% of children and is a complex and stressful issue for the child, their family and school. The more time a child is away from school, the more difficult it is for the child to resume normal school life. If school refusal becomes an ongoing issue it can negatively impact the child's social and educational development. Psychologist Joanne Garfi spends most of her working life assisting parents, teachers, school counsellors, caseworkers, and community policing officers on how best to deal with school refusal. Now her experiences and expertise are available in this	

easy-to-read practical book. Overcoming School Refusal helps readers understand this complex issue by explaining exactly what school refusal is and provides them with a range of strategies they can use to assist children in returning to school. Areas covered include:

- types of school refusers
- why children refuse to go to school
- symptoms
- short term and long term consequences
- accurate assessment
- treatment options
- what parents can do
- what schools can do
- dealing with anxious high achievers
- how to help children on the autism spectrum with school refusal

Achtung-Panzer! Arms & Armour

This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

The study of the Earth's origin, its composition, the processes that changed and shaped it over time and the fossils preserved in rocks, have occupied enquiring minds from ancient times. The contributions in this volume trace the history of ideas and the research of scholars in a wide range of geological disciplines that have paved the way to our present-day understanding and knowledge of the physical nature of our planet and the diversity of life that inhabited it. To mark the 50th anniversary of the founding of the International Commission on the History of Geology (INHIGEO), the book features contributions that give insights into its establishment and progress. In other sections authors reflect on the value of studying the history of the geosciences and provide accounts of early investigations in fields as diverse as tectonics, volcanology, geomorphology, vertebrate palaeontology and petroleum geology. Other papers discuss the establishment of geological surveys, the contribution of women to geology and biographical sketches of noted scholars in various fields of geoscience.

Piotr Uklanski, a New York based artist, has put together a most surprising and at the same time simple series of pictures. With them he has created an art book consisting of 160 portraits of movie actors playing Nazis. This volume is as much about history as it is about the industry of entertainment. In 1998, The Observer, London, wrote about these compelling and at the same time enstranging portraits: "If you are an actor, chances are that you will play a Nazi, or at least a cruel German officer in the Second World War. How do you make yourself look the part? First comes the matter of expression. Mug up on verbal cliches: 'ice-cold eyes', 'thin, compressed lips', with if possible, 'the hint of cynical smile playing around the corners of the mouth'. An 'air of cold command', rigid jaw muscles denoting 'utter ruthlessness', a tiny flare of nostrils to suggest unspeakable depths of sadism. Fine! Now put on the gear: the tunic with its collar-tabs of SS lightning flashes, the tall black cap with eagle, swastika and death's head. Stunning! Now all you need is that gargling accent unlike any noise ever uttered by a real German."

Aldous Huxley Annual is the official organ of the Aldous Huxley Society at the Centre for Aldous Huxley Studies in Munster, Germany. It publishes essays on the life, times, and interests of Aldous Huxley and his circle. It aspires to be the sort of periodical that Huxley would have wanted to read and to which he might have contributed. This issue features Aldous Huxley's and Beth Wendel's dramatization of The Genius and the Goddess never before published. It also includes several rather unknown travel essays by Aldous Huxley as well as Peter E. Firchow's opening lecture at the Third International Aldous Huxley Symposium held in Riga in July 2004.

One of the most influential anthropological works of the last two decades, Alfred Gell's Art and Agency is a provocative and ambitious work that both challenged and reshaped anthropological understandings of art, agency, creativity and the social. It has become a touchstone in contemporary artifact-based scholarship. This volume brings together leading anthropologists, archaeologists, art historians and other scholars into an interdisciplinary dialogue with Art and Agency, generating a timely re-engagement with the themes, issues and arguments at the heart of Gell's work, which remains salient, and controversial, in the social sciences and humanities. Extending his theory into new territory – from music to literary technology and ontology to technological change – the contributors do not simply take stock, but also provoke, critically reassessing this important work while using it to challenge conceptual and disciplinary boundaries. **Distributed Objects** University of Texas Press

