As long ago as 1957, U.S. Army Special Forces soldiers were in the Republic of Vietnam. going about their business of training, advising, and assisting members of the Vietnamese Army. Despite the old Army witticism about never volunteering for anything, the Special Forces soldier is. in fan, a double volunteer, having first volunteered for airborne training and then again for Special Forces training. From a very meager beginning but sustained by a strong motivation and confidence in his mission, the Special Forces soldier has

marched through the Vietnam struggle in superb fashion. In 1957 some fifty-eight Vietnamese soldiers were given military training by Special Forces troops. Ten years later the Special Forces were advising and assisting over 40,000 paramilitary troops, along with another 40,000 Regional Forces and Popular Forces soldiers. This monograph traces the development and notes the progress, problems. successes, and failures of a unique program undertaken by the U.S. Army for the first lime in its history. It is hoped that all the significant lessons learned have been recorded and the many pitfalls of such a program uncovered. I am responsible for the conclusions reached, yet my thought processes could not escape the influence of the many outstanding officers and men in the Special Forces who joined in the struggle. Particularly, I must lake note of the contributions of the Special Forces noncommissioned officers, without question the most competent soldiers in the world. With the withdrawal of the Special Forces from Vietnam in 1971, the Army could honestly lay claim to a new dimension in ground warfare-the organized employment of a paramilitary force in sustained combat against a determined enemy. I know I speak for my predecessors and successors in claiming that the 5th Special Forces Group

(Airborne) was the finest collection of professional soldiers ever assembled by the U.S. Army, anywhere, anytime.

This paper clearly shows the immediate relevancy of historical study to current events. One of the most common criticisms of the U.S. plan to invade Iraq in 2003 is that too few troops were used. The argument often fails to satisfy anyone for there is no standard against which to judge. A figure of 20 troops per 1000 of the local population is often mentioned as the standard, but as McGrath shows, that figure was arrived at with some questionable assumptions. By analyzing seven military operations from the last 100 years, he arrives at an average number of military forces per 1000 of the population that have been employed in what would generally be considered successful military campaigns. He also points out a variety of important factors affecting those numbers—from geography to local forces employed to supplement soldiers on the battlefield, to the use of contractors—among others.

In the pantheon of air power spokesmen, Giulio Douhet holds center stage. His writings, more often cited than perhaps

actually read, appear as excerpts and aphorisms in the writings of numerous other air power spokesmen, advocates-and critics. Though a highly controversial figure, the very controversy that surrounds him offers to us a testimonial of the value and depth of his work, and the need for airmen today to become familiar with his thought. The progressive development of air power to the point where, today, it is more correct to refer to aerospace power has not outdated the notions of Douhet in the slightest. In fact, in many ways, the kinds of technological capabilities that we enjoy as a global air power provider attest to the breadth of his vision. Douhet, together with Hugh “Boom” Trenchard of Great Britain and William “Billy” Mitchell of the United States, is justly recognized as one of the three great spokesmen of the early air power era. This reprint is offered in the spirit of continuing the dialogue that Douhet himself so perceptively began with the first edition of this book, published in 1921. Readers may well find much that they disagree with in this book, but also much that is of enduring value. The vital necessity of Douhet’s central vision-that command of the air is all important in modern warfare-has been proven throughout the history of wars in this century, from the fighting over the Somme to the air war over Kuwait and Iraq.

How to Be an Antiracist Look for the  
author's new podcast, The Sum of Us,  
based on this book! Heather McGhee's  
specialty is the American economy—and  
the mystery of why it so often fails the  
American public. From the financial crisis  
of 2008 to rising student debt to  
collapsing public infrastructure, she  
found a root problem: racism in our  
politics and policymaking. But not just in  
the most obvious indignities for people  
of color. Racism has costs for white  
people, too. It is the common  
denominator of our most vexing public  
problems, the core dysfunction of our  
democracy and constitutive of the  
spiritual and moral crises that grip us all.  
But how did this happen? And is there a  
way out? McGhee embarks on a deeply  
personal journey across the country from  
Maine to Mississippi to California, tallying  
what we lose when we buy into the zero-  
sum paradigm—the idea that progress  
for some of us must come at the  
expense of others. Along the way, she  
meets white people who confide in her  
about losing their homes, their dreams,  
and their shot at better jobs to the toxic  
mix of American racism and greed. This  
is the story of how public goods in this  
country—from parks and pools to  
functioning schools—have become  
private luxuries; of how unions  
collapsed, wages stagnated, and  
inequality increased; and of how this  
country, unique among the world's  
advanced economies, has thwarted  
universal healthcare. But in unlikely  
places of worship and work, McGhee  
finds proof of what she calls the

Solidarity Dividend: the benefits we gain when people come together across race to accomplish what we simply can't do on our own. The Sum of Us is not only a brilliant analysis of how we arrived here but also a heartfelt message, delivered with startling empathy, from a black woman to a multiracial America. It leaves us with a new vision for a future in which we finally realize that life can be more than a zero-sum game.
