**NAPLAN-style Tests** John Wiley & Sons  
Mental Maths is the Maths we do in our heads without the use of calculators and without writing down the calculation. Mental Maths strategies are the 'tricks', we use to do Maths in our heads. There are different ways of finding the answer to any Mental Maths problem, and such strategies are the focus of this series. Even though calculators and computers play an enormous role in the modern world, we still need to go back to the basics % we do need to know how to check that the sales assistant at the counter is giving us the right change! Mental Maths has become more important than ever and new primary Maths syllabuses in Australia

are reflecting this. For example, NSW has placed an emphasis on Mental Maths in its primary syllabus, and even the Year 10 School Certificate examination has a compulsory non-calculator section. Features of this book include: 32 double-page units of Mentals are included % 8 units for each school term each unit is divided into four sets (A,B,C and D) of 15 questions each each numbered question covers particular Maths topics throughout the book: for example, Question 1 always covers addition, while Question 15 always covers geometry a special 'eHelp' section,, at the front of the book gives different strategies and explanations to help students solve Mentals problems . These are also numbered so they link to the question numbers in each Mentals unit a eFun Spot,, unit, containing fun activities, and a eRevision,, unit are included at the end of each 8 units extra practice,, sections which reinforce particular strategies appear in the lower part of each page answers to all questions are in a lift-out section in the centre of the book

The importance of being able to read for meaning should never be underestimated. The ability to decode text is not enough. It is vital that children understand what they are reading. More importantly, it is fundamental that they enjoy what they are reading, so that they grow up to become lifelong readers. The passages in the Brilliant Activities for Reading Comprehension series are designed to do just that. They provide children with a variety of engaging, enjoyable texts that will grab their attention, and indeed their teacher's attention as well. The types of

comprehension passages range from newspaper articles and dialogues, to plays, stories and poems. They gradually increase in difficulty as you progress through the book, and through the series, encouraging children to develop their ability to read for meaning and use a range of strategies to engage with the text. Tasks range from simple factual recall and vocabulary work to more open-ended questions enabling the reader to provide a more personal response. The cross-curricular activities provide a wealth of ideas for extending the passages further and are ideal for fast-finishers.