The determination of ordinary people to end regional and global conflicts is powerful despite the forces opposing them. The Struggle for Peace explores how average citizens on both sides of the Israeli-Palestinian conflict worked for peace in the late twentieth century. Essays by noted scholars are juxtaposed with profiles of individual Israelis and Palestinians involved in peace activism. What emerges is a unique perspective on the prospects for peace in this troubled area. Coordinated with a documentary film of the same name, the book is designed as a tool for the study of conflict resolution generally and the Israeli-Palestinian conflict in particular. The twelve original essays deal with the issues from different disciplinary perspectives: political science (Yehoshafat Harkabi, A. R. Norton, Muhammad Muslih, and Robert Vitalis); history (Avraham Zilkha and Joel Beinin); anthropology (Robert Rubinstein); sociology (Salim Tamari); film (Steven Talley); law (Edward Sherman); and international peacekeeping (Christian Harleman). The human side of the struggle is

presented through brief biographies and portraits of twenty-five ordinary Israelis and Palestinians involved in peace activities in Israel and the West Bank.

Teachers and teacher educators asked for: the latest research on literacy more information about national standards ways to consider gender in instruction advice for teaching Advanced Placement classes ideas for teaching media literacy and incorporating technology effectively into instruction even more resources for mentoring new teachers analysis of how trends in society, culture, and politics impact teachers and their classrooms. And Jim delivers. He has revamped his introductory chapters on literacy learning to include up-to-the-minute thinking from the field, and he has incorporated lists of key standards and helpful suggestions for reaching them. His practical strategies turn recent findings on literacy and gender into well-designed, research-based instruction, and his ideas help you meet the very different needs of AP students by understanding their goals and providing them with appropriate challenges.

"Power To Bloom is unlike any book you've read before. It is a gem reminiscent of Krishnamurti and Hafiz, but with its own punch of emerging wisdom and clarity. Nassrine has what I can only call the overt audacity to challenge dozens of our cherished notions about how to manage our minds

and emotions. She offers short 'insight units' pointing toward a direct inner path to the foundational life-knowledge within each of us. While reading these insight units from start to finish, you'll find that a spontaneous process of awakening is stimulated, helping you to unveil what you really are" - John Selby The book has been structured in seven parts. Each part explores a special perspective regarding the natural consciousness through which life fully blossoms. While reading these pages, your ingrained identification with who you think you are will begin to dissolve naturally, allowing you to experience your original state. Biography : Nassrine was brought up in Switzerland with her Iranian father and Russian mother. Recognized at an early age with the ability to instantly perceive a person's medical condition, Nassrine regularly works with patients and groups, sharing her insights into human nature and fulfillment. For the last decade she's traveled the world leading seminars, conferences and retreats. In 2002 she came forth with a new method for enhanced healing and wellbeing called Nutri-Emotion, focusing on the natural correlations and interactions of water, emotions and physical health. Collaborating with psychologists and doctors, in 2014 she published her first book (in her native tongue of French) called Nutri-Emotion, A New Way of Healing and Self-Realization. In 2016 she published her bestselling book The Power of Acceptance - being reborn in a single instant, which has been very successful in French-speaking

countries.

The history of the European oil and gas industry reflects local as well as global political events, economic constraints and the personal endeavours of individual petroleum geoscientists as much as it does the development of technologies and the underlying geology of the region. The first commercial oil wells in Europe were drilled in Poland in 1853, Romania in 1857, Germany in 1859 and Italy in 1860. The 23 papers in this volume focus on the history and heritage of the oil and gas industry in the key European oil-producing countries from the earliest onshore drilling to its development into the modern industry that we know today. The contributors chronicle the main events and some of the major players that shaped the industry in Europe. The volume also marks several important anniversaries, including 150 years of oil exploration in Poland and Romania, the centenary of the drilling of the first oil well in the UK and 50 years of oil production from onshore Spain.
